Catalogue

Deliveries

Standard goods included in this catalogue can in most cases be delivered from stock. However, we cannot accept any responsibility for late delivery or non-delivery. We aim at despatching goods ordered within the term of delivery agreed upon. Should there be a change in the date of delivery, owing to circumstances beyond our control, we shall inform you at the earliest possible convenience, stating the expected new date of delivery.

Shipment of Goods

If goods are to be shipped by us, we shall select the transport company, but shipment is at buyer's risk. Unless agreed otherwise, shafts, sterntubes, rudders, propellers, couplings etc. will be shipped at buyer's cost, and there will be a charge for necessary packing, such as crates, boxes etc.

Return of Goods

Goods delivered by us can only be returned by mutual arrangement. Return shipments must always be postage prepaid. Returned goods which are not sent postage prepaid, will not be accepted under any circumstances.

Complaints

Complaints about deliveries should reach us within 8 days after their arrival. The granting of warranty claims is decided on by us only, after having consulted the manufacturer or the importer. We shall not be held liable for damages arising from faulty or insufficient performance of a product supplied by us.

Payments

All prices are based on cash payment, unless expressly agreed otherwise.

Conditions

All our quotations, all orders placed on us and all contracts and/or agreements outside the Netherlands are subject to the ORGALIME General Conditions of Sale, as registered in Brussels in September 2012, including subsequent additions and alterations, for the supply of mechanical, electrical and associated electronic products.

Experience and knowledge

Exalto B.V. is a technical manufacturer and supplier of marine equipment. With a vast experience of over 50 years, Exalto has established a name of high quality, supreme price/quality proportion and we accommodate a high level of technical knowledge and understanding. With the benefit of our own production facilities, we are able to offer our clients a tailor-made solution in either existing or new solutions. We are able to respond quickly to changing demands of the market and its customer base.

Our activities can be divided into three categories:

Exalto

Wiper Technologies

Development and manufacture of Exalto Wipers, the leading standard in the marine industry worldwide for the past 30 years. We have our own wiper business unit and develop and manufacture our own range of wipers. We only use the best marine grade materials for all parts of the system. We deliver to you within two weeks, thus allowing customers flexibility and stock reduction. We offer the best lead times for the worlds yacht building industry.

Wipers

Complete propulsion systems

Exalto B.V. develops, produces and sells custom-made propulsion systems and rudder installations. This all takes place in our well-equipped workshop. We produce propulsion systems with diameters with a range from 25 to 600mm and up to 13.000mm. in length.

Our sterngear installations can be delivered in compliance with all renowned classification societies (e.g. Lloyds).

Propulsion

Quality in every way

Exalto stands for quality in every way. Although we are a wholesaler, we don't just pass on boxes. Our product range is enormous. Many products are available immediately and we strive to keep back orders to a minimum.

We import and distribute only the best top quality brands, including for instance Jabsco, VDO, Mastervolt, Rheinstorm, Recaro Xunzel, et cetera.

Parts

Fell Marine

FELL is a developer and manufacturer of marine electronics. They are specialized in wireless safety technology. With the MOB+ xBAND you get a highly marine durable silicon wristband. This enables you to use the xFOB at your wrist, always on – never intrusive. Available in several colors and designs that match your style.

New

TowForceOne

The TowForceOne Towbar is a must have for wake, ski and tube. The use of a towbar reduces the power needed to tow. The TowForceOne towbar is made out of strong stainless steel. Every TowForceOne towbar comes complete with pre-assembled mounting brackets, towbar, TowRoller and fasteners.

New

Xunzel product line

XUNZEL is a key global player in the application of innovative solar and wind renewable energy technologies for Off-Grid, Off-Shore, Mobile and Backup Applications. Our products and Solutions range from solar panels and wind turbines to system components such as power electronics, charge controllers and inverters, as well as solar light solutions and products.

Why Exalto is your address for Wipers:

- **Complete range reliable wiper systems**

Exalto produces the world's best professional marine wiper systems. Years of experience in this market combined with a high level of technical knowhow have resulted in reliable and durable high quality systems, designed by our own Research & Development department. Exalto makes complete wiper systems including motor, arms, blades, controls and washing systems for all kind of vessels in the commercial as well as the leisure market.

- **High quality materials for marine environment**

We produce wipers especially for the marine industry. The marine environment is fairly hostile to the materials wipers are made of. That is why you will only find top quality materials in our wiper systems. Stainless steel, naval brass, high grade rubber, everything tested thoroughly for use in marine applications.

- **Technical expertise**

In our own wiper workshop, our people work on wipers every day, all day. We have a wealth of experience and craftsmanship under our own roof. Together with the state-of-the-art tools and materials we work with, we have the perfect conditions to produce the best performing system for your application.

- **Flexibility**

Because we assemble our pantograph Heavy Duty (H.D) wipersystems in-house, we can be flexible to your demands. If our standard range of our wiper system does not fit your situation, we have all means to supply you with the best tailor-made solution.

- **One-stop-wiper-shop**

But there is more than just our H.D. systems. We are a one-stop shop for all your wiper products. So if we don't produce it ourselves, we have reliable partners who supply e.g. straightline wipers, rotary wipers and L.D. wipers. We make sure you will get the very best system available today!.

- **On time delivery**

We offer very short lead times, which is a big advantage in shipbuilding. We strive to have standard systems, as shown in this catalogue, delivered within three weeks after date of order. For non-standard, tailor-made systems you should take a delivery period into account of three to four weeks, depending on the amount of wipers you will need.

- **After sales support**

Our wiper specialists can provide a comprehensive advice to ensure the system works accurately and to your wishes. Should problems occur, it is always our main priority to solve it quickly and accurately.

- **True wiper experts**

We produce wipers, we supply the best wipers in our field of expertise, we are fast in supplying you with the best and there is not a wiper need we cannot fulfil. All this combined makes Exalto the true wiper expert we claim to be. Put us to the test and let us proof it to you!

- **Wiper Questionnaire and wiper website**

Don't worry about choosing the right system for your application. Our wiper specialists will help you. Just fill in the wiper questionnaire, and they will make you a recommendation. You will find the questionnaire online at our wiper website www.exaltowipers.com. This site is fully dedicated to our wiper systems, so here you will find product information, manuals, dealer addresses and more.

“Exalto’s passion is for creating a clear view by producing the world’s best marine wiper systems”

Please contact our sales department. Our “Wipers” specialists will help you choosing the right system for your application.

LD Wiper motors 215BD

This self parking Light Duty wiper is suitable for either bulkhead or through glass mounting. The 215BD is a pendulum or single spindle unit. It can easily be converted to a pantograph system with the external pantograph plate that comes with the pantograph wiper arm. The wiper motor unit is fully enclosed in a waterproof housing. The housing is rated at IP66, so the 215BD is suitable for both open and covered boats.

LD Wiper arms SS 304

The Exalto LD wiper arms are special for the 215BD windscreen wiper. They are available in a black-coated version and a stainless steel polished version. The single arm is also available with an adjustable clip; This allows you to park the blade along the edge of the window.

The parallel arms are available with 1 and 2 springs and the support shaft is supplied as standard.

Pos.	Description	Item no.
1	Clip for tubing of 2108 and 215BD arms	2154.CLIP
2	Nozzle for 215BD arms	21000.326
3	Washing jet, 2 nozzles for MD1 PU arms	2184

LD Wiper blades SS 316

These Exalto wiper blades are manufactured of stainless steel 316. To prevent reflection, a black coating is applied on all metal parts. The Heavy Duty blades have a special profile that reduces lift. This makes them perfect for applications where a little more pressure is required. The Heavy Duty blades are also more screen friendly due to the use of plastic lower bridges. In case of damaged rubber, these plastic bridges will not damage the screen. Keep in mind that every motor has a maximum blade length when choosing your wiperblade.

Description	Blade length	Item no.
Exalto wiper blade	250 mm	2170.HP
Exalto wiper blade	300 mm	2171.HP
Exalto wiper blade	350 mm	2172.HP

MD1 Wiper motors 223BDO

Self-parking Exalto MD wiper for bulkhead mounting. This wiper is available in 12V and 24V and for several bulkhead thicknesses. With a torque of 23 Nm these wipers can drive arms up to 750 mm in length in combination with blades up to 750 mm in length. The 223BDO is a pantograph wiper system. For these wipers a cover in black or white is available to protect the motor and keep all moving parts out of reach. The motor is IER standard. The wiping arc is adjustable from 40 to 90 degrees in 5 degrees increments.

MD1 External wiper housing 223BDO

The Exalto External Wiper Housing is ideally suited for installations where internally installation-space is not sufficient and offer unmatched mounting flexibility and installation ease. The systems' easily adjustable sweep angles, wiper arm lengths and spring pressure make the Exalto External Wiper Housing easy to configure and install for a wide variety of window configurations.

Please note that you will need the special designed arms 2133.R, 2136.R or 2139.R for this installation. Also the 2197.301 Connector Kit is necessary to make a waterproof connection.

Description	Item no.
External Housing IP66 for 223BD wipersystem	2197.300
Connector Kit for External Wiper Housing	2197.301

MD1 Wiper motors 223BDC

This self-parking Exalto MD1 wiper is suitable for bulkhead mounting. This wiper is available in 12 and 24V. All moving parts are protected by an aluminum housing. With a torque of 23 Nm, this wiper can handle arms up to 750 mm in length and blades up to 750 mm. The motor is insulated earth as standard. The wiping angle is adjustable from 40° up to 90°, in 5° increments.

MD1 Wiper motors 223BDS

Self-parking Exalto MD1 wiper for bulkhead mounting. This wiper is available in 12V and 24V and for several bulkhead thicknesses. With a torque of 23 Nm these wipers can drive arms up to 750 mm in length in combination with blades up to 750 mm in length. The 223BDS has only one shaft which makes this a pendulum wiper system. For these wipers a cover in black or white is available to protect the motor and keep all moving parts out of reach. The motor is IER standard. The wiping arc is adjustable from 40 to 90 degrees in 5 degrees increments.

MD1 Wiper motors 223BS

Self-parking Exalto MD1 wiper for bulkhead mounting. This wiper is available in 12V and 24V and for several bulkhead thicknesses. With a torque of 23 Nm these wipers can drive arms up to 750 mm in length in combination with blades up to 750 mm in length. The motor is insulated earth as standard. The 223BS differs from the 223BD and 223BDS by means of the adjustability of the wiping arc. Where the 223BD and BDS can adjust the wiping angle with 5° increments, the 223BS is infinitely variable. The black or White cover does NOT fit on this wiper.

MD1 Wiper motors 223KGO

This self-parking Exalto MD1 wiper is suitable for glass mounting. All moving parts of the 223KGO are protected by an aluminum housing. For the 223KGO a white or black cover is available. These motors can handle arms up to 450 mm in length and blades up to 500 mm. As this wiper is to be fitted in the glass and has a different drive system from the other wipers, larger arms and blades are not recommended. The wipers have a standard insulated earth return. The wiping angle is adjustable from 40° to 90°, in 5° increments. The motors is insulated earth return standard as well. The 223KGC and 223KGO are only available for a glass thickness of 17 mm or less.

Max. armlength	: 450 mm	Centre distance	: 50 mm

MD1 Wiper motors 223KGC

This self-parking Exalto MD1 wiper is suitable for glass mounting. All moving parts of the 223KGC are protected by an aluminum housing. These motors can handle arms up to 450 mm in length and blades up to 500 mm. As this wiper is to be fitted in the glass and has a different drive system from the other wipers, larger arms and blades are not recommended. The wipers have a standard insulated earth return. The wiping angle is adjustable from 40° to 90°, in 5° increments. The motors is insulated earth return standard as well. The 223KGC and 223KGO are only available for a glass thickness of 17 mm or less.

MD1 Pendulum wiper arms for 223BDS

The E-arms are specially designed for the Exalto KW linked and single shaft (e.g. 223BDS) wiper systems. They are made of stainless steel and have a black coating. These pendulum arms have a stepless swivelling blade clip to allow the blade to be positioned parallel to the edge of the glass and are adjustable in length.

Wiper arm length	Description	Max. bladlength	Item no.
300 - 450 mm	Single adjustable arm, Type KW E	250 - 750 mm	2103
450 - 600 mm	Single adjustable arm, Type KW E	250 - 750 mm	2106
600 - 750 mm	Single adjustable arm, Type KW E	250 - 750 mm	2109

MD1 Wiper arms PU

The Exalto PU arms are suitable for all MD wiper systems for small and medium sized windows up to 1100 mm in height. This means that they can be installed on all MD1 & MD2-series wiper motors. All PU arms have a fold back feature, so they can be placed in fixed position away from the windshield. This makes it easier to mount the arms, replace the blades or to clean the window. As a standard the PU arms also have adjustable spring pressure to regulate the pressure of the blade on the window steplessly.

The .01 version allows double spring pressure on high-speed vessels or raked windows. The position of the blade in relation to the window configuration can be adjusted by the swivelling blade clip. All Exalto wiper arms are made of stainless steel 316 and have bronze heads. A black coating is applied on all metal parts as a standard to prevent reflection. The polished arms are new, so you can choose which arm suits the look of your vessel most. The wiper arms are adjustable in length.

Centre distance : 50 mm

MD1 Wiper arms PU Reversed

These Exalto wiperarms are specially designed to fit the Exalto External Wiperhousing (PartNo 2197.300).

The arms have a reversed head to fit the motor inside the External Wiperhousing.

As a standard the PU arms also have adjustable spring pressure to regulate the pressure of the blade on the window steplessly. The position of the blade in relation to the window configuration can be adjusted by the swivelling blade clip. All Exalto wiper arms are made of stainless steel 316 and have bronze heads. A black coating is applied on all metal parts as a standard to prevent reflection. The wiper arms are adjustable in length.

MD1 Wiper blades SS 316

These Exalto wiper blades are manufactured of stainless steel 316. To prevent reflection, a black coating is applied on all metal parts. The Heavy Duty blades have a special profile that reduces lift. This makes them perfect for applications where a little more pressure is required. The Heavy Duty blades are also more screen friendly due to the use of plastic lower bridges. In case of damaged rubber, these plastic bridges will not damage the screen. Keep in mind that every motor has a maximum blade length when choosing your wiperblade.

MD1 Wiper controls CT3EX

Electronic multivolt wiper control for up to three Exalto MD1 wipers. Wipers can be switched individually or in any combination. LED's indicate each setting. The complete wiper control consists of one flush mount panel of 72 x 72 mm and one junction box. The wiper control offers two continuous speeds, three-step intermittent speeds and a wipe/wash feature. All wipers are self-parking. The wipers run synchronised in all settings. To ease the mounting of the panel, we offer two different bulkhead mounts: a low and a high version. These mounts should be ordered separately. Not suitable for LD, MD2, HD1 and HD2 wipers

L x W x H : 72 x 72 x 72 mm

MD2 Wiper motors 240BS

Self-parking wiper motor for bulkhead mounting. The 240BS is a powerful wiper with dual driven shafts. It can clean windows up to a height of 1600 mm. With a torque of 40 Nm, this wiper motor powers arms and blades of 900mm in length. This motor is insulated earth return as a standard. The wiping angle of this wiper motor is freely adjustable from 40° to 90°.

MD2 Wiper arms PF

The PF arms are specially designed for wiper motor 240BS. Exalto PF arms are available for standard blades to 800 mm in length, or for H.D blades to 900mm in length. The arm is manufactured from stainless steel 316 and has brass, seawater resistant heads. The PF arms are fixed length and fixed spring pressure as a standard. The PF arm as standard has a swiveling blade clip to allow easy adjustment of the position of the blade in relation to the window configuration. The arm has a black coating to prevent reflection as a standard. However, these arms with fixed springs are also available in high polished stainless steel. The PF arms with fixed springs can be folded back, which allows it easier to mount the arms, change the blades or clean the window. Alternatively HD1 P10 arms can be used.

HD1 Wiper motor covers 255BS

Description	Color	Item no.
Cover for HD 1 255BS	Black	2115.255

HD1 Wiper arms P10

The P10 arms are specially designed for wiper motor 255BS. Exalto P10 arms are available for standard and H.D. blades till 800 mm in length, or for H.D. blades from 850 till 1200 mm in length. The arm is manufactured from stainless steel 316 and has brass, seawater resistant heads. The P10 arms have two fixed springs as a standard. If you want to adjust the pressure on the glass yourself, P10 arms with two steplessly adjustable springs are also available. The P10 arms have a swivelling blade clip, to adjust the position of the blade in relation to the window configuration easily. The arm has a black coating to prevent reflection as a standard. However, these arms with fixed springs are also available in high polished stainless steel.

Centre distance : 60 mm

HD1 Wiper blades SS 316

These Exalto wiper blades are manufactured of stainless steel 316. To prevent reflection, a black coating is applied on all metal parts. The Heavy Duty blades have a special profile that reduces lift. This makes them perfect for applications where a little more pressure is required. The Heavy Duty blades are also more screen friendly due to the use of plastic lower bridges. In case of damaged rubber, these plastic bridges will not damage the screen. Keep in mind that every motor has a maximum blade length when choosing your wiperblade.

HD1 Wiper controls CT2N

Electronic control for up to two, three, four or five Exalto wipers. Wipers can be switched individually or in any combination. The complete wiper control consists of one flush mount panel, one junction box and a 5 m cat 5 connection cable to connect the panel to the junction box. The wiper control offers two continuous speeds, three step intermittent speeds and a wipe/wash feature. All wipers run synchronised in all speeds and are self-parking. LED indicators on the panel indicate the selected speed setting. The system has the capability to run a higher number of wipers, controlled in groups; please contact Exalto for options.

HD2 Wiper arms P12

The P12 arms are specially designed for the powerful 280BS and 2110BS wiper. The Exalto P12 arm will be manufactured to the required length. Please, note that therefore they have a longer delivery time. The P12 is not adjustable in length. The P12 arm is made of stainless steel 316 and has seawater resistant brass heads. A black coating is applied as a standard to prevent reflection. The Exalto P12 arms have two adjustable springs, to adjust the pressure on the glass steplessly. By means of the swivelling blade clip, you can park your blades parallel to the window. We advise you to use the Exalto Heavy Duty (H.D.) blades in combination with this arm.

Centre distance : 60 mm

KW2 Linked wiper systems

The Exalto KW2 wiper system is custom-made, so in almost every situation the perfect solution can be offered. With one motor 2 arms can be driven. Main advantage of this wiper system is that the arms are easily adjustable in length. The arms have a swivelling blade clip, so in selfparking position the blade can be set parallel to the edge of the glass. The type E wiper arms are specially designed for the Exalto KW wiper systems. We advise you to use the Exalto H.D. blades. Features Exalto KW: • Easy to mount • Insulated earth return • Noiseless • Self-parking • Two speeds • Available for bulkhead thicknesses 20, 35, 55, 75, 100 and 125 mm • Stainless steel shafts, bolts and nuts • Self-lubricating bronze bearings • Maximum wiping angle 100° • Three types: for two, three or four pendulum arms

KW Wiper controls Retro

These switches offer two speeds and self-parking controls with separate connections for pumps or solenoids giving wash/wipe facility.

Pos.	Description	Suitable for	Voltage	Item no.
1	2-speed wiper control for 1 wiper	Exalto wipers	12/24 V	2134
2	2-speed wiper control for 2 wipers	Exalto wipers	12/24 V	2135
3	2-speed, intermittent wiper control	Exalto wipers	12 V	2158
3	2-speed, intermittent wiper control	Exalto wipers	24 V	2159
4	Panel for 2-speed intermittent switch	2158, 2159		2159.01

KW Wiper controls CT41

These switches are micro-controller based "intelligent" switches for operating one or two Exalto wiper motors. The switches consist of touch pads with a 45 cm connection cable. The switches offer two continuous speeds, three step intermittent, perfect self-parking due to dynamic break and a wipe/wash program. LEDs on the switch indicate the selected mode, speed and intermittent setting. The wiper switches operate with a power supply of 10 - 30V.

Installation dimensions : 36,5 x 21 x 90 mm
Cable length : 450 mm

Description	Suitable for	Voltage	Item no.
Wiper control for 1 wiper 6A	MD1, MD2, KW2	12/24 V	210341J
Wiperswitch 12 Amp 1 wiper	HD1, HD2, KW3/ KW4	12/24 V	210341P

Fittings for low pressure systems

Pos.	Description	B.S.P. x Ø mm	Item no.

	Non return valve 6x6mm		2128

Bulkhead mount washing jets

These washing jets can be mounted on the deck or skin of the vessel. With most washing jets the angle under which the water is sprayed on the window, can be adjusted. These washing jets are also suitable for the linked wiper system type KW.

Pos.	Description	Voltage	Item no.
2	Fixed washing jet (bulkhead)		2161
1	Heated washing jet	24 V	2148
1	Heated washing jet	230 V	2149

Arm mount type washing jets

These washing jets can be fitted on Exalto pantograph arms PF, P10 and P12. With most washing jets the angle under which the water is sprayed on the window, can be adjusted.

Pos.	Description	Item no.
1	Washing jet, 6 nozzles for HD1 P10 & HD2 P12	2111.cpl
3	Washing jet, 2 nozzles for MD1 PU arms	2184
2	Washing jet, 4 nozzles for HD1 P10 & HD2 P12 right	2185
3	Washing jet 4 nozzles for HD1 P10 & HD2 P12	2185L
4	Washing jet, 6 nozzles for MD1 PU and E-arms	2110.cpl

Reservoirs with pump

For your wash system you can use the water from your fresh water system. You only need a solenoid valve. As soon as the valve gets a signal via the wiper control, it will open to provide water for the wipe/wash program. If you don't have a pressurized drinking water system, you can use one of the reservoirs.

Pos.	Description	Voltage	Item no.
	Reservoir 1,2 ltr with 1 pump	12 V	2100.PT-0701080
1	Reservoir 8,0 ltr with pump	12 V	2193
	Reservoir 8,0 ltr with 2 pumps	12 V	PT0701042
-	Reservoir 8,0 ltr with 3 pumps	12 V	PT0701044
	Reservoir 1,2 ltr with 1 pump	24 V	2100.PT-0701081
	Reservoir 5,0 ltr with 1 pump	24 V	2100.PT0701021

Solenoid valves

For your wash system you can use the water from your on board pressure supply. You only need a solenoid valve. As soon as the valve gets a signal via the wiper control, it will open to provide water for the wipe/wash program.

Pos.	Description	Voltage	Connections	Item no.
1	Solenoid valve	12 V	1/8" B.S.P.	2137
-	Solenoid valve	24 V	1/8" B.S.P.	2138
2	Solenoid valve	12 V	1/4" B.S.P.	2142
-	Solenoid valve	24 V	1/4" B.S.P.	2143

Straightline HD DW80

The Straight Line Wipersystem is made to meet your specific needs. With this system it is possible to wipe 90% of your window.

The SL wiper is suitable for windows from 0.5 meter upto 3 meters. it is available as single or twin system(one or two arms).

Mounting a Straight Line wipersystem is a breeze. The system works perfectly in a temperature range of -40°C and +50°C. The motor is mounted externally and integral to the systems casing, made of seawater resistant anodised aluminium in white powder coating. the arm is adjustable in length and also the spring pressure is adjustable. The control can be configured to control either one or multiple groups of wipers.

Voltages available are 24VDC, 110VAC and 230VAC. Also various control systems are available. Please contact Exalto sales for more information.

Description	Item no.
Made to order, please contact our sales dept.	DW80xxxx1x

Straightline arms

The wiperarms for the straightline wipers are made of stainless steel with black coating and are supplied in full length. The arms feature stepless spring tension adjustment by means of 2 springs. They are available in 2 models; one for blades from 500 upto 800mm and one for blades from 900 upto 1000mm.

Description	Item no.
Wiperarm for 500-800mm blades	DW81000007
Wiperarm for 900-1000mm blades	DW81000008

Straightline blades

The Straightline Wiperblades are designed to fit the Straightline wiperarms. The blades have a black coating finish.

Description	Blade length	Suitable for	Item no.
Wiper blade	500 mm	SL	DW10500500
Wiper blade	600 mm	SL	DW10500600
Wiper blade	700 mm	SL	DW10500700
Wiper blade	800 mm	SL	DW10500800
Wiper blade	900 mm	SL	DW10500900
Wiper blade	1000 mm	SL	DW10501000

Straightline cables

This special cable is necessary to connect the wiper to the controlsystem. The cable is available in different lengths.

Description	Item no.
Cable 3m with connector	DW81000203
Cable 5m with connector	DW81000205
Cable 10m with connector	DW81000210

Seaview 300

The CVS is totally different from the other wipers. It is a clear view screen. This means that the front part of the CVS rotates with a high speed. By the centrifugal force the area between the anodized aluminum stays free of rain. Comes with clear assembly instruction, a template for cutting the glass and an assembly tool. Optional is the control panel (surface or flush mount).

Why Exalto is your address for Propulsion

- **Complete propulsion systems**

Propulsion is a core activity of Exalto. We can offer you complete propulsion systems, from coupling to propeller. Our engineers design the systems and in our well-equipped workshop we can produce sterngear installations for shafts from \varnothing 25 mm. The maximum size of shafts we can produce is 12 metres in length or with a maximum weight of 5 tons.

- **Sales experts**

We have a sales team dedicated to propulsion systems only. You can be sure they know exactly what you are talking about. And they can give you the best advice possible for your propulsion system.

A sterntube's mounting aids are welded on in our workshop.

- **Exalto made**

Most propulsion products shown here are made in our own production facility in Hardinxveld, the Netherlands. Shafts, stern tubes, Hollex seals, thrust bearings, rudder systems; they are all in-house engineered and produced. In our production facility we have all the machinery and craftsmanship to put to work for your propulsion system.

- **Re-fit**

Sometimes you only need to have part of the propulsion system replaced. We'll gladly advise you about the right solution. Even when you have a very unusual tailor-made system, we are likely to be able to reproduce parts of the system.

An example of a customised shaft with non-standard propeller

• Classification

Commercial ships and some leisure yachts require classification. Of course, we can design and produce systems according to most classification societies. We often produce according to ABS, BV, Lloyd's, RINA, DNV and GL. Depending on your wishes, Exalto can take care of having the propulsion system classified. If required, we supply with full certification and survey.

• Calculations

To offer the best possible propulsion system, we take care of all calculations. E.g. the calculations for the propeller, couplings, shaft diameters, bearing distances, and more. Check our downloads on www.exalto.com for our propeller form and our MO sterntube form to see what data we need, or contact our Propulsion sales team for help.

Work in progress on a customised rudder installation in our production facility in Hardinxveld, The Netherlands.

Exalto Custom Rudder installations

Exalto rudder installations are completely in-house designed and fabricated.

A typical Exalto rudder installation consists of:

- a rudder stock, split type (by means of a flange connection) or non-split type, made of stainless steel 316 and the lower part of steel.
- a stainless steel tube with steel double walled welding ends. A maintenance-free double row spherical bearing and a water lubricated rubber bearing are included.
- if the rudder is not free hanging, a demountable heel socket with a water lubricated rubber bearing is also included.
- if a blade is required, Exalto can offer single or double plated rudder blades.

All Exalto rudder installations are manufactured in our own workshop. We use only first class materials and if required, we can supply the installations in accordance with the standards of all well-established classification societies. Our technical consultants would be pleased to help you with determining design and materials.

Please do not hesitate to contact us, delivery times and prizes are available on request.

Exalto ERS Rudder systems

The ERS (Exalto Rudder System) concerns an outer /inner tube system in which a steel casing pipe is welded in the hull at an early stage. For rudder stock \varnothing 35 and 40 mm, this concerns \varnothing 101.6 x 6.3 mm, for rudder stock \varnothing 45 mm and 50 mm diameter it is \varnothing 127 x 7.1 mm. The GRP inner tube is equipped with a lower and an upper bearing and the shaft is sealed by means of a Carco-seal. During building you can mount the GRP inner tube in the outer tube by means of a clamping system. The stainless steel rudder stock can be produced undivided or divided. On the upper side a square is milled for the emergency tiller arm. Delivery includes a rudder lever. This complete system is quick and easy to install.

Benefits:

- No corrosion
- Low installation costs due to simple installation
- Bearings are easy to replace by removable rudder tube

Rudder tubes are available in brass, steel, stainless steel or GRP.

Shaft diameters, length of rudder tubes, rudder stocks, delivery times and prizes are available on request.

Exalto Maintenance-free rudder installations

No rudder installation is the same. That is why we specialize in designing and producing customised rudder installations. A complete Exalto rudder installation consists of a rudder tube, a rudder stock and a rudder lever. The rudder stock is made of stainless steel, to allow welding of the rudder blade. The rudder stock is locked by the rudder lever at one side and a stainless steel clamping ring at the other side. It also has an emergency steering feature. Optional a weldable heel socket with composite bearing is available. Rudder stocks are available in split or non-split type.

Rudder tubes are available in brass, steel, stainless steel or GRP.

Shaft diameters, length of rudder tubes, rudder stocks, delivery times and prizes are available on request.

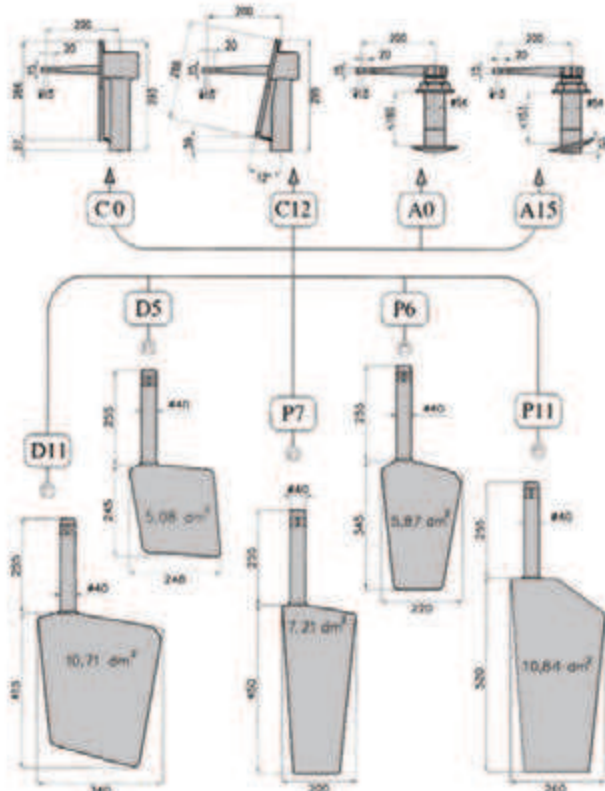

TOR Type 40 D & P

TOR rudders are available for vessels up to 12 metres in length. Attention: TOR rudders are only supplied as complete rudder installations. Standard delivery time for TOR rudder installations is three weeks.

As supplier of marine propellers, Exalto has a solid reputation for Michigan Wheel propellers.

These are high quality propellers for both the yachting and the professional industries. Besides the propellers quality, the choice of the right kind of propeller is crucial. The right propeller will deliver the optimum propulsion.

Calculation

Because choosing the right propeller is crucial for an efficient propulsion system, Exalto specializes in propeller calculation. We can give you a solid, thorough advice on the right propeller in your specific situation. You can download our special Propeller questionnaire on www.exalto.com. Just fill in the data and return the form to us. We will then be able to calculate the best propeller for you.

All sorts, shapes and sizes

We supply a very wide range of propellers to choose from. We offer propellers:

- For every kind of application imaginable
- Varying from standard propellers to propellers for displacement, sailing or planing vessels
- Customized propellers for e.g. submarines (Goldline and Powerline propellers)
- With diameters measuring from 5" up to almost 3 meters
- From all known materials like Mn.Br, and Ni.Al.Br.
- in various qualities, like Class S, I and II, ISO 481/1 and ISO481/2. These propellers are designed with CAD/CAM-technology and fabricated with CNC machines. This contributes to a higher efficiency, less vibrations, a lower noise level and less fuel consumption.
- With approval of various classification societies, e.g. LR, BV, ABS, DNV, GL etc.
- All the propellers can be supplied with a M.R.I. measuring rapport.

Free rotation of the propeller

After the diameter of the propeller has been determined, it is very important to know whether this propeller can be fitted. To prevent vibration it is absolutely necessary to take into account certain clearances of the propeller. Clearance of the propeller needs to be 15% of the diameter of the propeller at the top and 4% at the bottom

Caution!

The incorrect combination of gearbox ratio and/or propeller type may cause vibration problems.

Clearance in propeller frame

Type Goldline

Standard Goldline propellers are made of manganese bronze (Mn.Br.). These propellers comply to the ISO 484/2 class II tolerances.

In most situations Mn.Br. is a good material for propellers. But when it comes to aluminum or seagoing non metallic vessels, we advise the use of a nickel aluminum bronze propeller.

Manganese bronze contains up to 40% of zinc, which always causes unwanted reactions when used with aluminum. Nickel aluminum bronze is almost free of zinc, so this will not cause any troubles. If there is a lot of cavitation, or if the engine is very powerful, we advise nickel-aluminum bronze as well.

All Goldline propellers can be supplied in nickel-aluminum bronze (Ni.Al.Br.) at a surcharge. If you are not sure which material would be best in your situation, please do not hesitate to ask our experts at the Sales department Propulsion.

Standard range Goldline propellers:

- GL235 - D.A.R. 2B : 35%
- GL352 - D.A.R. 3B : 52%
- GL469 - D.A.R. 4B : 69%
- GL485 - D.A.R. 4B : 85%
- GL592 - D.A.R. 5B : 92%

Diameter	Outside boss ØD1 x ØD2	Keyway (W x D)	Standard bore (tapered 1:10) Ø d1 x Ød2 x L

29 - 736 inch-mm	76 x 102 mm	16 x 5 mm	60 x 45 x 150
30 - 762 inch-mm	76 x 102 mm	16 x 5 mm	60 x 45 x 150

Type Powerline

As well as the mentioned Goldline propellers, we can also supply many other types. For custom designed propellers, Exalto is the best address to go. Below you can find some examples of commonly used propellers.

Type Powerline High Skew

Powerline propellers are designed for higher speeds and shaft rpm. They have a large blade area that solves cavitation problems. The variable pitch, chord, camber, rake and skew distributions are modelled to deliver maximum performance, minimal noise and vibration and to manage the elimination of cavitation induced damage

All our propellers are stamped with individual serial numbers that allow full traceability of the alloy chemical composition and mechanical characteristics. The Powerline range can also be supplied in Ni.Al.Br. material.

High skew propellers	:
PL375 - D.A.R. 3B	: 75%
PL485 - D.A.R. 4B	: 85%
PL592 - D.A.R. 5B	: 92%
PL506 - D.A.R. 5B	: 106%

Below you can find some examples of commonly used propellers.

VARIPROP

FEATHERING PROPELLERS

Variprop is a user-friendly superior feathering propeller, made of durable Ni.Br.Al. Available for sailing yachts up to 180 HP (132 kW). As soon as the engine is turned off, the waterflow rotates the blades. This reduces the drag to almost nothing, and increases the speed. Variprop propellers cause little turbulence and therefore optimize the rudder effect.

Within less than one shaft rotation the propeller blade turns 180°. The thrust in reverse is equal to forward. This is approximately 30-40% better than with fixed propeller blades. This improves the stopping power.

The blades are dynamically balanced, so they run smooth, quiet and without vibration. Rope cutters can be mounted close to the blades.

Unique features Variprop:

- Independently adjustable external pitch control of reverse and forward thrust
- Patented SoftStop shock absorbing multidisc brake. This dramatically reduces shock loads, unpleasant operating noises and wear.
- Gears are 35-50% larger than competing propellers to extend the service life
- Easy mounting as the propeller will be supplied fully assembled
- Short built-in length, so they can be built in to almost every sailing yacht
- Germanischer Lloyd approval

Variprop 2-blade feathering propeller

Saildrive propellers are available on request.

Diameter	Max. diam. shaft	Hub	Power	Built-in length	Weight ±

One of the benefits of the Maxprop feathering propellers is the variety of models for almost any application.

The MAX PROP propeller has been realized in Italy by Bianchi Srl (now MAX PROP Srl.) in 1975 and has solved the age-old problem of the motor propulsion for sailing yachts. Until this innovative product appeared on the market the alternative given by the traditional propellers was: either having good engine performance with high drag during sailing, or better speed when sailing (sensibly faster, thanks to the low drag of the prop in the water) with low engine performance, especially in reverse.

Type Easy 2-, 3- and 4-blades

The new models Easy 2-, 3- and 4-blade and Whisper 5-blade are a step forward in Maxprop design. They are shipped fully assembled, making installation similar to a fixed propeller.

Just slide it onto the shaft, tighten the nut, mount the anode and the propeller is ready to go. As with all Max-Props the pitch on Easy and Whisper models is adjustable in 2 degree increments, providing the ability to fine tune the loading of the engine. Moreover, pitch adjustment can be done in the water as the propeller does not need to be disassembled to change the pitch.

Available models type: Easy 78, 85, 90, 101 and 111.
Diameter from Ø 12" up to Ø 24", and for shaft diameters Ø 22 to Ø 40 mm.
The Easy type is also available for saildrive installations (incl. Yanmar).

Type Max Prop Whisper 5-blade

The Max-Prop Whisper uses five blades to provide ultra impressive thrust and quiet operation. The resulting powering performance is especially noticeable when powering against heavy wind and seas. The five blade design also provides for a substantial vibration and noise reduction in all conditions.

Available models type: Whisper 101, 111, 120, 129, 144, 161, 190 and 220.

Available propeller diameters from Ø 16" up to Ø 47" and for shaft diameters from Ø 35 to Ø 100 mm.

Please do not hesitate to contact our specialists for advice to choosing the right propeller..

Propeller extractor

To remove a propeller from a shaft, a propeller extractor can be used. The propeller extractor consists of a slot (back plate), nuts, studs, a front plate, an extractor bolt and several adaptor plates to center the slot with the shaft.

Number of blades	Shaft diameter (mm)	Item no.
3 - 4	25 t/m 50	9525500
3 - 4 - 5	55 t/m 90	9655900

Flexofold propellers reduce the resistance while sailing, giving the boat more speed. The folding propeller unfolds automatically when the shaft starts revolving, as a result of centrifugal force. All blades, which open in synchronisation, are intercepted by strong polyurethane shock absorbers. During sailing, when the engine is not running, the blades close as a result of the water pressure. This results in a propeller that gives as little resistance as possible.

Why Flexofold?

Flexofold propellers are made of NiBrAl (for strength and corrosion resistance) and 82% of copper (for anti-fouling). The propeller hub features the unique patented double spiral corrugation, which ensures that the blades will fold and unfold smoothly and that they have the best balance. This, combined with the small amount of parts, results in a long life span and very little wear.

Flexofold propellers are available in 2 and 3 blades.

Specifications of standard Flexofold propellers:

Standard bore	Taper	Keyway	Propeller nut
25 x 19 x 60 mm	1 : 10	6 x 3 mm	M16 x 1,5
30 x 22 x 80 mm	1 : 10	8 x 4 mm	M20 x 1,5

Dimensions as per Euro-standards ISO/DIN 4566. Tolerances ISO 484/2, class 2 standard.

Especially for 3-blade Flexofold propellers hub caps made of zinc are available for electrolytic protection (are supplied with your order). Flexofold propellers come complete with tools, loctite and manuals. Flexofold propellers can be used on your shaft or saildrive without modifications.

Flexofold type FP-2B and FP-3B

The two-blade Flexofold is available in diameters from 12" up to 18". The threeblade propeller is available in diameters from 14" up to 21".

A zinc propeller hub cap is available on request for the three-blade Flexofold propellers. Non-standard pitches for a surcharge

Non-standard pitches for a surcharge. Available in 2- or 3 blade standard and saildrive.

Diameter	Pitch
12 - 305 inch - mm - only RH	7" up to 10" inch

Exalto offers a complete range of standard propeller shafts in various designs. Metric sizes of all models can be supplied in steel C45 or in stainless steel 1.4462. Imperial sizes of all models can be fabricated in stainless steel 316 up to Ø 1¼" and Duplex 1,4462 from Ø 1½".

Exalto propeller shafts are fully in-house designed and fabricated to a h9 tolerance and straightened to a tolerance of 0.05 mm/m. We can also produce shafts according to a customer-supplied example or drawing. We can produce shafts from Ø 25 mm up to Ø 300 mm and with a maximum length of 11.5 meters. Of course we can also supply with approval of various classification societies, e.g. LR, BV, ABS, DNV, GL, et cetera.

Please contact our Sales department Propulsion for delivery times and prices.

Exalto Shaft type 23 from stock

Stainless steel 1.4462

Exalto offers a complete range of propeller shafts directly from stock. The shafts are made of stainless steel 1.4462 with a h9-tolerance and a taper of 1:10. The shafts have a straightness of 0.05 mm/m. These shafts from stock come complete with matching stainless steel 316 key. A propeller nut is **not included** with the shafts stated in the table below, you will need to order these separately. On these shafts, you can either use a Hollex brass propeller nut or an TOR propeller nut with zinc anode.

All dimensions in mm.

Stripper Saildrive rope cutter

The saildrive stripper is designed for installation on a saildrive. The stripper is mounted at the propeller shaft. By folding and feathering propellers a slight adjustment is sometimes needed to install the stripper. If you have any questions about the performance of the saildrive stripper, do not hesitate to contact our sales team.

Available for Volvo, Yanmar and Bukh.

Model	Shaft diameter	ØF	No. of blades	Item no.
AM10	28 mm	120 mm	2	2102028
AM10	28 mm	120 mm	3	2103028

Stripper Shaft mounted rope cutter

The stripper protects your propeller. It keeps your propeller clear of rubbish by shredding it into harmless fragments. The stripper is an assembly of rotating cutting blades that interlock around the shaft in front of the propeller. A fixed blade runs in bearing integral with the rotating cutter resulting in a shearing action as the blades pass each other.

The patented shape of the blades puts real strength at the base where it's needed. The needle sharp teeth extend in an elegant outward curve to the very tips of the blade. This results in a cutting action that is smoothest possible. Even a low powered engine can cut through large ropes easily.

Stripper 2-blades: suitable for 2- or 4-blade propellers

Stripper 3-blades: suitable for 3- or 5-blade propellers

Stripper 4-blades: suitable for 4-blade propellers

All dimensions in mm. Attention: the rope cutters are also available in imperial sizes (inches).

Please ask our sales department if you prefer to order in inches.

Customized brackets

Besides the standard brackets, Exalto is able to produce customized brackets and bracket hubs. Our brackets are fully in-house designed and produced. This way we offer you maximum flexibility.

We can supply you with P-, Y-, I- or V-brackets, or any other shape you need. We can produce Exalto brackets in steel, stainless steel or aluminum.

Further details on our customized brackets, please contact our Sales Department Propulsion.

Exalto is a well-experienced producer of stern tubes. Through the years, we have proved to be a reliable and innovative supplier to both the yachting and the professional industry. Exalto propulsion systems are fully in-house designed and produced. Our wide range of stern tubes consist of both standard and customized models.

Depending on the chosen lubrication method, we can supply water, grease or oil lubricated stern tubes, either open or closed. Depending on the hull material or its construction method, we can provide stern tubes to be welded in place, fixed between bulkheads by clamp nuts or to be laminated in place. Also, for vessels that are produced to the standards of all well-established classification societies (e.g. Lloyds, BV, DNV and ABS), we can produce stern tubes with the casting procedure or by boring.

Exalto stern tubes are made of only the best quality materials (steel, stainless steel, brass, GRP and aluminum), to ensure the stern tubes meet our high quality standards. Because we design our own products, we are able to anticipate on the following aspects:

- Propeller calculation
- Shaft inclination
- Desired lubricant: water, grease or oil
- Hull material and desired mounting system
- Calculation of shaft diameter and taper size
- Shaft sealing
- Coupling

Bearing distance

The correct positioning of the bearings in the stern tube will diminish vibrations, noise and wear within the system. Correct bearing distances not only bring more comfort, it helps to ensure the reliability of your complete propulsion system! That is why the bearing distances are always the starting point when designing your propulsion system. However, if theory and practice do not match, we will always contact you.

An example

We will calculate the bearing distances of the installation as shown below. We will call the minimum bearing distance X, the maximum is called Y. The bearing distances as drawn here (distance fore and aft bearing and fore bearing and thrust bearing) will lay between X and Y. The installation will therefore meet the requirements.

Application form

Of course we would be very pleased to receive your ordering details. To make quoting easier, you can download an application form on our website www.exalto.com. Please contact our sales department Propulsion if you need further details.

Exalto Clamping System

This is a system that uses the inner and outer tube idea. The outer tube is a steel tube which can be welded into the ship's casco. Later on, the inner GRP tube can be slipped into the outer tube and fixed by means of the clamping system.

The inner tube features an aft and a middle and/or fore bearing. The inner tube's front is ready for the STB Evo seal. This seal will ensure the system is water tight. The system as a whole is easily and quickly to instal.

Other advantages are:

- Less noise and vibrations
- The shaft is corrosion protected
- Easy installation makes for little installation costs
- Easy replacement of bearings due to detachable inner tube

Shaft diameter	Outer tube Ø x d
25 mm	82,5 mm x 6,3 mm
30 mm	82,5 mm x 6,3 mm
35 mm	101,6 mm x 6,3 mm
40 mm	101,6mm x 6,3 mm
45 mm	127 mm x 7,1 mm
50 mm	127 mm x 7,1 mm

Exalto Sterntubes to be welded in

Sterntube for water lubricated system. This conventional sterntube is made of St 52.3 steel, stainless steel or aluminum and welded into the hull. In order to prevent the bearings from being damaged by the welding heat, the tube is equipped with double walled welding ends. The weldable sterntube is available in two models::

- model 02 (undivided) supplied with an aft bearing and (depending on the bearing distance) a fore bearing.
- model 22 (divided) supplied with both an aft and a middle bearing and (depending on the bearing distance) a fore bearing.

On the outside, the weldable sterntube is coated with a primer. The front end will be machined to fit the shaft sealing of your choice. The possible seals for this type of sterntube are the Hollex seal, Tides Marine or the Sure seal.

The Exalto weldable sterntube is available in steel for shaft diameters from 25 up to 70 mm. Larger diameters and prices for tubes made of aluminum are available on request.

The dimensions of the sterntube depend on the outer diameter of the bearings used.

All dimensions in mm.

Model 75 / 78

Exalto Sterntubes with clamping fix

Sterntube for water lubricated system. This brass RG7 sterntube is the optimal solution for ships made from GRP, wood, woodcore or with a sandwich construction. The tube is mounted by means of two brass sterntube nuts, which encloses the tube. This sterntube is available in two models:

- model 75 (undivided) supplied with an aft bearing and (depending on the bearing distance) a fore bearing.
- model 78 (divided) supplied with both an aft and a middle bearing and (depending on the bearing distance) a fore bearing.

The front end of the brass sterntube is machined to fit the shaft sealing of your choice. The possible seals for this type of sterntube are the Hollex seal or the Sure seal.

Shaft diameter	M	L	K	U	T

120 mm	M170 x 3	45 mm	172 mm	110 mm	120 mm

Exalto Fast-Fix

The Exalto Fast-Fix offers you the ultimate installation convenience and flexibility and is suitable for traditional waterlubricated systems. The Exalto Fast-Fix system consists of a seawater resistant brass tube, a shell-less rubber bearing, two Fast-Fix clamp flanges, a Tides Marine Series One Seal, an Exalto 4462 stainless steel propeller shaft and TOR prop nut with zinc anode.

The advantages of this clamping tube system at a glance:

- The brass stern tube and the stainless steel 4462 tube shaft can be shortened at the front, in this way you can easily tailor the tube yourself.
- The narrow flanges were specifically designed for this system and can be built in almost everywhere.
- The bundled Series One seal does not only seal perfectly but the silicone bellow also does not age. The seal has two years warranty (or 1500 hours).

Optional for this system is a forward bearing or bronze rubber bearing, a Centa M flexible coupling and a variety of suitable propellers.

Shaft diameter	Length tube	Length shaft	Item no.
25 mm	1000 mm	1500 mm	FASTFIX25/1000.STD
25mm	1250 mm	2000 mm	FASTFIX25/1250.STD

30 mm	1500 mm	2000 mm	FASTFIX30/1500.STD

Exalto Fast-Fix E-Propulsion

The revolutionary Fast-Fix system is also suitable for electric propulsion. The Exalto Fast-Fix offers ultimate installation convenience and flexibility. The Exalto Fast-Fix propulsion system consists of a seawater resistant brass tube, a composite bearing, two FastFix clamp flanges, a Tides Marine Series One seal, an Exalto 4462 stainless steel propeller shaft and an TOR prop nut with zinc anode.

The advantages of this clamping tube system at a glance:

- The brass stern tube and the stainless steel 4462 tube shaft can be shortened at the front, in this way you can easily tailor the tube yourself.
- The narrow flanges were specifically designed for this system and can be built in almost everywhere.
- The bundled Series One seal does not only close perfectly but the silicone bellow also does not age. The seal has two years warranty (or 1500 hours).

Optional for this system is a forward bearing or bronze rubber bearing, a Centa M flexible coupling and a variety of suitable propellers.

30 mm	1500 mm	2000 mm	FASTFIX30/1500.EP

Model 61

Exalto Sterntubes to be laminated in

Sterntube for water lubricated system. Exalto's GRP sterntube is ideal to directly laminate into GRP vessels. This sterntube is available in model 61.1 with one aft bearing and in model 61.2 with both an aft and a fore bearing. GRP tubes are internally machined at the position of the bearings. The rubber bearings are held in place with 3 locking screws. The front end of the tube is machined to fit the shaft sealing of your choice. The possible seals for this type of sterntube are the Hollex seal or the Sure seal. In some situations a STB seal can be fitted on request.

Shaft diameter	L	C	K	E
25 mm	25 mm	15 mm	50 mm	6 mm
30 mm	30 mm	15 mm	55 mm	8 mm
35 mm	30 mm	15 mm	60 mm	8 mm
40 mm	35 mm	15 mm	65 mm	8 mm
45 mm	35 mm	15 mm	75 mm	8 mm

Exalto Sterntubes to be welded in

Sterntube for grease lubricated system. This conventional sterntube is made of St 52.3 steel and welded into the hull. In order to prevent the bearings from being damaged by the welding heat, the tube is equipped with double walled welding ends. The weldable sterntube is available in two models:

- model 02 (undivided) supplied with an aft grease lubricated brass bearing and (depending on the bearing distance) a fore bearing.
- model 22 (divided) supplied with both an aft and a middle bearing and (depending on the bearing distance) a fore bearing.

On the inside, the weldable sterntube is sand blasted. The outside is coated with a primer. The front end will be machined to fit the shaft sealing of your choice. Standard seal for this type of sterntube is the greasereflex seal. The Exalto sterntube is available in steel for shaft diameters from 25 up to 70 mm. Larger diameters are available on request.

The dimensions of the sterntube depend on the outer diameter of the bearings used.
All dimensions in mm..

Exalto Sterntubes with clamping fix

Model 41

Sterntube for grease lubricated system. Model 41 is a steel sterntube that is threaded on both ends, to fit grease lubricated glands. The tube is mounted and closed in by the clamping flanges of the glands. The inner gland is equipped with a grease nipple. The inside of the tube is sand blasted and the outside is coated with a primer. The clampable sterntube is available for shaft diameters of 25, 30, 35, 40, 45 and 50 mm. On request, this tube is also available with 2V and BV Heavy Duty glands..

Exalto Sterntubes to be welded in

Sterntube for oil lubricated system. This conventional sterntube is made of St 52.3 steel, stainless steel or aluminum and welded into the hull. In order to prevent the bearings from being damaged by the welding heat, the tube is equipped with double walled welding ends. The weldable sterntube is available in two models:

- model 02 (undivided) supplied with an aft oil lubricated brass bearing and (depending on the bearing distance) a fore bearing.
- model 22 (divided) supplied with both an aft and a middle bearing and -depending on the bearing distance- a fore bearing.

On the inside the sterntube is sand blasted. On the outside it is coated with a primer. The front end will be machined to fit the shaft sealing of your choice. The possible seals for this type of sterntube are the Exalto seal housings types SA, SV, SB and SC.

The Exalto weldable sterntube is available in steel in shaft diameters of 25 up to 70 mm. Larger diameters and prices on aluminum and stainless steel are available on request.

The dimensions of the sterntube depend on the outer diameter of the bearings used. All dimensions in mm.

Exalto water lubricated rubber lined bearings

These rubber lined bearings are especially designed for water lubricated sterntubes and rudder stocks. The nitrile rubber bearing material gives the bearing a high resistance to abrasion and wear whilst providing effective noise and vibration insulation.

The rubber lined bearing's outer shell is manufactured from either corrosion resistant naval brass or non-metallic material. The non-metallic shell has the advantage of being lighter and it prevents electrolytic corrosion.

Non-standard sizes and flange bearings are available on request.

Exalto All rubber flanged bearings

If you have very limited space for a (replacement) bearing, bearings without an outer shell will certainly do the trick. These bearings are also very handy when replacing bearings in the propeller brackets of various well known brands of sailing vessels (Jeanneau, Beneteau, etc). They come complete with two nylon mounting screws. As with any of our own made bearings, we can supply them in any size and to your personal needs. The table shows our standard range of all rubber bearings, but please do not hesitate to let us know your special needs.

Water lubricated

Hollex seals

The Hollex seal is used with water lubricated sterngear installations. It works according to a different principle than conventional seals. The Hollex seal seals axially, that is to say along the length. A sliding ring made of high quality stainless steel is mounted onto the shaft. It rotates with its smoothly polished surface against a carbon counter sliding ring. This counter sliding ring is mounted in a rubber bellow, fixed to the stern tube. Due to the relatively small sealing areas only minimal radial movement is allowed, especially with the smallest diameters. Therefore the Hollex seal must always be installed as close to the fore bearings as possible. With its low frictional resistance, the life span of the Hollex Seal is much longer than that of a conventional seal. There will be no grooves in the shaft due to the wearing of the packing or the lip seal. Please note that the axial (forward) movement of the engine (caused by the propeller thrust on the shock absorbers) must be added to the initial tension. If necessary, the seals dimensions can be customized (see dimensions D and S in the drawing).

Shaft diameter	D	L	S	Item no.

Tides Marine SeriesOne seals

The SeriesOne seal by Tides Marine is applicable for water lubricated sterngear systems. This seal housing is made of high quality composite material, that will not absorb water and handles temperature changes well. A water inlet is fitted as a standard on the SeriesOne. The seals should be lubricated by the engine's cooling water. The high flexible bellow will follow any shaft movement. The actual sealing is done by one lip seal. The SeriesOne is available for shaft diameters of 25 and 30 mm.

The SeriesOne seal is also available in inch dimensions with short delivery times.

Tides Marine SureSeal

The Tides Marine SureSeals are suitable for water lubricated sterngear installations. This seal housing is made of high quality composite material, that is very durable and will not absorb water. The material handles temperature changes well. The SureSeals have high flexible bellows and come with a water inlet fitted as a standard. The seal should be lubricated by the engine's cooling water. The main advantage of the SureSeal is the easy installation. Installed at the same time as the SureSeal, special Carrier kits can be slipped onto the shaft. These units allow lip seal replacement to be performed without uncoupling the shaft from the transmission. And, if necessary, this replacement can be done while the vessel is in the water (a haul-out may not be necessary). See "Sure Seal spare kits" further on in this chapter. SureSeals are ABS and Lloyd's approved.

For larger diameters or imperial sizes, please contact our Sales department Propulsion.

Attention: The SureSeal is available for both single and twin engine installations. All SureSeals mentioned in the table below are suitable for single engine installations. Many more shaft/sterntube diameter combinations available.

Price and delivery time for SureSeals in inch-sizes and for twin engine application on request.

Shaft diameter	Tube diameter	L	S	Item no.
35 mm	60 mm	198,6 mm	50,8 mm	FSKM35M60M0

Tides Marine SureSeal spare seals

The Spare Seal Carrier Kit is developed as a convenient way to protect and store spare lipseals on the propeller shaft. Fitted at the time of original installation, the kit allows the quick and easy replacement of a worn lip seal without the need to lift the boat from the water and without detaching the shaft from the coupling. Replacement lip seals without the Carrier can also be supplied.

Shaft diameter	Shaft diam.	Version	Nr. of seals per set	Item no.	Version	Item no.
35 mm	1 3/8 Inch	With carrier	1	KFM35MM00	Lipseal only	LSF1375

Tides Marine Water Pick-Up Kits

Tides Marine Water Pick-Up Kits include everything needed for connecting Tides Marine SureSeals to pressurized water for proper lubrication of the lip seal by means of a flexible cooling hose. A kit includes 2.4 metres hose, two stainless steel hose clamps and a tee fitting. The tee fittings are custom designed to fit a wide range of hose sizes.

Please make sure you order the extra set with cross-over hose and clamps in case of a twin engine application (cat. no. INJHOSE0375)! Original seal for SureSeals.

Set consists of T-piece (to be placed in the cooling water system of the engine), a 2.4 meter hose and 2 hose clamps.

Shaft diameter	Description	Inner diam.	Item no.
35 - 75 mm	Water pick-up kit	16 mm	TK0625-3/8-218

	Cross-over hose for twin SureSeal		INJHOSE0375

Tides Marine Alarmsystem

This Smart Alarm System protects the SureSeal against overheating when running dry. It turns on when the water temperature in the SureSeal rises, due to a lack of water supply. The water temperature is measured by means of a sensor constantly. Via an electric module the warning light on the control starts burning when the temperature is too high. Optionally you can also install an acoustic alarm. The alarm system is suitable for new installed SureSeals as well as in existing Tides Marine installations. The alarm system contains an electronic module, a control panel with warning light and a sensor unit.

Description	Voltage	Item no.
Tides Marine alarmsystem single engine	12/24 V	SP-SS-1
Tides Marine alarmsystem twin engine	12/24 V	SP-SS-2
Tides Marine acoustic alarm	12/24 V	SP-SS-SIREN

STB Seal with waterinlet

This seal is used in water lubricated sterngear installations and has it's own waterinlet. This seal also has a grease supply tip to lubricate the lipseal. The seal consists of a flexible rubber socket and a hose clamp. Including a tube of "stuffy grease" and a water inlet.

Shaft diameter	Shaft diam.	Tube diameter	Length	C	Item no.

Rameh shaft packing rings for stuffing box

Rameh shaft packing cut to size for stuffing boxes. The ultimate solution for sealing. The packing is manufactured from 100% pure Rameh fibres. Characteristics of this material: does not decay, remains elastic, does not grow hard, little loss of volume, low friction and highly durable. The maximum allowable temperature is $\pm 200^{\circ}\text{C}$.

Description	A	Shaft diameter	Item no.
Rameh shaft packing ring 8 mm	8 mm	25 mm	66430025

Packing removers

For easy removal of Rameh packings from stuffing boxes.

Description	Suitable for	Item no.
Hollex packing remover for 6/8 mm packing	6 / 8 mm	66548
Hollex packing remover for 10/11/12,5 mm packing	10 / 11 / 12,5 mm	66552
Hollex packing remover for 14/16/19 mm packing	14 / 16 / 19 mm	66553
Hollex packing remover for 22/25 mm packing	22 / 25 mm	66554

Grease lubricated

Exalto Grease Flexseal

The Exalto greaseflexseals can be used with grease lubricated sterngear. The housing is made of high grade composite. Due to the rubber bellow, greaseflexseals are easy to mount directly to the sterntube. The seal needs to be installed near the shaft bearing.

Attention: the supply of grease should be realised on the sterntube, for the seal doesn't have its own supply.

Shaft diameter	Tube diameter	S	L	Item no.

Carco Seals

Carco lip seals are applied in almost every sterntube system, regardless of the lubrication. Lip seals are only applicable with housing, because lip seals are always mounted by means of axial confinement. Carco lip seals are treated with the brandname Carcoflon coating. This seals the gap perfectly, they are self-lubricating and have a very low friction coefficient. The radial tension is provided by the built-in stainless steel spring. Carco seals function best at temperatures between -40 ° and +120 ° Celsius. They may reach a maximum velocity of 15 m/s, peaking to 20 m/s.

Carco seals up to 70mm delivery from stock. Delivery time of larger sizes on request.

Shaft diameter	D	B	Item no.

120 mm	160 mm	16,0 mm	96120

Carco Seals Split

These carco seals are a "split" version. This simplifies maintenance, because the propeller shaft installation does not need to be dismantled. With this design the rubber at both ends is a little softer with a guarantee to a perfect closure of the lip seal. Carco lip seals are treated with the brandname Carcoflon coating. This seals the gap perfectly, they are self-lubricating and have a very low friction coefficient. The radial tension is provided by the built-in stainless steel spring. Carco seals function best at temperatures between -40 ° and +120 ° Celsius. They may reach a maximum velocity of 15 m/s, peaking to 20 m/s.

Delivery time of carco seals in split-version on request.

Exalto Seal housings SA and SV

Exalto seal housings are used with oil and grease lubricated sterngear installations. They are available in two versions. Type SA and SV are in direct contact with the shaft. The SA is mounted at the propellerside of the shaft. The SV is mounted at the engineside of the shaft. The seal housings are to be mounted rigidly to the sterntube. The housings have JW seals inside, which can absorb little radial movement. To allow the seal housing to perform at its best, an additional support bearing should be fitted in the sterntube (close to the shaft seal). When fitting the seal housing, the support bearing in the sterntube should be in line with the seal housing. When ordering, please specify the method of lubrication.

Exalto Seal housings SB and SC

Exalto seal housings are used with oil and grease lubricated sterngear installations. They are available in two versions. Types SB and SC and used together with a sleeve. There is no direct contact with (and wear of) the shaft. The SB is mounted at the propellerside of the shaft. The seal housings are to be mounted rigidly to the sterntube. The housings have JW seals inside, which can absorb little radial movement. To allow the seal housing to perform at its best, an additional support bearing should be fitted in the sterntube (close to the shaft seal). When fitting the seal housing, the support bearing in the sterntube should be in line with the seal housing. When ordering, please specify the method of lubrication.

Mounting diagram Exalto seal housings

For oil lubricated sterngear

Exalto offers two types of plummer block roller bearings:

- Type ST: with tapered withdrawal sleeve, which is mount on an encased shaft.
- Type SR: with conical clamp-on, which is mounted directly on the shaft.

The double row roller bearing can transmit the thrust directly to the ship, so the gearbox and engine will be spared. The bearing should be filled with oil up to 1/3 of bottom roller height. Up to shaft size 100 mm available, price on request.

Exalto Thrust bearings

The double row roller bearing with spherical roller thrust bearing is the best combination for thrust bearings. Due to the thrust bearing the thrust is transmitted to the vessel's construction and the motor installation is spared.

Exalto supplies the following housing constructions:

- Seperate, for mounting on the fundation, with a mounting base at the bottom or side of the bearing house.
- Seperate, for mounting with a flange to the engine room bulkhead.
- As one part with the sterntube shafts, for mounting with a flange to the engine room bulkhead. The lubrication of the shaft bearing is unimportant in this construction. The thrust bearings are available from shaftsØ 60 mm.

Prices and sizes on request.

Type FLM

These clamp-on coupling flanges are manufactured in C45 steel and galvanically coated. The clamp-on couplings are completely machined and can be supplied in the dimensions mentioned in the table below. The R indicated in the table represents the number of bolt holes in the flange. Clamp couplings for shaft \varnothing 25 and 30 mm have a std. 4" fitting. The \varnothing 35 and 40 mm version have a 5" fitting.

Exalto Clamp-on couplings

Exalto clamp-on couplings are available in unmachined version or with completely machined flange. The flanges can be machined to suit the gearbox flange, Aquadrive thrust bearings (both input and output shaft) and all known gearboxes. You have to order the machining separately. The installation dimensions of the machined flanges are slightly shorter than the unmachined length.

All dimensions in mm.

Other shaft diameters on request.

Exalto Spacers

Custom made Spacers

Sometimes it's not possible to fit a (e.g. Centa) coupling directly on the gear box flange. In that case you need a spacer. Exalto can offer and make a fitting solution.

Please contact us for possibilities and pricing.

Centa couplings

Centa offers the perfect, innovative marine transmission. It is a combination of well-proven designs with unique features – freedom in alignment and installation, together with damping of noise and vibration within the transmission. Centaflex couplings have one or more centaflex rubber elements. The rubber elements interrupt structure borne noises and dampen noise and vibrations for the highest level of comfort in the boat.

Common features of Centaflex couplings

- Centa offers a broad range of rating and sizes.
- Short, lightweight design.
- Integrated prop shaft clamping device which can easily be adapted by intermediate bushes for an extensive range of propeller shaft diameters.
- Patented design.
- The thrust bearings have a spherical outer ring, which means they will always align themselves perfectly to the prop shaft for optimum bearing lifetime.

Selection method

In the tables shown at each type of coupling, you will find four versions to choose from. To ease the selection of the right coupling, let us explain the specifics of each version.

Leisure craft (PL)

Engine hours	: up to 500 hours/year, max. 10% of time with full power.
Usage	: highly intermittent operation, varying speed and power.
Typical applications	: planing hull, private use, sailing boats, and motor boats.
Not suitable for	: charter or long range.

Light duty (LD)

Engine hours	: up to 2000 hours/year, max. 15% of time with full power.
Usage	: varying speed and power
Typical applications	: planing and semi-displacement hulls, charter sport / leisure activities, patrol boats, long range private boats.

Medium duty (MD)

Engine hours	: up to 3000 hours/year, max. 50% of time with full power.
Usage	: some variations in speed and power.
Typical applications	: semi- and full displacement hulls, charter and commercial craft, ferries, fishing boats, crew boats, naval and police boats.

Continuous duty (CD)

For more demanding or continuous duty please consult the experts of Exalto.

Calculating the nominal torque: $M(\text{Nm}) = 9550 \times P \times R/n$

M = Nominal torque
P = Engine rating in kW (1 hp = 0.735 kW)
R = Gearbox ratio
n = engine rpm

The range of small Centaflex couplings consists of types M, AM, AGM and ACV.

Centa Type M

Highly flexible coupling for the connection of gear and propeller shaft. For applications with limited mounting space. Backlash-free transmission of torque and propeller thrust via highly flexible rubber element. Specially designed to reduce noise and vibrations under confined space requirements. Dampens torsional vibrations and shocks, interrupts structure-borne noise and compensates axial, radial and angular misalignments. Additionally offers a high degree of electrical insulation.

Mounted with minimum effort by means of a clamping hub. Delivered with fail-safe device and ready to install. Further handling, maintenance and cost benefits by omitting additional components, such as spacers.

Centaflex Adapter flange

These handy adapter flanges come with 4 allen bolt M10 for mounting on the Centa coupling.

Model / type	Description	Item no.
M127	Flange kit PCD M10 x 100 (4xM8, spigot 65 mm)	94701F.2.3
M127	Flange kit PCD M10 x 80 (4xM8, spigot 65 mm)	94701F.3.2

Centa Type AM

The AM coupling is a highly flexible coupling especially designed for yachts and workboats. The couplings have a fail-safe device, which ensures that power can continue to be transmitted even if the rubber fails. The coupling comes with a thrust element that allows the coupling to transmit the propeller thrust. If a thrust bearing is placed on the shaft, this thrust element has to be removed. Mounting on the gearbox
The AM coupling is machined to fit the gearbox flange. It is therefore important that the exact make and type of the gearbox is given. For some gearboxes, the diameter of the rubber element (ØR) exceeds the available space. A distance piece (spacer) must then be placed between the coupling and the gearbox flange. This spacer is not included, but can be ordered separately. All dimensions in mm.

Max. angle : 2°

Centa Type AGM

The AGM coupling is a highly flexible coupling combined with a thrust bearing. It is a combination of well-proven design with unique features – freedom in alignment and installation, together with dampening of noise and vibration within the transmission. The thrust free mounting of the engine on very soft mounts, together with the flexibility and the high dampening of the transmission, provides the lowest possible level of noise and vibration in the drive train, lower than any other system. Mounting on the gearbox

The AGM coupling is machined to fit the gearbox flange. Therefore it is important that the exact make and type of the gearbox is given. For some gearboxes, the diameter of the rubber element ($\varnothing R$) exceeds the available space. A distance piece (spacer) must than be placed between the coupling and the gearbox flange. This spacer is not included but can be ordered separately.

Centa Type ACV

The ACV is a combination with a CV (constant velocity or homokinetic) joint on one side and a flexible coupling on the other side. Just like the AGM the ACV also incorporates a thrust bearing. The combination of the CV joint with the flexible coupling gives the vibration and noise dampening features of a flexible coupling and the unsurpassed freedom of movement and large angle of a homokinetic shaft. It is ideal for larger angles, up to 8 degrees in the CV (b) plus up to 2 or 3 degrees in the rubber element (a).

Please take notice that a minimum angle has to be made, like in every other homokinetic coupling!

Mounting on the gearbox

The ACV comes complete with an adapter flange to suit the gearbox. Design and dimensions depend on the type of gearbox. It is therefore important that the exact make and type of the gearbox is given.

Model / type	Shaft diameter	L	ØR	O	S	U	PDC	ØG	Max. rpm	Max. Thrust	LD	Item no.
ACV08	20 - 35 mm	211 mm	90 mm	171,5 mm	48,5 mm	197 mm	145 mm	102 mm	4000	8 kN	123 Nm	94902

ACV600	50 - 165 mm								1400	120 kN	8462 Nm	94980

Alignment of engines is often a problem. First for the shipbuilder, later on for the owner. Each engine vibrates. Ships suffer from the vibrations, passed through the foundation to the hull. In addition, vibrations are very uncomfortable for the crew.

Aquadrive couplings ensure that the motor is not affected by the propeller and it has its own freedom of movement. Furthermore, the alignment of the engine is relatively easy to perform.

Aquadrive couplings consist of a CV joint, a thrust bearing and an adapter flange. The CV joint consists of two universal joints connected by a floating axle, which allows axial and radial movements. The thrust bearing transfers the thrust of the propeller through a rubber suspension on the foundation of the craft instead of the gearbox.

The Aquadrive Moduline is modular, allowing the overall length to be reduced to 70% and the weight to 75%. The Moduline consists of a thrust bearing being connected to the shaft by a sleeve set. The joint is attached to the thrust bearing with an adapter at one side and connected to the gearbox on the other side with an adapter flange. There is a gearbox adapter available for all existing gearboxes. Aquadrive Moduline couplings are available for power between 5 and 235 hp.

The descriptions in this catalog are provided as a guide. Based on data of your boat and motor Exalto can provide the most suitable Aquadrive coupling.

The Python-drive is a complete drive system for yachts, pinnaces, barges, et cetera. With a Python-drive installed you will eliminate the need for alignment of propeller shaft and gearbox/engine. Axial movement caused by the propellers' thrust are eliminated and the thrust is passed onto the hull by means of the special suspension of the trust unit. The maintenance-free cv shaft forms the heart of every Python-drive.

The heavily built thrust bearing unit is also maintenance-free. The thrust bearing unit is mounted by means of a clamping sleeve. This sleeve centres the propeller shaft where it should be centred; right after the cv shaft of the Python-drive. The cv shaft ensures a constant rpm of the propeller shaft, even at uneven angles, which decreases the wear of rotating parts in the propulsion system.

Another big advantage is the very limited built-in length the Python-drive needs. The unit is supplied complete with all needed mounting gear, such as an adapte adapter flange for most common gearbox types, a cv shaft, a robust thrust bearing unit and all bolts, (locking) nuts, and rubbers to take the thrust. For 19 mm up to 100 mm (and imperial sizes), complete units are available. Conical shaft sleeves are also an option. CV shafts for torques up to 1.500 Kgm (14.7 kNm) as well as longer or custom-made shafts are also available on request. Thrust bearing units can be supplied as separate units to be mounted on any position on the propeller shaft.

Python-Drive couplings

Python-Drive P30-R

The Python-drive is supplied with a built-in length of 145 mm as a standard. Without a surcharge we can also offer built-in lengths of 165 or 195 mm. Please state the desired built-in length when you order your P30-R.

Diameter head CV joint : 100 mm
 PDC : 86 mm
 Max. torque : 294 Nm
 Max. Thrust : 4,3 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P30-R	19 - 30 mm		P30-R
Python CV joint P30 L=145 mm		145 mm	P30.145
Python CV joint P30 L=165 mm		165 mm	P30.165
Python CV joint P30 L=195 mm		195 mm	P30.195

Python-Drive P60-B

The Python-drive is supplied with a built-in length of 145 mm as a standard. Without a surcharge we can also offer built-in lengths of 165 or 195 mm. Please state the desired built-in length when you order your P60-B.

Diameter head CV joint : 100 mm
 PDC : 86 mm
 Max. torque : 588 Nm
 Max. Thrust : 5,7 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P60-B	1,1/4" - 40 mm		P60-B
Python CV joint shaft P60 L=145 mm		145 mm	P60.145
Python CV joint shaft P60 L=165 mm		165 mm	P60.165
Python CV joint shaft P60 L=195 mm		195 mm	P60.195

Python-Drive P60-K

The Python-drive is supplied with a built-in length of 165 mm as a standard. Without a surcharge we can also offer built-in lengths of 145 or 195 mm. Please state the desired built-in length when you order your P60-K.

Diameter head CV joint : 100 mm
 PDC : 86 mm
 Max. torque : 588 Nm
 Max. Thrust : 5,7 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P60-K	30 - 40 mm		P60-K
Python CV joint shaft P60 L=145 mm		145 mm	P60.145
Python CV joint shaft P60 L=165 mm		165 mm	P60.165
Python CV joint shaft P60 L=195 mm		195 mm	P60.195

Python-Drive P80-M

The Python-drive is supplied with a built-in length of 195 mm as a standard. Without a surcharge we can also offer built-in lengths of 145 or 165 mm. Please state the desired built-in length when you order your P80-M.

Diameter head CV joint : 100 mm
 PDC : 86 mm
 Max. torque : 785 Nm
 Max. Thrust : 8 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P80-M	30 - 45 mm		P80-M
Python CV joint shaft P80 L=145 mm		145 mm	P80.145
Python CV joint shaft P80 L=165 mm		165 mm	P80.165
Python CV joint shaft P80 L=195 mm		195 mm	P80.195

Python-Drive P80-S

The Python-drive is supplied with a built-in length of 195 mm as a standard. Without a surcharge we can also offer built-in lengths of 145 or 165 mm. Please state the desired built-in length when you order your P80-S.

Diameter head CV joint : 100 mm
 PDC : 86 mm
 Max. torque : 785 Nm
 Max. Thrust : 12 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P80-S	30 - 45 mm		P80-S
Python CV joint shaft P80 L=145 mm		145 mm	P80.145
Python CV joint shaft P80 L=165 mm		165 mm	P80.165
Python CV joint shaft P80 L=195 mm		195 mm	P80.195

Python-Drive P110-S

The Python-drive is supplied with a built-in length of 180 mm as a standard. Please state the desired built-in length when you order your P110-S.

Diameter head CV joint : 108 mm
 PDC : 94 mm
 Max. torque : 108 Nm
 Max. Thrust : 12 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P110-S	35 - 45 mm		P110-S
Python CV joint shaft P110 L=180 mm		180 mm	P110.180
Python CV joint shaft P110 L=225 mm		225 mm	P110.225

Python-Drive P110-T

The Python-drive is supplied with a built-in length of 180 mm as a standard. Please state the desired built-in length when you order your P110-T.

Diameter head CV joint : 108 mm
 PDC : 94 mm
 Max. torque : 1080 Nm
 Max. Thrust : 18 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P110-T	35 - 50 mm		P110-T
Python CV joint shaft P110 L=180 mm		180 mm	P110.180
Python CV joint shaft P110 L=225 mm		225 mm	P110.225

Python-Drive P140-T

The Python-drive is supplied with a built-in length of 180 mm as a standard. Without a surcharge we can also offer a built-in length of 225 mm. Please state the desired built-in length when you order your P140-T.

Diameter head CV joint : 122 mm
 PDC : 103,8 mm
 Max. torque : 1370 Nm
 Max. Thrust : 18 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P140-T	40 - 55 mm		P140-T
Python CV joint P140 L=180 mm		180 mm	P140.180
Python CV joint P140 L=225 mm		225 mm	P140.225

Python-Drive P200-T

The Python-drive P200-T is supplied with a built-in length of 255 mm as a standard.

Diameter head CV joint : 148 mm
 PDC : 128 mm
 Max. torque : 1960 Nm
 Max. Thrust : 18 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P200-T	40 - 60 mm		P200-T
Python CV joint shaft P200 L=255mm		255 mm	P200.255

Python-Drive P200-Q

The Python-drive P200-Q is supplied with a built-in length of 255 mm as a standard.

Diameter head CV joint : 148 mm
 PDC : 128 mm
 Max. torque : 1960 Nm
 Max. Thrust : 22 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P200-Q	45 - 60 mm		P200-Q
Python CV joint shaft P200 L=255mm		255 mm	P200.255

Python-Drive P200-W

The Python-drive P200-W is supplied with a built-in length of 255 mm as a standard.

Diameter head CV joint : 148 mm
PDC : 128 mm
Max. torque : 1960 Nm
Max. Thrust : 30 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P200-W	50 - 60 mm		P200-W
Python CV joint shaft P200 L=255mm		255 mm	P200.255

Python-Drive P501-Q

The Python-drive P501-Q is supplied with a built-in length of 221 mm as a standard.

Diameter head CV joint : 191,8 mm
PDC : 165 mm
Max. torque : 4900 Nm
Max. Thrust : 22 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P501-Q	55 - 60 mm		P501-Q
Python CV joint shaft P501 L=221mm		221 mm	P501.221

Python-Drive P501-W

The Python-drive P501-W is supplied with a built-in length of 221 mm as a standard. Without a surcharge we can also offer a built-in length of 260 mm. Please state the desired built-in length when you order your P501-W.

Diameter head CV joint : 191,8 mm
PDC : 165 mm
Max. torque : 4900 Nm
Max. Thrust : 30 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P501-W	60 - 80 mm		P501-W
Python CV joint shaft P501 L=221mm		221 mm	P501.221
Python CV joint shaft P501 L=260mm		260 mm	P501.260

Python-Drive P501-L

The Python-drive P501-L is supplied with a built-in length of 221 mm as a standard. Without a surcharge we can also offer a built-in length of 260 mm. Please state the desired built-in length when you order your P501-L.

Diameter head CV joint : 191,8 mm
PDC : 165 mm
Max. torque : 4900 Nm
Max. Thrust : 45 kN

Description	Shaft diameter	Working length	Item no.
Python complete thrust bearing P501-L	60 - 80 mm		P501-L
Python CV joint shaft P501 L=221mm		221 mm	P501.221
Python CV joint shaft P501 L=260mm		260 mm	P501.260

Mountingkits for Python-Drive couplings

The mounting kit is a complete set of nuts, bolts, washers and rubber elements to fix the thrust bearing to the thrust plate.

Python Mounting kit	PD-W	PD-W.MON

Why Exalto is your address for Parts:

- **Quality**

We import and distribute only the best top quality brands such as Jabsco, VDO, Rheinstrom, Recaro et cetera.

- **Know how**

Exalto stands for quality in every way. Although we are a wholesaler, we don't just pass on boxes. We think quality goes further than offering top quality brands. We strive to give you top quality advice and correct deliveries as well.

We team up with specialised suppliers, who stand out in quality, know how and reliability. On a regular basis, we initiate product trainings, where our sales team is brought up to date by our (international) suppliers. That is how we get to know all the ins and outs of our product range, so you'll know where to turn to with all your questions!

Our premises in Hardinxveld from which all orders are shipped

- **Substantial stock and fast delivery**

Although it's not very trendy to have a considerable amount of products in stock at the moment, we strongly believe in delivery from stock. Many products are available immediately and we strive to keep back orders to a minimum. Ordered goods can either be send to you, or you can pick them up at one of our warehouses.

- **Contemporary logistics**

Besides expanding our warehouse, we also invested heavily in automating our logistics. We have had a clever system developed that cooperates with our ERP system. We can immediately inform you whether products are in stock or when they are due.

Our subsidiary in Grou

- **Improvement**

Our product range is enormous. But if we spot room for improvement, we will jump right in. A good example is our range of water pressure systems. We have all the parts to build them from stock, but we have not yet seen the best price/quality ratio on the market yet. Therefore we started to assemble them ourselves, so we can guarantee you with 100% certainty that we offer you our best solution.

- **Service**

Even the best products can fail sometimes. Many products will then be tested and repaired by us. If we need to send it to the original supplier to have it fixed, we always send a detailed repair record along. This often results in quicker solutions.

“Our” brands

As said, we only sell top quality brands that meet our demands. To give you an idea of the brands we use:

and many more ...

TowForceOne

Towbar FUN-series

The TowForceOne Towbar FUN is a must have for wake, ski and tube. The TowForceOne towbar is available in four versions FUN050, FUN100, FUN250 and FUN350 which cover most outboards up to 350HP. The use of a towbar reduces the power needed to tow and has additional advantages:

- reduced fuel consumption when towing
- improved course stability
- easier handling and manoeuvrability when towing

The TowForceOne towbar is made out of strong stainless steel. Every TowForceOne towbar comes complete with pre-assembled mounting brackets, towbar, TowRoller and fasteners.

Note: some outboards may need the compact version. The TowForceOne selector (www.towforceone.com) will be your guideline.

Description	Version	Nett Weight	Item no.
Towbar universal up to 50hp		8,30 kg	FUN050
Towbar compact up to 50hp	Compact	8,20 kg	FUN050C
Towbar universal up to 100hp		9,30 kg	FUN100
Towbar compact up to 100hp	Compact	9,20 kg	FUN100C
Towbar universal up to 250hp		10,20 kg	FUN250
Towbar compact up to 250hp	Compact	10,10 kg	FUN250C
Towbar universal up to 350hp			FUN350

Towbar PRO-series

The TowForceOne Towbar PRO is a must have for towing. The TowForceOne towbar is available in three versions PRO050, PRO100 and PRO250 which cover most outboards up to 250HP.

The use of a towbar reduces the power needed to tow and has additional advantages:

- reduced fuel consumption when towing
- improved course stability
- easier handling and manoeuvrability when towing

The TowForceOne towbar is made out of strong duplex steel. Every TowForceOne towbar comes complete with pre-assembled mounting brackets, towbar, TowRoller and fasteners.

Note: some outboards may need the compact version. The TowForceOne selector (www.towforceone.com) will be your guideline.

Description	Version	Nett Weight	Item no.
Towbar universal up to 50hp		8,70 kg	PRO050
Towbar compact up to 50hp	Compact	8,60 kg	PRO050C
Towbar universal up to 100hp		9,80 kg	PRO100
Towbar compact up to 100hp	Compact	9,70 kg	PRO100C
Towbar universal up to 250hp		10,80 kg	PRO250
Towbar compact up to 250hp	Compact	10,70 kg	PRO250C

TowForceOne
TOWINGPOWER

**More Towingpower
More FUN**

- SAFE
- FUELSAVING
- PROTECTION
- COURSE STABILITY
- IMPROVED MANOEUVRABILITY

WAKE

Looking for a good time on the water or like to ride the edge and try to improve your performance ?
No matter what you're looking for the TowForceOne FUN towbar is a **musthave** whenever you like to wake, ski or tube.
The **TowForceOne PRO-series** is for tough-towing. Designed for professional use and for even **more towload** than the FUN-series (up to 500kgf).

SKI

A towbar ensures **increased comfort** for everyone in and behind the boat. Better feedback and more constant response leads to less fatigue.
TowForceOne will keep you going.

Towbars like TowForceOne are saving **fuel**. Boaters using towbars experience improved course stability and steer ability when towing.

TUBE

A towbar has some additional **benefits** like:

- keeping the towline away from the propeller.
- saving space, while the towline is outside the boat
- protection for your valuable out boardmotor.

Try it yourself and get the TowForceOne experience.

Max 1.9, 31295

Ideal for small to medium sized leisure crafts. Jabsco 1.9 drinking water pumps are three-chamber diaphragm pumps. They have a built-in pulsation dampening, which eliminates cycling and removes its noise and vibration. Therefore no separate accumulator tanks are necessary. Jabsco 1.9 drinking water pumps are very compact and easy to install. They are self-priming up to 1.8 meters and can run dry without damage. The engine is thermally protected and provided with a built-in pressure switch. It switches on under 20 psi, and off at 40 psi. Manufactured from corrosion resistant materials, the shaft e.g. is made of stainless steel 316.

Suction connection	: 1/2" inch	Suction lift	: 3 m
Intake connection	: 13 mm		
Discharge connection	: 1/2" inch		
Discharge connection	: 13 mm		

Model / type	Suitable for	Voltage	Current	Max. capacity	Nett Weight	L x W x H	Item no.
Max 1.9 - 31295		12 V	3,5 A	7 l/min	1,80 kg	230 x 110 x 120 mm	31295-0092
Max 1.9 - 31295		24 V	1,7 A	7 l/min	1,80 kg	230 x 110 x 120 mm	31295-0094
LA12 actuator	single application	12 V	4,6 A		0,75 kg		036001

Max 2.9, 31395

Ideal for small to medium sized leisure crafts. Jabsco 2.9 drinking water pumps are three-chamber diaphragm pumps. They have a built-in pulsation dampening, which eliminates cycling and removes its noise and vibration. Therefore no separate accumulator tanks are necessary. Jabsco 2.9 drinking water pumps are very compact and easy to install. They are self-priming up to 1.8 meters and can run dry without damage. The engine is thermally protected and provided with a built-in pressure switch. It switches on under 20 psi, and off at 40 psi. Manufactured from corrosion resistant materials, the shaft e.g. is made of stainless steel 316.

Max 3.5, 32600

This renewed Max 3 pump, model 32600, features the same three-chamber diaphragm pump head as the 1.9 and 2.9 pumps. The main difference is the more robust motor and therefore a higher capacity. The drinking water pump is self-priming up to 3 m and has 13 mm (1/2") "click-in" hose connections. Snap-fit ports simplify both installation and removal for routine service. The pump can be fitted at most locations and is easy to install. This pump has a built-in pressure switch, that switches on under 20 psi and off at 40 psi. The pump can run dry without damage.

Drinking water strainers

These compact pre filters prevent particles jamming valves and causing pump breakdowns. The filters have a screw off, transparent housing for easy inspection and quick, in place cleaning. The universal model makes it easier than ever to install the pump. The filters can be fitted directly into diaphragm pump inlet port and also benefit from a swivelled angled inlet port on a rotating body. So the inlet hose can approach from any direction!

Mini Puppy, 23620

Self-priming bilge- and deckwash pump and also for general use. This impeller pump may not run dry.

Suction lift : 1,5 m
Connections : 25 mm
L x W x H : 150 x 105 x 92 mm

Voltage	Current	Model / type	Max. capacity	Nett Weight	Item no.
12 V	5,0 A	Mini Puppy - 23620	6 l/min	2,20 kg	3383
24 V	2,5 A	Mini Puppy - 23620	6 l/min	2,20 kg	3384

Bilge- and deckwash pumps

Water Puppy 2000, 23680

Self-priming impeller pump. Good flow rate, for general purpose use. Do not run dry and do not use with a trigger nozzle.

Suction lift : 1,2 m
Connections : 13 mm
L x W x H : 181 x 121 x 89 mm

Voltage	Current	Model / type	Max. capacity	Nett Weight	Item no.
12 V	13 A	Water Puppy 2000 - 23680	35 l/min	3,60 kg	333301
24 V	6 A	Water Puppy 2000 - 23680	35 l/min	3,60 kg	333302

Maxi Puppy 3000, 23610

Large self-priming impeller pump. Can be used as bilge pump and as deckwash pump. Do not run dry.

Suction lift : 2,4 m
Connections : 25 mm
L x W x H : 220 x 120 x 90 mm

Voltage	Current	Model / type	Max. capacity	Nett Weight	Item no.
12 V	21 A	Maxi Puppy 3000 - 23610	45 l/min	3,80 kg	333303

24 V	7 A	31705 - Max 4	16,3 l/min	2,50 kg	3376

LP900S

Rule's LoPro Series Bilge Pumps are only 2.4" (6cm) high. The LP900S model features two automated modes. The first one engages the pump when the water level reaches 2" (5 cm) or 1.3" (3.25 cm) (user choice); and the second one checks for water by briefly turning on the pump every 2.5 minutes. The LP900S model uses a traditional float and/or panel switch for operation. The LP900S features two automated modes of operation

Connections : 19, 25, 28 mm

Voltage	Current	Model / type	Max. capacity	Nett Weight	Item no.
12 V	4 A	LP900S	56 l/min	0,00 kg	LP900S

Bilge strainers, 46200

These compact pre filters prevent particles jamming valves and causing pump breakdowns. The filters have a screw off, transparent housing for easy inspection and quick, in place cleaning. The Universal model makes it easier than ever to install your pump by fitting directly into diaphragm pump inlet port as well as benefiting from swivelled angled inlet port on a rotating body so inlet hose can approach from any direction! Pos. 1 is the inline filter, Pos. 2 has a 90° inlet and can be clicked directly onto the pump.

Connections : 19 mm

Z60

Electric pump designed for general use and deckwash and to pump diesel. The pump is not self-priming and has to be fitted below the waterline. The pump is made of bronze with a brass impeller and a stainless steel shaft, and therefore salt water proof.

Max. period : 120 min.
Connections : 25 mm
Discharge head : 6 m

Voltage	Current	Model / type	Max. capacity	Nett Weight	Item no.
12 V	40 A	Z60	60 l/min	4,50 kg	3407
24 V	20 A	Z60	60 l/min	4,50 kg	3408

Deckwash pumps

4E

Electric pump designed for general use and deckwash. The pump is self-priming, except when it runs dry. It is recommended to install a non-return valve in the suction hose. The pump is made of bronze with a bronze impeller and stainless steel shaft, and therefore salt and sweet water proof. High quality motor with removable coils.

Max. period : 120 min.
Connections : 19 mm
Suction lift : 3 m
Discharge head : 13 m

12 V	40 A	4E	50 l/min	7,00 kg	3421
24 V	20 A	4E	50 l/min	7,00 kg	3422

6E

Electric pump designed for general use and deckwash. The pump is self-priming when not running dry and can be installed above the waterline. It is recommended to install a non-return valve in the suction hose. The pump is made of bronze with bronze impeller and stainless steel shaft. On request we can offer this pump in 230V and 400V.

Max. period : 180 min.
Connections : 25 mm
Suction lift : 6 m
Discharge head : 18 m

Voltage	Current	Model / type	Max. capacity	Nett Weight	Item no.
24 V	42 A	6E	80 l/min	15,00 kg	3403

SW70, 82605

HotShot Wash Down heavy duty pressure controlled diaphragm pump. The new 5 chamber design diaphragm allows dry running for a limited time. The pump is suitable for use with Seawater. Self-priming up to 3m vertical lift.

The SW70 pumps are available in 12V or 24V. Supplied with inlet strainer, trigger nozzle & port fittings.

Connections : 19 mm
Suction lift : 2,5 m
L x W x H : 270 x 111 x 111 mm

Voltage	Model / type	Max. capacity	Nett Weight	Item no.
12 V	SW70	22,7 l/min	4,00 kg	82605-0092
24 V	SW70	22,7 l/min	4,00 kg	82605-0094

Max 5, 32700

Electric self-priming deckwash pump. Can run dry for a limited period without damaging the pump. Supplied complete with suction strainer and spray nozzle.

Connections : 13 mm
Suction lift : 3 m
L x W x H : 25 x 106 x 100 mm

Rule S-series

With high flow rates and low battery drain. Rule DC submersible pumps transfer water quietly and efficiently against low heads. Flow rate falls rapidly as the discharge head rises. Use the recommended hose size: undersized hose won't harm the pump but you will get significantly less flow. A good choice for light, intermittent duties handling cleanish bilge water. Large submersibles can shift water at an impressive rate without making a heavy demand on the battery. Not for continuous bilge pumping, for water with a lot of suspended solid matter, or for permanently submerged duties.

Discharge head : 2 m

Rule-Mate

The renewed Rule-Mate submersible pumps incorporate an eco-friendly water detection system. This means that the sensors only detect water and in the presence of oil, the pump will not turn on. This mechanism eliminates the need of a float switch. The automatic sensor switches the pump on when the water reaches 60 mm and off when the water is pumped out. The Rule-Mate submersible pumps feature a thermal cut-off and an anti-fouling impeller. The pumps have a robust, corrosion resistant housing. They come complete with a snap-off strainer for easy cleaning.

35A & 40A

Automatic float switch, suitable for submersible bilge pumps and alarm systems. This new model has connection cables on top of the switch. Therefore they will not be in the water, so corrosion will be limited. It is an environmentally responsible switch, due to the completely sealed metal capsules. The switch is also mercury free. The switch turns on when a water level of 64 mm is reached and off at 32 mm.

Pos.	Model - Type	Switched current	Voltage	L x W x H	Item no.

53040

Self-priming portable pump with neoprene or nitrile impeller for water handling and 230V AC electric motor. The neoprene impeller is used with engine cooling and pumping water. The nitrile impeller is used for pumping oil based liquids. The pump handles soft and hard solids without clogging. Built-in dry running protection for 30 minutes after initial prime. The 53040 is the "light" version of the 53080.

Max. period : 40 min.
Connections : 25 mm

Jabsco Impeller removal tool

This impeller removal tool is the easiest way to remove flexible impellers, especially when the pump is mounted in tight and cramped conditions. By using the removal tool, there is no risk of expensive damage to the pump. The flexible impeller removal tools are manufactured from corrosion resistant cast aluminum and stainless steel.

M50

Can be used as a bilge pump or as a grey water pump. Easy to operate by means of the large pump handle. Because of the large valves, obstructions will not easily occur, but if so you don't need any tools to lift the lid. The pump can be mounted horizontal or vertical. Please note that the diameter of the hoses may never be reduced, otherwise the pump will not have the full capacity. The self-priming pump is made of aluminum and covered with a strong nylon coating.

Connections : 38 mm
Suction lift : 7 m
Discharge head : 10 m

Material	Connections	Max. capacity	Nett Weight	Model / type	Item no.
Aluminum	38 mm	100 l/min	2,10 kg	M50	3501

Amazon bulkhead, 29240

With detachable handle. The pump has repositionable ports and body. Easy to assemble due to 96 assembly variations. The pump is made of corrosion resistant materials throughout. Comes complete with stainless steel handle and mounting clips. Very suitable for emptying bilge or waste water tanks. The pump is made entirely of corrosion resistance materials.

Connections : 25 mm
Suction lift : 4 m

Macerator pumps

F

Designed to empty holding tanks. As the pump is not self-priming, it is important to be fitted either at the lowest part of the tank or lower than the tank itself. Made of bronze with brass impellers and a stainless steel shaft. Easy and quick to take apart for maintenance or service.

Max. period : 120 min.
Discharge head : 5 m
Suction connection : 2" inch
Intake connection : 50 mm
Discharge connection : 1" inch
Discharge connection : 25 mm
L x W x H : 270 x 125 x 140 min.

Voltage	Current	Max. capacity	Nett Weight	Model / type	Item no.
12 V	40 A	70 l/min	6,00 kg	F	3409
24 V	20 A	70 l/min	6,00 kg	F	3410

FS370

Designed to empty large holding tanks. Holding tank capacity should be about 1 m³. As the pump is not self-priming, it is important to fit the pump either at the lowest part of the tank or lower than the tank itself. Made of bronze and stainless steel. Easy to take apart.

Discharge head	: 6 m	Discharge connection	: 25 mm
Suction connection	: 2" inch	L x W x H	: 390 x 180 x 140 min.
Intake connection	: 50 mm		
Discharge connection	: 1" inch		

Voltage	Current	Max. capacity	Nett Weight	Model / type	Item no.

18590

This self-priming macerator pump has a triple sealed motor to prevent both internal and external corrosion. A four-blade cutter reduces the chance of clogging. The pump detects the absence of fluid and then shuts-off before impeller is damaged. A sensor provides adequate run-dry period to allow initial priming of the pump.

Max. period	: 15 min.	Discharge connection	: 1" inch
Suction lift	: 0,6 m	Discharge connection	: 25 mm
Discharge head	: 6 m	L x W x H	: 290 x 120 x 90 min.

Diesel transfer pumps

EP40

Self-priming fuel transfer pump, suitable to deliver oil and diesel fuel or to exchange motor oil. The body and gear wheels are made of bronze and the shaft is made of stainless steel. The shaft sealing is mechanical which has the advantage of being fully free of maintenance. Please note that both hoses (suction and discharge) should never be narrowed in any way.

Max. period	: 120 min.	Suction connection	: 3/8" inch
Suction lift	: 3 m	Discharge connection	: 3/8" min.
Discharge head	: 15 m

59510

Magnetic driven circulation pump with sealed pump chamber and brushless motor. For use with hot water systems, heating systems and all other applications where circulation is required, with a maximum water temperature of 100°C. Suitable for handling aggressive liquids as well! Ignition protected according to ISO8846 Marine.

Connections : 19 mm

Voltage	Current	Max. capacity	Nett Weight	Item no.
12 V	1,2 A	12,5 (bij 0,12 bar) l/min	0,30 kg	59510-0012

Circulation pumps

34060

Compact manual pump for engine and gearbox oil drain. Oil and corrosion resistant brass and neoprene construction.

Pump's housing material : brass.

Length x diam.	Suction connection	Item no.
260 x 30 mm	1/2" inch	3320

3400

This Carter oil drain pump is completely made of bronze and is designed to remove oil from motor and clutch easily. An aluminum bracket and an oil hose is an option.

Length x diam.	Suction connection	Item no.
235 x 32 mm	1/4" inch	3400.001

Parts for oil drain pumps

24 V	1,8 A	30 l/min	0,00 kg	333007

Rheinstrom Shower drain units

Automatic drain unit with a Rheinstrom type F macerator pump as discharge pump. Suitable for the discharge of waste water from shower, kitchen and sink. Due to the integrated level switch satisfactory operation can be guaranteed even at an angle of maximum 45°. Accepts water from up to three separate shower units. Equipped with a non-return valve and with a black polythene or a stainless steel housing.

Max. period	: 30 min.	Outlet connection	: 1" inch
Discharge head	: 6 m	Outlet connection	: 25 mm

Rule Shower drain units

Model 98 is a compact and full capacity shower drain system. It automatically turns on after the water starts, and shuts off when the water is removed. The system is activated by a Rule-A-Matic float switch. With multiple inlet ports. Other features include a clear screw down cover, a removable strainer for easy cleaning and an internal check to prevent back flow.

Discharge head	: 1 m	Outlet connection	: 19 mm
Connection	: 3/4" inch	L x W x H	: 210 x 286 x 140 mm

Parts for shower drain units

Automatic float switch, suitable for submersible bilge pumps and alarm systems. This new model has connection cables on top of the switch. Therefore they will not be in the water, so corrosion will be limited. It is an environmentally responsible switch, due to the completely sealed metal capsules. The switch is also mercury free. The switch turns on when a water level of 64 mm is reached and off at 32 mm.

LxWxH : 114 x 38 x 51 mm

Jabsco drinking water strainers 46400

These compact pre filters prevent particles jamming valves and causing pump breakdowns. The filters have a screw off, transparent housing for easy inspection and quick, in place cleaning. The universal model makes it easier than ever to install the pump. The filters can be fitted directly into diaphragm pump inlet port and also benefit from a swivelled angled inlet port on a rotating body. So the inlet hose can approach from any direction!

Drinking water strainers

Jabsco Aqua Filta

Aqua Filta™ is an activated carbon water filter that removes chlorine, unpleasant smells, tastes and colors from marine water systems and uses specially silver-impregnated carbon to inhibit bacterial growth in the filter bed. Aqua Filta™ absorbs dissolved impurities but retains beneficial mineral salts, thus freshening and cleansing water to make it natural tasting, sweet smelling and crystal clear.

Description	Connections	Item no.
Aqua Filta drinkwater filter	13 mm	3322
Replacement cartridge		3322.1

Uvidis drinking water filters

There are two types of drinking water strainers: a sediment and a carbon strainer. The sediment strainer extracts organic pollution and small parts like rust, sand etcetera from the water. The carbon strainer contains active carbon. This reduces the level of chemical substances and improves the taste and scent of the water. Once the filter is placed and has made contact with water it has to be replaced every 3 months, regardless the usage.

Description	Model / type	Length	Item no.
Strainerholder 10"	UDS 207300	10 inch	334050
Sedimentstrainer 10"	UDS 222000	10 inch	334051

Fuel strainers / Water separators

Magnet filters

This de-bug strainer uses a magnetic field which extinguishes all the organisms. This helps in the prevention against pollution/contamination. The magnets have a ceramic coating and thanks to this special technique no sieve is required which makes them almost maintenance free.

Model / type	Description	Max. capacity	Diameter	Height	Item no.

Hengst Fuel filters

This fuel filter can feature two fuel filters / water separators in one single unit, so you can change your fuel filter without turning off your engine. Classification societies often require filter elements with steel housings and reservoirs. The strainers 1778 and 1781 come complete with two filter elements with synthetic reservoir. If you would like to install a fuel filter with steel reservoir, then we recommend you to order the strainer holder (326010) and two filter elements with steel reservoir (1780.M or 1783.M).

Pos.	Description	Max. capacity	Connections metric	W x H	Item no.
1	Fuel filter complete	2 x 45 l/h.		190 x 180 mm	1765
2	Filter element for 1765	45 l/h.			1766
-	Hengst strainer holder for both 1778 and 1781 (top changeable)		M16x1,5		326010

Delphi Fuel filters with water separator

Delphi fuel filters / water separators can solve fuel problems. The reduced velocity in the unit allows heavy liquid and solid contaminants to accumulate in the reservoir, from which it can be drained off.

Pos.	Description	Suitable for	Max. capacity	Connections	W x H	Item no.
1	Fuel filter - water separators		45 l/h.	1/2" x20 inch UNF	95 x 105 mm	1745

Racor Fuel filters with water separator and integrated fuel lift pump

Fuel strainer combined with water separator. The water in the gasoline is gathered in the reservoir, so it can be tapped. If you order the strainer with alarm, make sure you also order the water detection module. Without this module it is not possible to generate an alarm! As soon as the water in the reservoir reaches a certain level, the module is activated and e.g. a warning bulb or buzzer switches on. As soon as the water is drained, the alarm is turned off.

Pos.	Description	Suitable for	Max. capacity	W x H	Item no.
2	fuel filter - water separator incl. alarm (steel reservoir incl. water sensor)		57 l/h.	99 x 196 mm	175057MA

Cartridge filters Racor Aquabloc for Turbine series

For the Racor fuel strainers Turbine Series special Aquabloc II elements are available (30 micron). These elements are rustproof to ensure a long lifetime. Besides removing water, Aquabloc elements filter tiny particles of dirt and algae from fuel. We advise you to order the drain valve, because the Turbine Series strainers have non-standard connections.

Separ SWK2000/5-series

The Separ fuel filter - water separator is in single and double versions. The SWK2000 series is made of a non-corrosive aluminum housing with a polycarbonate or metal bowl with stainless steel connections. By default, the filters are supplied with a 30 micron element and a drain valve (option: 10 micron element). A vacuum meter and alarm can also be connected. For the alarm, a bowl of contact points is required. (See list) Saper SWK filters include Lloyd, Bureau Veritas, Rina and Germanischer Lloyd.

Pos.	Model / type	Description	Max. capacity	Bowl material	Connections metric	Filter No.	Item no.

Separ SWK2000/10-series

The Separ fuel filter - water separator is in single and double versions. The SWK2000 series is made of a non-corrosive aluminum housing with a polycarbonate or metal bowl with stainless steel connections. By default, the filters are supplied with a 30 micron element and a drain valve (option: 10 micron element). A vacuum meter and alarm can also be connected. For the alarm, a bowl of contact points is required. (See list) Saper SWK filters include Lloyd, Bureau Veritas, Rina and Germanischer Lloyd.

Type 1

This small water strainer is especially designed to filter flushing water and as a cooling water strainer for small engines and generator sets. The housing and cover are manufactured from high quality nickel-plated bronze. The filter element is made of stainless steel AISI 316L. Suitable for installation below the waterline. The filter comes complete with a tool to open the filter for inspection or cleaning. The sealing between cover and housing is by means of a neoprene O-ring. For this type of strainers brackets are available as well as spare parts.

Jabsco Electric toilets

Lite Flush

This stylish toilet is compact and weighs only 11 kg. It is an eco-friendly toilet, with low power consumption and uses only 1.2 litres water per flushing. In this way you can use your waste water tank more efficiently. The Lite Flush toilet has a plastic outer casing, ceramic bowl and a "slow close" seat and lid. It is fitted with a new quiet and efficient flush pump which has large clearances to help prevent blockages and macerates waste. The foot switch can be fitted left or right. With the Lite Flush it is also easy to replace an existing Jabsco Manual Toilet. The Lite Flush Electric Toilet has the same footprint, fixing points and hose attachments as the Manual Toilet making installation quick and straight forward.

Discharge head : 1,5 m
Suction lift : 3 m

Deluxe Flush

This luxurious toilet offers a silent operation and minimal water usage (1.5 litres per flush). The modern and compact design hides flush pump with macerator, wiring and plumbing. The Deluxe toilet comes complete with touch-screen control panel, which offers four eco-friendly flushings. The bowl is manufactured of high gloss china and is easy to clean. For flushing, you can use drinking water from your pressurized water system. Or you can use lake, river or sea water, brought on board by means of a remote mounted self-priming pump.

Discharge head : 2 m
Suction lift : 3 m

Quiet Flush

Designed to radically reduce noise levels. Even when others are asleep, you won't waken them by flushing the toilet. The Quiet Flush toilet is available with a regular size bowl, or a compact bowl. The toilet comes complete with control panel and macerator pump. You have to choose whether you want to use drinking water for flushing (solenoid valve) or lake, river or sea water (intake pump).

Quiet Flush Conversion kit

If you already have a Jabsco electric toilet type 37010 on board, you can easily convert it to a Quiet Flush model by means of one of the conversion kits. Advantages are an almost silent operation, a three way switch which allows the operator to select a normal flush and drain cycle, or increase or decrease the amount of flushwater, and the choice of using drinking water (solenoid valve kit) or lake, river or sea water (intake pump kit) for flushing.

Y8

Not self-priming toilet. The essential difference between this model and the Y10 model is that the water supply required for flushing the toilet has to be applied under pressure, either from the fresh water pressure system or from a separately installed pump. The main advantage is that the noise is considerably reduced. Due to the use of mostly wear-free parts this toilet is almost completely maintenance-free. As an option the foot pedal can be replaced by an electric switch and a solenoid valve which will then be fitted on the intake side of the toilet. The bowl can be turned 360° without the use of an adapter.

Y10

By simply pressing the foot pedal the pump is activated and in approximately eight seconds the toilet is flushed and the waste is pumped away. The bronze macerator reduces the debris into small particles in the process. All parts are manufactured from the finest materials such as stainless steel, bronze and porcelain. A non-return valve on the discharge side is fitted as a standard. All metal parts of the housing are covered with a heavy-duty nylon coating. The bowl can be turned 360° without the use of an adapter.

Rheinstrom pump enclosure Y8 / Y10

If required, the noise of flushing the toilet can be largely suppressed by fitting a matching GRP casing. This casing is not only beautifully designed to enhance the appearance of the whole assembly, but acts as a super efficient muffler as well. The smooth surface makes cleaning easy. Vibrations are handled by mounting the toilet on a brass base plate located by special dampeners.

Description	Suitable for	Nett Weight	Item no.
Pump enclosure	Y8-Y10	4,22 kg	3009

Y12-W

The Y12-W has the same advantages as the Y12, only this is a space-saving wall mounted toilet. This means you can easier clean your toilet floor and there is extra space for the legs. The other advantage of this toilet is that, apart from the switch, no moving parts are present on the outside of the toilet. The pump can be fitted in e.g. the engine compartment, resulting in a reduction of the required space and noise. The water supply required for flushing the toilet has to be applied under pressure either from the fresh water pressure system or from a separately installed pump. By simply pressing the button, water is used. When pressing the other button, the water and the waste are pumped away. The Y12-W comes complete with an efficient control panel, a Rheinstrom electric membrane pump (type M) and 1 m waste hose for discharge.

Rheinstrom Manual toilets

Y3 / Y3G

Robust, but lightweight aluminium toilet. Therefore the Y3 is very suitable for sailing vessels. The small dimensions and the possibility to mount the toilet near to the wall, create extra space in your toilet room. Due to the universal mounting system, your current toilet is easily interchangeable by the Y3. This toilet is made of corrosion resistant materials to guarantee a long lifetime. The bowl can be turned 180° without using an adapter.

Parts for Rheinstrom manual toilets

Description	Suitable for	Nett Weight	Item no.
Seat and lid (wooden) Rheinstrom Y1/Y2	Y1 - Y2 - Y3 - Y7	2,00 kg	0101070
Bowl gasket oval for Rheinstrom toilets	Y1 - Y2 - Y7 (oval flange)	0,01 kg	0101007
Repairkit Standard	Y2 - Y2G	0,18 kg	0102095N
Repairkit Master	Y2 - Y2G	0,24 kg	0102096N
Repairkit Standard	Y3 - Y3G	0,14 kg	0103095N
Synthetic seat & cover white	Y2G - Y3G - Y4 - Y7G - Y8 - Y10 - Y12	1,92 kg	0104002
Repair kit standard	Y4	0,74 kg	0104095
Bowl small white porcelain (round connection)	Y2 - Y3 - Y7 round flange)	6,10 kg	0100002
Bowl large white porcelain (round connection)	Y2G - Y3G - Y4 - Y7G (round flange)	7,70 kg	0100001

Y7 / Y7G

The above the waterline toilets are available in two types: Y7 with a small porcelain bowl and a white painted wooden seat and cover, and Y7G with a large bowl and a very strong synthetic seat and cover. A hose connector 3/4" x 19 mm is supplied with the toilet.

Model / type	Version	Nett Weight	Item no.
Y7	Compact bowl	11,50 kg	3039
Y7	Large bowl	13,00 kg	3041

Parts for Rheinstrom above the waterline toilets

Description	Suitable for	Nett Weight	Item no.
Seat and lid (wooden) Rheinstrom Y1/Y2	Y1 - Y2 - Y3 - Y7	2,00 kg	0101070
Bowl small white porcelain (round connection)	Y2 - Y3 - Y7 round flange)	6,10 kg	0100002
Bowl gasket oval for Rheinstrom toilets	Y1 - Y2 - Y7 (oval flange)	0,01 kg	0101007
Gasket for bowl	All Y-series toilets	0,00 kg	0101002
Bowl large white porcelain (round connection)	Y2G - Y3G - Y4 - Y7G (round flange)	7,70 kg	0100001
Synthetic seat & cover white	Y2G - Y3G - Y4 - Y7G - Y8 - Y10 - Y12	1,92 kg	0104002
Repairkit Standard		0,06 kg	0107095N
Switch without spring	Y7 - Y8 - Y10	0,00 kg	0111020
Standpipe gasket		0,05 kg	0105814

Isotemp calorifiers

Isotemp Basic

Isotemp Basic calorifiers have an exterior casing and inner tank are made of brushed AISI 316. The immersion heating element is specially designed to heat water at bottom of tank. Extra-long corrugated coils ensure heat exchange efficiency. Isotemp calorifiers use two thermostats: a temperature thermostat and a safety thermostat designed to trip in the event the tank is run dry. As a standard Isotemp water heaters come with a mixing valve. This mixing valve regulates the temperature of the water coming out of the tank to prevent scalding. The standard heating elements are 750 watts which won't overload generators or trip dock breakers. Also calorifiers available with double coil.

Voltage AC : 230 V
Power : 750 W
Max. working pressure : 7 bar
Water connection : ½ G"

Description	Volume	Version	Nett Weight	Diameter	Length	Item no.
Calorifier	24 l		11,00 kg	395 mm	460 mm	727624
Calorifier	40 l		17,00 kg	395 mm	630 mm	727640
Calorifier	40 l	double coil	19,00 kg	395 mm	630 mm	727642
Calorifier	50 l		20,00 kg	395 mm	750 mm	727650
Calorifier	75 l		26,00 kg	395 mm	1040 mm	727675
Calorifier	75 l	double coil	28,00 kg	395 mm	1040 mm	727677

Isotemp Slim

Isotemp Slim calorifiers have a smaller diameter than the Basic and can easily be mounted in narrow spaces. The exterior casing and inner tank are made of brushed AISI 316. The immersion heating element is specially designed to heat water at bottom of tank. Extra-long corrugated coils ensure heat exchange efficiency. Isotemp calorifiers use two thermostats: a temperature thermostat and a safety thermostat designed to trip in the event the tank is run dry. As a standard Isotemp water heaters come with a mixing valve. This mixing valve regulates the temperature of the water coming out of the tank to prevent scalding. The standard heating elements are 750 watts which won't overload generators or trip dock breakers.

Voltage AC : 230 V
Power : 750 W
Max. working pressure : 7 bar
Water connection : ½ G"

Description	Volume	Nett Weight	Diameter	Length	Item no.
Calorifier	15 l	8,00 kg	295 mm	505 mm	727715
Calorifier	20 l	9,00 kg	295 mm	630 mm	727720
Calorifier	25 l	11,00 kg	295 mm	750 mm	727725

Isotemp Spa

Isotemp SPA calorifiers have an exterior casing made of high quality extra-thick polypropylene insulation. The inner tank is made of AISI 316 stainless steel. The immersion heating element is specially designed to heat water at bottom of tank. Extra-long corrugated coils ensure heat exchange efficiency. Isotemp calorifiers use two thermostats: a temperature thermostat and a safety thermostat designed to trip in the event the tank is run dry. As a standard Isotemp water heaters come with a mixing valve. This mixing valve regulates the temperature of the water coming out of the tank to prevent scalding. The standard heating elements are 750 watts which won't overload generators or trip dock breakers.

Voltage AC : 230 V
Power : 750 W
Max. working pressure : 6 bar
Water connection : ½ G"

Description	Volume	Version	Nett Weight	Diameter	Length	Item no.
Calorifier	15 l	Spa	8,00 kg	310 mm	450 mm	727815
Calorifier	20 l	Spa	9,00 kg	310 mm	550 mm	727820
Calorifier	25 l	Spa	11,00 kg	310 mm	650 mm	727825
Calorifier	30 l	Spa	12,00 kg	390 mm	535 mm	727830
Calorifier	40 l	Spa	14,00 kg	390 mm	640 mm	727840

Calorifiers

Isotemp calorifiers

Parts for Isotemp calorifiers

Original parts for service of Isotemp calorifiers.

Pos.	Description	Nett Weight	Item no.
1	Pressure relief valve Basic 4 bar	0,40 kg	7200355
2	Immersion heater Basic 750W, gasket included	0,30 kg	7200305
-	Innmersion heater Basic 1200W, gasket included	0,40 kg	7200325
3	Mixer tap Basic	1,20 kg	7200335
-	Thermostat Basic	0,60 kg	720037
-	Non-return valve	0,50 kg	3240
-	Sealing set	0,20 kg	720036

Calorifiers

Rheinstrom Economic

The Rheinstrom Economic calorifiers have a stainless steel 316 tank. These compact calorifiers can be mounted horizontal as well as vertical .They are equipped with a 230V / 800W immersion heater. Tank, stainless steel brackets and a hose for cooling water are supplied as a standard.

Voltage AC : 230 V
 Power : 800 W
 Max. working pressure : 6 bar

Volume	Description	Nett Weight	Diameter	Length	Suitable for	Item no.
20l	Calorifier	6,00 kg	355 mm	410 mm	Horizontal / vertical installation	0590020
30l	Calorifier	7,00 kg	355 mm	530 mm	Horizontal / vertical installation	0590030
40l	Calorifier	8,00 kg	355 mm	670 mm	Horizontal / vertical installation	0590040

Rheinstrom Deluxe

Rheinstrom Deluxe calorifiers are available in two versions: one for vertical installation; the other for horizontal installation. The connections on the vertical and horizontal calorifiers are at different locations, please bear this in mind when ordering. The immersion heater and a non return-valve (art. code 3240) are not included. The heating period with an immersion heater of 1 KW (based on a watertemp. of 16°C and a surrounding temp. of 18°C: to 50°C: 120 min. with 50 l, 180 min. with 75 l, 280 min. with 115 l. To 80°C: 240 min. with 50 l, 360 min. with 75 l, 550 min with 115 l. Cooling down period from 80°C to 60°C: 26 hrs with 50 l, 27 hrs with 75 l, 30hrs with 115 l.

Voltage AC : 230 V
Power : 1000 / 2000 / 3000 W

Volume	Description	Nett Weight	Diameter	Length	Suitable for	Item no.
50 l	Calorifier	21,00 kg	430 mm	810 mm	Vertical installation	5327
50 l	Calorifier	27,00 kg	430 mm	810 mm	Horizontal installation	5337
75 l	Calorifier	34,00 kg	430 mm	1150 mm	Vertical installation	5338
75 l	Calorifier	36,00 kg	430 mm	1150 mm	Horizontal installation	5339
115 l	Calorifier	44,00 kg	430 mm	1480 mm	Vertical installation	5340
115 l	Calorifier	46,00 kg	430 mm	1480 mm	Horizontal installation	5341

Parts for Rheinstrom calorifiers

If you have a 230V generator or on-shore power, you can use an immersion heater to warm the water. The immersion heater has an adjustable thermostat from 30°C up to 85°C. Attention: If you have to replace the immersion heater at a calorifier with a quadrangle element, please make sure you also order a brass ring.

Pos.	Description	Power	Nett Weight	Installation length	Suitable for	Item no.

“Zero”-series for vessels up to 20 meters (Class IV)

Kahlenberg airhorns are made of spun brass and cast bronze. The “Zero-series” comes in high quality chrome plated. Naturally, all Kahlenberg horns meet the IMO-standards for frequency and amount of decibels. The required compressor needs to be ordered separately. It is possible to equip your airhorn system with a manual or electric control.

Required pressure : 50 - 200 / 3,5 - 14 psi/bar

Pos.	Description	Model / type	Color	Length	Frequency	Sound level	Consumption	Item no.
1	Kahlenberg single horn	S-0A	Chrome	433 mm	322 Hz	122,9 dB	9 CFM	021101
2	Kahlenberg double horn	D-0A	Chrome	576 mm	322 / 254 Hz	122,5 dB	17.6 CFM	021201

Kahlenberg Sound Signaling

Compressorkits “Zero”-series

The required compressor for your Kahlenberg airhorn comes in a very complete kit.

Capacity: 24 liter per minute
Max. pressure: 150 psi / 10.31 bar

Voltage	Description	Model / type	Current	Length x diam.	Item no.
12 V	Kahlenberg compressor	P449-17	21,0 A	178 x 203 mm	021412
24 V	Kahlenberg compressor	P449-18	12,0 A	178 x 203 mm	021424

“330”-series for vessels from 20 up to 75 meters (Class III)

Kahlenberg airhorns are made of spun brass and cast bronze. The “330-series” comes in high quality chrome plated. Naturally, all Kahlenberg horns meet the IMO-standards for frequency and amount of decibels. The required compressor needs to be ordered separately. It is possible to equip your airhorn system with a manual or electric control.

Required pressure : 50 - 200 / 3.5 - 13.8 psi/bar

Also available in gold, black or white finish upon request.

Pos.	Description	Model / type	Color	Length	Frequency	Sound level	Item no.
1	Kahlenberg single horn	S-330	Chrome	433 mm	330 Hz	132 (op 1m) dB	021311
2	Kahlenberg double horn	D-330	Chrome	563 mm	330 / 280 Hz	133 (op 1m) dB	021321

Compressorkits "330"-series

The required compressor for your Kahlenberg airhorn comes in a very complete kit. The compressor kit contains the following items:

Compressor: 12V or 24V with tank, pressure switch and bleeder
 Connectors: 1 hose connector 1/4" NPT_x_5/16", 1 nipple 1/8" NPT, 1 hose connector 1/8" NPT_x_5/16", 1 pressure vent 130/100 psi, 1 hose connector 1/8" NPT_x_1/4", 1 t-piece 1/8" NPT, 1 hose connector 1/4" NPT_x_1/4"
 Hose: 4,5 meter 5/16 OD.

Maximum pressure: 150 psi / 10,31 bar
 Noise level: 9 dB at 1 meter
 Air output: 26 litre per minute

Capacity: 26 liter per minute
 Max. pressure: 150 psi / 10.31 bar

Voltage	Description	Model / type	Current	Length x diam.	Item no.
12 V	Kahlenberg compressor	P449-26	20 A	178 x 203 mm	021826
24 V	Kahlenberg compressor	P449-25	14 A	178 x 203 mm	021825

Solenoid valves

Original Kahlenberg solenoid valve for airhorn.

Accessories for fenders

The best way to inflate a Hollex fender is just pushing air pressure from a compressor with a flat head against the valve and the fender will inflate. It also is possible to inflate the fender with a bicycle or car pump with the special adaptor. Do not use a hand-set with a pin to inflate, because the pin can damage the valve. Best inflation pressure is 0.2 bar / 2.9 psi. This is the pressure where you should be able to press the body of the fender visible easy with your flat hand.

Valves can be replaced by using a bolt M3 and pliers to remove/replace the valve.

Position	Description	Item no.
1	Fender valve (bicycle connection)	0498
2	Valve for fender	0499

For float- and cylinder fenders

Especially in the summer, the fenders often have a sticky surface, which melt and rub off onto the skin of your boat. This sticky surface collects dirt and the skin (and your fender) becomes grimey and rough. The durable fenderfits protect your vessel and the fender against dirt and damage. Another advantage is the elimination of the irritating fender "squeak". Most fenderfits are supplied per two pieces. The fenderfits can be hand washed on 30°C. Available for ball and cylinder fenders. Fenderfits are sold as a set (2 pieces) except A4NB and A5NB.

D-shackle 10mm A4, stainless steel	SS 316	0,12 kg		1286

Chainstoppers

This stainless steel 316 chain stop to prevent damage to the anchor winch drive. The surfaces are polished. Max. load up to 2500kg for 6, 8 and 10mm chain

Max. load : 2500 kg

Description	A	B	C	D	E	Material	Item no.
Chainstopper	80,2 mm	70 mm	62 mm	13 mm	13 mm	SS 316	127027

Manual operated winch Giglio

The Giglio manual horizontal windlass has a double effect drive system. It comes with a white painted finish aluminum gearbox and an independent anodized aluminum drum. Chrome plated bronze barbotins for 6, 8 and 10 mm chains.

Ships length : 5 - 12 m

Chain Thickness	Standard	Max. load	Working load	Item no.
6 mm	DIN 766	400 kg	70 kg	GI.06D
8 mm	DIN 766	400 kg	70 kg	GI.08D
10 mm	DIN 766	400 kg	70 kg	GI.10D7

Obi

Horizontal axis anchor winch made of anodized aluminum alloy, with a chrome plated gipsy cover. This model features a manual chain freefall system. Available with or without a drum (cat. nos ending with a D are with drum, cat. nos ending with a L come without a drum). Winches for chain ISO 4565 available upon request.

Deck thickness : 15 - 45 mm
Ships length : 5 - 9 & 9 - 15 m

Relay is included.

Raja

Horizontal anchor winch made of anodized aluminum alloy. The Raja can take chains from 10 to 14 mm. Available in many configurations, for a drum or a gipsy can be placed on top or at the right or left side. As shown in the image is a Raja with drum on top and a gipsy on both the left and the right side. Please contact our sales department Parts for more information. The Raja is suitable for ships up to 26 meters.

Ships length : 18 - 26 m

Relay is included.

Smart V

SMART-V is a stainless steel AISI 316 vertical windlass with planetary drive. Available low profile, with different drives and recommended for boats up to 10m. SMART-V can use chains up to 8 mm and is equipped with rope tensioner. Comes with built-in chain counter sensor.

Deck thickness : 18 - 40 mm
Ships length : 8 - 10 m

Relay is included.

Thunder Lux

Powerful vertical winches made of chrome plated bronze. Thunder Lux winches have an integrated chain counter sensor. These winches will handle 6, 8 and 10 mm chain (DIN 766) Winches for chain ISO 4565 available upon request. The 8mmThunder Lux can process a combination of anchor chain and rope, as long as the rope is spliced to the chain. Suitable for vessels up to 16 metres long. Available with or without drum (article numbers ending with a D are with drum, ending with a L come without a drum). The Thunder Lux winch is also available with a 6mm gipsy.

Deck thickness : 25 - 50 mm
Ships length : 8 - 16 m

Relay is included.

Sun

SUN is a stainless steel AISI 316 vertical windlass Available with different motorization it's suggested for boats up to 45 meters. The SUN can bring chain up to 17,5 mm with stud link size and can have different optionals like remote brake wheel and the WLS light system (Windlass Lighting System). Possibility to have different motor supply: 24V, 230V, 400V or hydraulic. SUN MAXI is the SUN version with a bigger capstan drum; this in order to improve the docking operations

Deck thickness : 110 - 170 mm
Ships length : 28 - 45 m

Relay is included.

Remote controls for anchor winches

Controlswitch on panel

Description	Item no.
Control switchpanel	127009

Remote control Wired

Description	Item no.
Wired remote control with plug, 4.5m. Cable	127012

Remote control Wireless Kompass 2 and 4

Just like the remote control units, the radiographic control units can command anchor Winches, bow & stern thrusters, crabs and gangways and are easy to use thanks to the handy remote control feature. Available in 2 and 4 channels, with an IP67 watertight receiver and transmitter. Frequency band: 433 Mhz or 868Mhz.

LxW x H : 60 x 60 x 18 mm

Description	Frequency	Item no.
Wireless remote control Kompass 2	433,92 Hz	127013
Wireless remote Kompass 4	433,92 Hz	127024
Signal amplifier Kompass		127014

Remote control Wireless Kompass 8

The Kompass-8 remote control can handle up to 8 channels of transmission operating two winches and the bow and stern thrusters. With the shortcut key is also possible to operate simultaneously two thrusters, making even easier the mooring. Floating transmitter IP67. Attendance 868Mhz or 913Mhz.

LxW x H : 145 x 60 x 30 mm

Description	Frequency	Item no.
Wireless remote Kompass 8	868 / 913 Hz	127023

Wireless control with chain counter sensor

This wireless remote control features a chain counter (only for winches with chain counter sensor). The clearly readable screen allows maximum freedom of movement throughout the ship. The control has a rechargeable battery and comes complete with a charger with a 12/24 V connection. Working frequency : 868 MHz

LxW x H : 145 x 50 x 22 mm

Description	Frequency	Item no.
Wireless remote control with charger and chain counter	868 Hz	127007

Chaincounter

The chaincounter EV011 is compact, small and extremely performing in order to be employed with equipments which are already provided with windlasses' control units, but do not have any chaincounter. It is easy to be installed and compatible with any kind of windlass on the market, it displays the measure of the chain lowered in metres or feet. Guaranteed protection rating IP56 and universal power supply 12/24Vdc.

- Indications in 5 languages
- Up alarm function
- Display of the manoeuvres speed
- Choice between meters or feet as unit of measure
- Adjustable Lighting system display
- Universal Feeding (12-24V)
- Simple and immediate use
- Automatic descent function
- Display of the power supply voltage of the motor
- High resolution LCD display
- Adjustable Contrast display
- Watertight case IP 56

**IP
65**

Description	Item no.
Chaincounter EV011	127019

Foot switches

Perfectly watertight control for relays or other loads, which can be activated by the simple pressure of your foot. Perfect watertight execution- Max. loading: 4 A. Inox steel base. Fitted with a hinged thermoplastic crashproof flap cover in order to avoid fortuitous operation. Control button in sea water resistant silicon rubber. Available in grey, chromed or completely stainless steel.

Pos.	Description	Item no.
1	Waterproof footswitch UP	127005

700 W	24 V	40 A	25 m/min.	760 kg	100 kg	PX0700.24d

Aran

Chrome plated bronze capstan winch, available with different drives. Suitable for ships up to 28 meters.

Deck thickness (mm) : 60 to 110

Deck thickness : 60 - 110 mm
Ships length : < 28 m

Relay is included.

Power	Voltage	Current	Max. line speed	Max. load	Working load	Item no.
1700 W	24 V	75 A	12 m/min.	740 kg	340 kg	AR1700.24D
2300 W	24 V	120 A	12 m/min.	2100 kg	500 kg	AR2300.24D
2700 W	24 V	150 A	12 m/min.	2300 kg	600 kg	AR2700.24D
2200 W	230/400 V		12 m/min.	2100 kg	525 kg	AR2200.ACD

Milos

MILOS - Stainless steel AISI 316 capstan winch, with different drives and recommended for boats up to 38 meters. Possibility of 24V, 230V, 400V or hydraulic drive.

Deck thickness : 130 - 170 mm
Ships length : < 38 m

Relay is included.

Power	Voltage	Current	Max. line speed	Max. load	Working load	Item no.
3500 W	24 V	195 A	12 m/min.	4000 kg	1100 kg	MI3500.24D
3000 W	230/400 V		12 m/min.	4000 kg	1100 kg	MI3000.ACD

Nestor

Stainless steel AISI 316 capstan winch, with different drives and recommended for boats up to 17 meters.

Deck thickness : 25-50 mm
Ships length : < 17 m

Relay is included.

Power	Voltage	Current	Max. line speed	Max. load	Working load	Item no.
1000 W	12 V	115 A	25 m/min.	1020 kg	130 kg	NE1000.12d
1500 W	12 V	130 A	26 m/min.	1250 kg	150 kg	NE1500.12d
1000 W	24 V	60 A	25 m/min.	1060 kg	140 kg	NE1000.24d
1500 W	24 V	70 A	26 m/min.	1290 kg	160 kg	NE1500.24d

Nestor-V

Nestor-V is a stainless steel AISI 316 vertical capstan with planetary drive.

Deck thickness : 18-40 mm
Ships length : < 17 m

Relay is included.

Power	Voltage	Current	Max. line speed	Max. load	Working load	Item no.
800 W	12 V	90 A	25 m/min.	800 kg	100 kg	NV0800.12d
800 W	24 V	45 A	25 m/min.	810 kg	100 kg	NV0800.24d

Heron

Stainless steel capstan winch, with different drives. Available for ships up to 23 meters.
Deck thickness (mm) : 30 to 70

Deck thickness : 30-70 mm
Ships length : < 23 m

Relay is included.

Power	Voltage	Current	Max. line speed	Max. load	Working load	Item no.
1500 W	12 V	130 A	26 m/min.	1250 kg	150 kg	HE1500.12D
1700 W	12 V	185 A	26 m/min.	1650 kg	220 kg	HE1700.12D
1500 W	24 V	70 A	26 m/min.	1290 kg	160 kg	HE1500.24D
1700 W	24 V	90 A	26 m/min.	1700 kg	240 kg	HE1700.24D
2000 W	24 V	100 A	12 m/min.	1750 kg	270 kg	HE2000.24D
2000 W	230 V		12 m/min.	1700 kg	250 kg	HE2000.230D

Guidelines for the application of anodes

To determine the number and type of anodes you will need, it is important to take the water and mooring place of the vessel into account. The electric current of an anode depends on the water conduction. For example, an anode in salt water has a higher electric current than the same kind of anode in fresh water. As a result the anode in fresh water has a longer life span.

The electric current is modified by the surface area of the anode, so in brackish and fresh water it is better to apply several small anodes than one large anode. The electric current also depends on the material. Magnesium has the highest electric current and zinc the lowest. The electric current of aluminum is somewhat higher than the current of zinc.

Anode material in relation to waters and mooring places

If a vessel is to be found in fresh waters only, magnesium anodes can best be used. If a ship mainly sails in salt water and every once in a while in brackish water, zinc is the right anode material. When the vessel has varying waters and mooring places, aluminum can best be used. Aluminum anodes are also the most environmental friendly anodes. Aluminum is suitable for either salt, brackish or fresh water.

Life span of the anodes

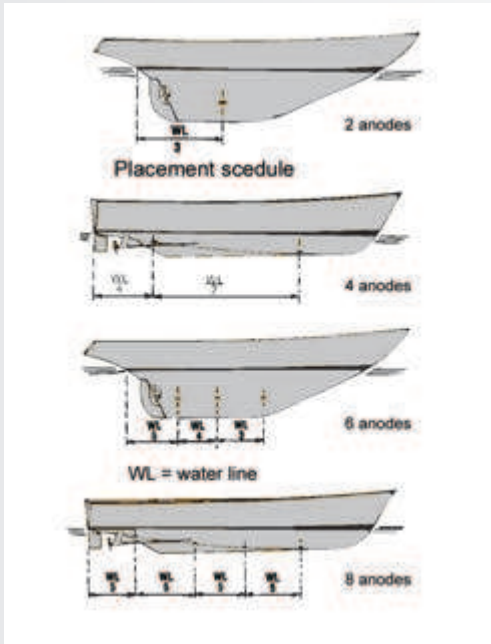

The anode protection must at least be enough for the period between two slip services. The anode consumption depends on a lot of factors. In general, replacement of the anodes is advised when the anodes are consumed for 70 upto 80%.

Place of the anodes on the vessel

In the picture the place of the anodes is calculated as followed: seen from the stern an interval is taken

equal to: $\frac{\text{length of the water line}}{\text{number of anodes}}$

Don't forget to protect your rudder with anodes as well!

MGD Magnesium hull anodes

The backside of the magnesium anodes can be painted. We advise to apply extra paint on the surroundings of the anodes. Anode MD78B (not shown in the picture) has two holes for the use of M10 studs, instead of a welding strip.

Suitable for use in fresh water.

Model - Type	Description	Nett Weight	Strip length	Length anode	Width	Height	Bolt distance	Suitable for	Item no.
MD76	Hull anode	0,20 kg	160 mm	114 mm	76 mm		140 mm		1795

Magnesium anodes

MGD Magnesium hull- and rudder anodes

The shape of these anodes reduces the resistance in the water to a minimum. These anodes are very suitable for rudder blades and for hull application on fast going vessels. Suitable for use in fresh water.

Model - Type	Description	Nett Weight	Diameter	Height	Suitable for	Item no.
MD56	Shaft anode	0,20 kg	100 mm	25 mm		1786
Backing pads	Backing pad	0,00 kg			AD56 / ZD56	B56

Aluminum anodes

MGD Aluminum hull anodes

These aluminum anodes have been used in the marine and offshore industry for many years now due to their superior material. The aluminum alloy guarantees a constant consumption, this influences the lifetime and reliability of the vessel in a positive way. Safe and universal to use! Suitable for use in brackish and salt water.

Model - Type	Description	Nett Weight	Strip length	Length anode	Width	Height	Bolt distance	Item no.
AD76	Hull anode	0,45 kg	165 mm	114 mm	76 mm	32 mm		593141

50 mm	ASC50T	Ring anode	0,18 kg	81 mm	18 mm	18,0 mm	ASC50T

MGD Zinc hull anodes

These zinc anodes have proven their quality many times, especially in salt water. The anodes comply with the U.S.A. Mil Specification type A-18001K. The anodes ZD77, ZD79 and ZD78B (not shown) have holes for use with M10 studs. The anodes ZD72B and ZD72BM have holes for use with M16 studs. All other anodes have welding strips. Suitable for use in salt water.

Model - Type	Nett Weight	Strip length	Length anode	Width	Bolt distance	Item no.
ZD75	0,50 kg	155 mm	100 mm	45 mm		593061

Backing pads

For MgDuff anodes

It's not good practice to have anodes fitted directly on the ship's hull. We now offer a wide range of backing pads for all MGD anodes. This is a rubber pad that eliminates direct contact between anode and hull. The risk on alkalinity is herewith reduced drastically.

Description	Suitable for	Item no.

Mercuriser sterndrive BRAVO I, II & III

To make replacement of anodes on the Mercuriser sterndrives easier, a complete aluminum anode pack is compiled for the Bravo I for 1988 till present. Now you cannot forget changing an anode! The pack comes complete with mounting materials.

The Bravo I pack consists of: -anodic plate (CM821630C2A) -bearing carrier anode (CM806188A) -trimcilinderanode (CM806190A) -trim tab anode (CM762145A)

The Bravo II and III pack consists of: -anodic plate (CM821630CA) - bearing carrier anode (CM806190A) -trim tab anode (CM722145A).

Suitable for brackish / salt water.

Suitable for	Material	Item no.
Bravo I, 1988 - present	Aluminum	CMBRAVO1KITA
Bravo II en III, 1989 - present	Aluminum	CMBRAVO23KITA

Mercuriser sterndrive Alpha I gen. II

This anode pack is specially compiled for the Mercuriser Alpha I generation II (1991 - present) to make replacement of your sterndrive anodes easier. The pack comes complete with mounting materials.

To make replacement of anodes on the Mercuriser sterndrives easier, a complete aluminum anode pack is compiled for the Bravo I for 1988 till present. Now you cannot forget changing an anode! The pack comes complete with mounting materials.

The Alpha pack consists of: -anodic plate (CM821629CA) - bearing carrier anode (CM806105A) -trimcilinderanode (M806189A) -trim tab anode (CM762145A) -gimbal anode (CM821631A).

Suitable for brackish / salt water.

Suitable for	Material	Item no.
Alpha I, 1991 - present	Aluminum	CMALPHAKITA

Brackets and brushes

With water lubricated sterngear installations, which have rubber bearings, cavitation erosion caused by potential differences cannot be avoided. To prevent these erosion problems one has to install a proper earthing device on every shaft. Hollex earthing devices are available with carbon brush or copper graphite brush. Carbon brushes have to run on a tailor-made bronze ring. Copper graphite brushes can run directly on the shaft or half coupling. Tailor-made rings are available on request. The brushes for earthing devices should be ordered separately.

Description	Material	Max. current draw	Max. peripheral speed	Suitable for	Item no.
Single earthing device					95001
Double earthing device					95002
Carbon brush - coal	Carbon	8 A/cm ²	50 m/sec.	Running surface with bronze ring	95011
Graphite brush - copper	Copper graphite	20 - 30 A/cm ²	20 m/sec.	Running surface with bronze ring or direct on shaft	95012

Noise can be reduced very well if you use the right materials in the right place. In the drawing and table you can find out which materials you should use and where, to make your vessel as silent as possible.

Overview materials and their application

	Air noise					Contact noise	
	Merfocom	Isomat	Merfocell PU	Merfocell GW	Akotherm	Anti-drumming paste	Agglomer
Engine noise	X	X	X	X		X	
Propeller noise / vibrations in casco						X	
Floor wheel-house		X					X
Engine room ventilation			X		X		
Separating walls		X			X		X

Engine noise

In many cases the engine is the main source of noise. Engine noise often can be heard throughout the whole ship. This has two reasons:

- First of all, the engine itself makes a lot of noise. This is called air noise. Air noise will increase the closer you get to the engine.
- Second, the engine passes vibrations on to the ship's hull. These vibrations are heard as noise throughout the vessel; this is called contact noise.

Damming air noise

Air noise can be reduced by the use of insulation and absorption materials. The Merfocom combination sheet is the fastest and easiest solution for contact noise. This sheet insulates and absorbs at the same time. If you prefer to apply the layers by yourself, then you can use Isomat for insulation, combined with Merfocell PU or Merfocell GW. Absorption materials must always be applied at the side of the source of the noise (the engine). Merfocom and Merfocell GW have a heat repellent top layer, so if the engine is installed close to the wall, these products are a better choice than Merfocell PU.

Most materials are self-adhesive. Due to the weight of the sheets, we strongly suggest to screw both Merfocom and Isomat if mounted on the ceiling. This will not affect the insulating qualities.

Damming contact noise

The first problem to tackle is the source of the vibrations. Make sure the engine rests on rubber engine mounts. Place the generator set on a stiff, heavy underground (not on a tank or console). The remaining sound can be dealt with by the use of Hollex anti-drumming paste in combination with zincor strips (for more information check: Vibrations in the casco). When vibrations to the floor still occur, you can use Hollomer to disconnect your ship's floors.

Propeller noise and other vibrations in the casco

Vibrations that cause contact noise in the casco can have several sources. Mostly the engine is the main reason (see: Engine noise), but the propeller and/or bow thruster can cause many contact noise as well.

You can dam this noise by anti-drumming the casco around the source of the noise with Hollex antidrumming paste.

Anti-drumming with Hollex anti-drumming paste

The usage of anti-drumming paste will stiffen the metal parts of the ship that pass on the vibrations. Treat the places where the vibrations start for the best result.

The larger the treated surface, the better the result. When dealing with very strict sound regulations, often all engine room walls, tanks and the surface from engine room till stern is anti-drummed.

Wheel-house floor

Vibrations that cause contact noise can be dammed by applying anti-drumming paste, but also by disconnecting walls and floors. Especially when building a new vessel this is quite easy to realise. A floating floor or wall is detached from the ship's hull, and therefore it no longer passes vibrations on.

In the picture you see a floating (deck) floor. Hollomer vibration insulation strips are glued (not screwed!) on the trusses. On top of this Hollomer strips a wooden floor base is mounted. The weight of this base is increased by Hollexmatt sheets.

In case of a steel or aluminum deck, we advise the use of Hollomer floor sheets throughout the complete surface. On these floor sheets you place the wooden deck floor with Hollexmatt.

Please make sure the floor never touches the hull anywhere. Therefore we recommend the use of Hollomer strips around the edges. Never use screws to mount Hollomer or Hollexmatt.

(Engine room) ventilation

If much noise escapes through the ventilating shafts, you can put Akotherm on the inside of the shaft. If this isn't sufficient, then it might be useful to make a labyrinth. By making a "crank" in the shaft, and cover this with Akotherm, the ventilating shaft is better muffled.

Separating walls

With separating walls you can have air noise and contact noise. Air noise can be dammed by applying Hollexmatt on the separating wall. If there is a slit, you can apply Akotherm in the slit.

Contact noise (vibrations) can be dammed by disconnecting the wall from the casco by Hollomer wall sheets. Adhere the Hollomer sheets directly to the ship's hull. Adhere the wall on top of the sheets. It is important that the wall never touches the hull. This can be achieved by the use of Hollomer strips on top and at the bottom of the wall. Never use screws when mounting Hollomer sheets or strips..

Merfocom

Hollex Merfocom is a combination of sound absorbing and sound insulating materials in one sheet. Hollex Merfocom is easy to apply, due to the self-adhesive layer. It is also timesaving while there's only one sheet to apply. The rubber sound insulation layer weighs 8 kg/m² and guarantees a good noise reduction. Thanks to the glass fibre toplayer Merfocom foam sheets are also fire- and damage repellent and high decorative. Suitable for applications in engine compartments.

Description	Weight per square meter	Color	L x W x H	Length	Width	Item no.
Merfocom (combination-sheet)	9,5 kg/m ²		1190 x 990 x 34 mm			2838
Tape (GW)		Light gray		33 m	50 mm	2888

Combination

Merfocell PU

Sound-absorbing flat foam made of polyurethane synthetics and a black or white thin, flexible moisture- and oil-repellent foil layer. Easy to apply, due to the self-adhesive layer. Suitable for applications in engine compartments. Applies to FMVSS302, ISO 4589 and is CE-approved. Available as sheet or by-the-roll.

Description	Weight per square meter	L x W x H	Item no.
Merfocell PU (absorption)	0,70 kg/m ²	1200 x 1000 x 20 mm	2821
Merfocell PU (absorption)	0,95 kg/m ²	1200 x 1000 x 30 mm	2822
Merfocell PU (absorption)	1,65 kg/m ²	1200 x 1000 x 50 mm	2823
Merfocell PU (absorption)	1,25 kg/m ²	20000 x 1500 x 40 mm	2893

Absorption

Akotherm

Akotherm is the alternative for stone wool and glass wool. It doesn't itch and it is moist stable. Even when dealing with vibrations, Akotherm will hold its shape. Akotherm is not only a sound insulating foam, it also has very good thermal insulation capacities. Akotherm is very suitable to insulate hulls and to fill up walls. Applies to EN13501-1 Not CE-approved for application within engine compartments.

Description	Weight per square meter	L x W x H	Item no.
Akotherm (absorption)	0,5 kg/m ²	1200 x 1000 x 25 mm	2862401
Akotherm (absorption)	0,8 kg/m ²	1200 x 1000 x 40 mm	2862403

Merfocell GW

Sound-absorbing flat foam made of polyurethane synthetics with a grey glass fibre toplayer. This sheet is self-adhesive and oil- and water-repellant. Thanks to the glass fibre top-layer, Merfocell GW foam sheets are also fire- and damage repellent and highly decorative. Suitable for application in engine compartments. To tape the seams of the Merfocell GW sheets we recommend using GW-tape. Applies to ISO 4589 and is CE-approved.

Description	Weight per square meter	Color	L x W x H	Length	Width	Item no.
Merfocell GW (absorption)	1,3 kg/m ²		1200 x 1000 x 25 mm			2887
Merfocell GW (absorption)	1,7 kg/m ²		1200 x 1000 x 40 mm			2886
Tape (GW)		Light gray		33 m	50 mm	2888

Merfopol

Merfopol is an absorbing and thermic isolating foam with a polyethylene closed cell structure. Very suitable for application within engine compartments, generators, air compressors, etc. Merfopol is stable, solid and lightweight. Easy to apply.

Description	Weight per square meter	L x W x H	Item no.
Merfopol (absorption)	1,20 kg/m ²	1200 x 1000 x 40 mm	2826

Agglomer

Agglomer is available in different densities. To disconnect (deck) floors, use 30 mm thick Agglomer. It has a very high density and mass to ensure a solid underlayment for the floor. For the disconnection of walls Agglomer with a 50 mm thickness can best be used. To disconnect all edges, use Agglomer strips. The strips have a self-adhesive layer.

For easy mounting of Agglomer sheets, Hollexmatt and the final deck floor, we advise the use of Simsontix adhesive.

Description	Weight per square meter	L x W x H	Item no.
Agglomer	4,20 kg/m ²	1000 x 1000 x 30 mm	2818
Agglomer	4,00 kg/m ²	1000 x 1000 x 50 mm	2817

Damping

2-component damping compound

Hollex anti-drumming paste is to be used to glue zinc strips to a surface. The minimum thickness which should be kept in mind is 4 : 1 : 1. This means that if the surface (mostly the ship's hull) is 6 mm thick, the layer of anti-drumming paste should be 1.5 mm thick and the zinc strips should be 1.5 mm thick as well. This way, you will need 21/4 kilo of paste to cover a surface of one square metre.

Description	Item no.
Anti-drumming paste 5 kg + bottle	2840

Zincor damping sheets

Zincor strips are used for anti-drumming. The zincor strips are 20 cm long and 10 cm wide. Any roundness in the hull can be covered without the need of bending the strips. The coverage of the strips is 80% per m2 you need 40 strips. Applied on ship's hulls. Relation : 4 : 1 : 1 (hull : visco-elastic layer : zincor strip (in mm))

Description	L x W x H	Item no.
Zincor	200 x 100 x 1,5 mm	2846

Isomat

The Isomat sheet is very heavy due to the use of special fillers. This high weight ensures a solid sound insulation. The sheet can withstand temperatures between -40°C and +80°C. The sheet is also water-, oil- and fuel-resistant and can withstand many cleaning and solvent-products. Art.nr. 2834 has jute on one side, for easier adhesion, especially with polyester. Isomat is not self-adhesive. We advise the use of Simsonitix adhesive.

Description	Weight per square meter	L x W x H	Item no.
Hollexmatt	8 kg/m2	1000 x 1000 x 4,0 mm	2829
Hollexmatt	14 kg/m2	1000 x 1000 x 5,7 mm	2830
Hollexmatt	14 kg/m2	1000 x 1000 x 6,0 mm	2834

Agglomer

Agglomer is available in different densities. To disconnect (deck) floors, use 30 mm thick Agglomer. It has a very high density and mass to ensure a solid underlayment for the floor. For the disconnection of walls Agglomer with a 50 mm thickness can best be used. To disconnect all edges, use Agglomer strips. The strips have a self-adhesive layer.

For easy mounting of Agglomer sheets, Hollexmatt and the final deck floor, we advise the use of Simsonitix adhesive.

Description	Weight per square meter	L x W x H	Item no.
Agglomer	2,00 kg/m2	1000 x 1000 x 10 mm	2816
Agglomer	0,20 kg/m2	2000 x 50 x 10 mm	2820

Vibration isolation

Regufoam

Sound-absorbing foam used to reduce contact noise and vibrations. Regufoam disconnects the source of the noise from other parts of the ship. Regufoam is water resistant and has a:

- Very low amplitude dependence
- Proven long-term behaviour
- High fatigue strength
- High elasticity, long service life
- Can withstand fungi, insects and bacteria.

Regufoam can be used as an alternative for agglomer foam.

Description	Weight per square meter	L x W x H	Item no.
Regufoam	0,20 kg/m2	1500 x 40 x 12 mm	2810

Simsontix

Simsontix is a high quality contact glue with a base of neoprene rubber. Very suitable to glue non-adhesive acoustic sheets. We recommend to use Simsontix only indoors. The weather resistant GW tape (not on picture) is suitable to tape the seams of Hollex GW sheets. The tape has a width of 50 mm.

Description	Color	Volume	Item no.
Contact glue	Yellow;Beige	750 ml	023461
Contact glue	Yellow;Beige	5000 ml	023462

SS 304 Waterlocks

Heavy duty waterlocks manufactured from stainless steel 304 and designed for water injected exhaust systems. Available for horizontal and vertical installation. The vertical version has a base plate for easy installation. The horizontal model has mounting feet (included in height measurement). These waterlocks can also be used for generators. Suitable for both above and below the waterline. Both models have a drain plug. Both I.D.'s of the waterlock's hose connection are the same.

GRP Waterlocks

Waterlocks are made of GRP and developed for water injected exhaust systems. The waterlocks are finished with a white coating and they are flame-retardant according to ASTM D-635. Available in horizontal and vertical version. The base of the vertical version measures 305 x 305 mm. Waterlocks can also be used for generators. Suitable for above and below the waterline. Both models have a drain plug. GRP water locks have a Lloyds type approval.

The I.D.'s of the hoses are always the same within one separator. At pos. 1 is a horizontal waterlock and pos. 2 is a vertical model.

Our Sales department Parts will advise you on the right waterlock for your system.

Stainless steel 316 water separators

To be used in the water injected systems of generators. A water separator separates water from the exhaust fumes. This way the fumes can soundlessly be discarded above the waterline, whilst the separated water can be drained off below the waterline. Due to this separation, the sound of generators is remarkably decreased. This water separator is made of stainless steel 316.

Dry exhaust systems

The silencers mentioned in this paragraph are to be used in dry exhaust systems. The silencers should not be brought in contact with the engine's cooling water system. A dry exhaust system can be as effective as a water injected exhaust system. There are three types of silencers available, each with its own specific characteristics:

- Silencers for medium and high frequency sounds (type HM). These silencers leave a tough sound of the working engine, for those who want to "hear the engine's horse-powers".
- Silencers for low frequency sounds (type L25). These silencers are usually only applied in combination with HM silencers.
- Compact silencers for confined spaces which combine the frequencies mentioned above (LH35).

All silencers come with an identification plate, on which you can determine which type of silencer you have.

The silencers have a thick housing made of S 235 JT G2 steel, which allows supports to be welded on the silencers. On request, we can provide silencers in Corten steel or stainless steel. All silencers have a grey corrosion and heat resistant coating and come complete with matching flanges, gaskets, bolts and nuts. When mounting the silencer, please be aware of the engine's flow. Always mount your exhaust system free of vibrations, leaving space for the pulsation and vibrations of the engine.

The silencers can resist a maximum gas heat of 600°C. Thermal insulation is recommended due to high temperatures. To insulate the system, you can apply glass fibre strip (see further on in this chapter). When dealing with sound regulations, additional sound insulation may be necessary. Please check the "Sound insulation materials" chapter for the right choice of material.

Silencer HM

Type HM silencers work according to the absorption principle. Silencing takes place in the medium and high frequencies. This type is often applied in exhaust systems of engines with four or more cylinders. When applied in combination with low frequencies.

Insertion loss : 20 - 35 dB

Placement advice : as close to the engine as possible.

When applied in combination with a L25 silencer, the HM silencer should be placed at the end of the exhaust system.

Comes standard with flange and gasket.

ISO
9001

Outer Ø connection	Outer Ø connection	A	B	C	D	Nett Weight	Item no.
40 mm	1,5 inch	48,3 mm	130 mm	850 mm	760 mm	8,00 kg	HM-040

200 mm	8 inch	219,1 mm	401 mm	1750 mm	1525 mm	76,00 kg	HM-200
250 mm	10 inch	273,0 mm	556 mm	2250 mm	2006 mm	144,00 kg	HM-250

Silencer L25

Type L25 silencers work according to the exhaust reflection principle. Silencing takes place in the low frequencies. This silencer is applicable for 2 and 4 stroke engines. This type is mostly applied in exhaust systems of engines with one, two or three cylinders. When applied in combination with a HM silencer, the silencing takes place on all frequencies. Applicable at bow thruster systems and dieseloil generators.

Insertion loss : 15 - 20 dB

Placement advice : as near to the engine as possible.

Comes standard with flange and gasket.

Outer Ø connection	Outer Ø connection	A	B	C	D	Nett Weight	Item no.
40 mm	1,5 inch	48,3 mm	206 mm	775 mm	640 mm	11,00 kg	L25-040

Silencer LH35

The LH35 silencers work according to a combination of the absorption and the exhaust reflection principles. These silencers are specially made for the exhaust systems of 2 or 4 stroke engines where critical sound regulations are to be met.

Insertion loss : 25 - 35 dB

Placement advice : as near to the engine as possible.

Comes standard with flange and gasket.

Outer Ø connection	Outer Ø connection	A	B	C	D	Nett Weight	Item no.

Exhaust bellow

Exhaust bellows with welding ends for dry exhaust systems. Made of stainless steel 321. Standard bellows for use in the exhaust piping system to eliminate the expansion of the pipes when the engine is running. Not to be used to eliminate the movement of the engine when fitted on flexible engine mounts. Length of the welding ends: 100 mm.

stainless steel 321

Exhaust bellow with braided steel wire

For exhaust systems where a fixed connection is impossible, this exhaust bellow offers the solution. Due to the twined steel wire, this bellow can handle larger pressures (up to 64 bar nominal). The inner hose is made of AISI 316, the twined wire is made of AISI 304 and the welding ends of carbon steel.

stainless steel 321 stainless steel 304

Glass fibre strip and heat cloth

Exhaust temperatures in dry systems can reach up to 700°C. These temperatures can cause fire hazard. As a precaution, heat insulation should be applied. To insulate dry exhaust systems, glass fibre strip can be used.

If desired, the glass fibre cord or band can be covered with a heat blanket (cat. no. 20620, sold per metre) for a nice finish. To apply a heat blanket, you will need mounting hooks and stainless steel thread.

c__Name_03

Exalto offers a complete range of anti-vibration mounts for the fitting of propulsion engines and generator sets to enlarge your comfort on board. Please do not hesitate to contact us for helping you select the best anti-vibration mount for your situation. With your data like weight and type of motor, number of revolutions and number of supports, we can make an anti-vibration calculation.

The sizes of hardness mentioned in the tables are available as standard. Other hardness sizes are available on request. The antivibration mounts are available with or without heavy style. The cap is galvanized, the mounting foot coated. All anti-vibration mounts are certified by Bureau Veritas.

Dimensions

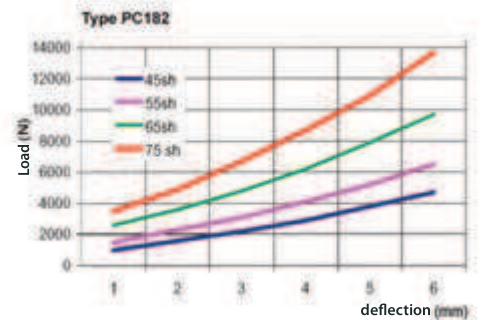

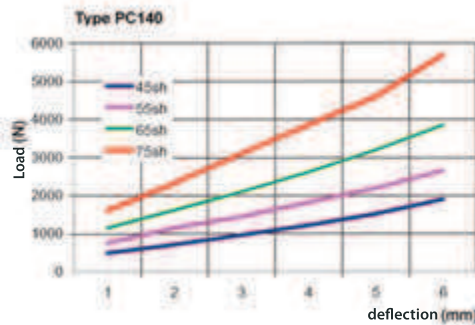

Of types PC100, PC140 and PC182

Dimensions in mm

Type	H	H1 min./max.	M	ST	L	B	O	P	Spanner width
PC100	40	62 / 72	M12	100	120	60	14	11	20
PC140	50	79 / 89	M16	140	184	75	30	13	27
PC182	70	106 / 116	M20	182	230	112	26	18	30

PC100 - 140 - 182

60.060

The 60.060 has an extra large horizontal stiffness characteristic. Due to the use of a special grade of rubber, vibrations of 1 - 3 cylinder engines can be absorbed. This anti-vibration mount is also suitable for generator sets, pump sets and compressors. The 60.060 is available in three types. The mounts are dip protected.

Max. deflection : Max. 3 mm

Version	Stiffness	Max. load	A	D	d	H	Item no.
03	196 N/mm	60 kg	76,5 mm	62,5 mm	10 mm	34,5 mm	86599
04	360 N/mm	110 kg	76,5 mm	62,5 mm	10 mm	34,5 mm	86600
05	490 N/mm	150 kg	76,5 mm	62,5 mm	10 mm	34,5 mm	86601

PC100

The PC100 combines optimum vibration insulation with a long lifetime. This is a tri-flex mount, which means that the vibrations are absorbed in three directions. Due to a perfect proportion of vertical and horizontal stiffness, the contact noise is also reduced. The PC100 is available in three sizes of hardness. For type PC100 we have an adapter available for M12 to M16.

Max. deflection : Max. 6 mm

PC140

The PC140 combines optimum vibration insulation with a long lifetime. This is a tri-flex mount: the vibrations are absorbed in three directions. An optimum proportion between vertical and horizontal stiffness provides a lot of noise reduction. This anti-vibration mount is available in four sizes of hardness.

Max. deflection : Max. 6 mm

Hardness Shore	Version	Stiffness	Max. load	B	H	Height 1	Length L	O	P	Thread metric	Wrench size	Item no.

Model SM Original

The spherical Vibracon SM Original mounts neutralise parallel deviations to an angle of 4 degrees between the foundation and the engine base, resulting in supporting the entire surface. Vibracon adjustable mounts can be adjusted at all times. After an overhaul or replacement the object can be replaced with the same accuracy. For these remarkable mounts, only the best materials are used. Durable, reliable and proven quality, as you may expect from Exalto.

Model / type	ØA	B	C	ØD	E	ØF	Thread metric	Machine load	Max. load	Item no.
SM12	17 mm	30 mm	8 mm	60 mm	15 mm	6 mm	M12 / M14 / M16 (8.8)	8 kN	48 kN	76910

Model SM Low-Profile

Vibracon adjustable mounts now are available in a new version: the SM Low Profile. The most important difference with the SM Original-series is of course the height. Vibracon SM Low Profile mounts can be used where you would normally have to turn to casting mass. With the same advantages as the Original mounts (quick mounting, adjustable at all times and replacable), but than suitable for narrow spaces, like with repair projects (where the spigot dimensions are mostly very limited). The SM Low Profile comes complete with a mounting ring.

In-line blowers

Rule 140 & 240

In-line blowers with both inlet and outlet ports designed for slip-on flexible ducting connections. Easy installation. Suitable for simple installations with short ducting lengths and a minimum of bends.

Model / type	Voltage	Current	Nett Weight	L x W x H	Diameter hose	Capacity	Item no.
140	12 V	2,9 A	0,54 kg	95 x 125 x 130 mm	75 mm	3,8 m ³ /min	140
140	24 V	1,7 A	0,52 kg	95 x 125 x 130 mm	75 mm	3,8 m ³ /min	140-24V
240	12 V	4,3 A	0,50 kg	120 x 150 x 130 mm	100 mm	6,7 m ³ /min	240
240	24 V	2,4 A	0,58 kg	120 x 150 x 130 mm	100 mm	6,7 m ³ /min	240-24V

Easterner inline blower

In-line blower suitable for 12V with a capacity of 391m³/min.

Model / type	Voltage	Current	Nett Weight	L x W x H	Diameter hose	Capacity	Item no.
In-line blower	12 V	1,5 A	0,00 kg	130,2 x 131,7 x 90,5 mm	101,6 mm	391 m ³ /min	EP-11605

ECS Recessed blowers

Has a high capacity and is very low noise. This fan has two speeds and can turn both right and left. Comes complete with a switching unit. The ECS ventilation fittings and grille grille can easily be combined with this fan.

Description	Voltage	Height	Installation diam.	Diameter hose	Radius cut out size	Item no.
Ventilator	12/24 V	52 mm	95 mm	125 mm	92 mm	2013

ECS Blower connectorpieces & decorative grilles

The flanges have a slip-on connection for the flexible ducting. The screens prevent debris from entering ventilation blowers. Flexible ducting allows quick and easy installation of ventilation blowers.

Pos.	Description	Material	Diameter hose	Item no.
1	Intake screen			2009
2	Blower ducting l = 6 m	PVC	76 mm	1019
2	Blower ducting l = 6 m	PVC	102 mm	1021
3	Intake screen bulkhead mount			2008

Ventilation- & air intake caps

The ventilation hoods can be used with or without flexible hose. All mentioned products are made of stainless steel

Pos.	Description	Material	Height	Installation depth	Diameter	L x W x H	Item no.
1	Intake screen with flow	SS 316	40 mm		230 mm		2004

8	Non-metallic mounting collar for 1030	PVC			77 mm	132 x 149 x 2 mm	1031

Hollex Ventilation caps

Particularly firmly ventilated stainless steel 304 stainless steel cap and waterproof sealable from the inside using a brass spindle. Available in three versions and equipped with a stainless steel mosquito net and a plastic finish.

stainless steel 304

Description	Material	Height	Installation diam.	Diameter	Item no.
Ventilation cap	Stainless steel	28 mm	84 mm	115 mm	1016
Ventilation cap	Stainless steel	30 mm	122 mm	150 mm	1017
Ventilation cap	Stainless steel	42 mm	152 mm	175 mm	1018

Gebo Air suction

Provides natural ventilation without motors / fans. A special dorade box system ensures that any water that collects within the air suction mechanism can be directed out of the unit to the outside of the boat. Gebo Air suction ventilators should be fitted on an even surface with a maximum tolerance of 1 mm.

- Timesaving clamping system, nice and tidy finishing
- Features the same dimensions and materials as other Gebo products (such as portlights)
- Easy to clean
- Anodized as a standard (optional powdercoating in any RAL colour)

Description	Radius	Cut out size L x W	Radius cut out size	Item no.
Gebo Air suction	68 mm	375 x 175 mm	56 mm	81.60.00.01
Gebo Air suction	100 mm	600 x 175 mm	88 mm	81.60.50.00

Air vent plastic

Airflow vent made of plastic. Easy bolt-on installation.

Description	Color	Item no.
Intake screen	Black	EP-82021B
Intake screen	White	EP-82021W

Air vent SS 316

The air vent can be used with or without flexible hose. The coverplate is made of SS 316. These ventilation hoods can be mounted without fasteners.

Description	Diameter	Item no.
Ventilation cap	76 mm	81932ss-hp
Ventilation cap	101 mm	81933ss-hp

Nicro Solar ventilators

Very compact and low-noise solar power ventilator. No need for external power supply. The ventilator can work up to 40 hours without sunlight. The ventilator comes with a set of 2 fan blades, decorative ring and mosquito screen.

Model / type	Capacity	Ø pass	Height	Installation diam.	Color	Item no.

Complete on board system for luxury yachts

Mastervolt shorepower inlets

Mastervolt supplies a complete range of shorepower inlets for 230 Volts. The shorepower inlets feature the "Easy-Lock" system: the plug plugs into the inlet with a short screw motion. The screw ring hermetically seals the plug and inlet from moisture and water. Besides the plastic Valox inlet, a stainless steel 316 inlet can be supplied too. The stainless steel version is completely sealed when closed and when a power plug is plugged in. The shore connection sockets, contra plugs and covers can be ordered separately.

Glendinning Cablemaster CRM-series

Your shore power cable is neatly stored with the Cable master. When you need the cable, you simply pull the length of the cable from the reel. If you want to store the cable again, press and hold the button on the Cablemaster. The cable then winds back automatically. Available in 16 or 32 Ampères. Will be supplied with yellow shorepower cable with standard plug.

Glendinning Cablemaster CM-series

This is a unique type of cord reel which can handle a wide variety of portable cable sizes and lengths. The unique design of this product eliminates the need for slip rings. The Cablemaster is motor powered, just push a button to extend and retract your power cable. The Cablemaster will be supplied with transit and motor unit, but without cable and optional safe. The system can be expanded with various assembly sets.

AC transfer systems

Mastervolt Masterswitch

With multiple 230 Volt suppliers on board, a switching system is indispensable. In addition to manual switching via selector switch, Mastervolt delivers a completely automatic Masterswitch. The Masterswitch automatically switches between AC power, for example shorepower, generator or inverter. The Masterswitch Fuses model includes circuit breakers.

Model - Type	Power	W x D x H	Item no.
Masterswitch 5 2x in, 1 x out	5 kW	110 x 115 x 200 mm	55006010
Masterswitch 10 2x in, 1 x out	10 kW	110 x 115 x 200 mm	55006015
Masterswitch 25 2x in, 1 x out	25 kW	241 x 168 x 291 mm	55003500
Masterswitch fuses	5 kW	255 x 115 x 200 mm	55006060

Mastervolt System switch

With multiple 230 Volt suppliers on board, a switching system is indispensable. In addition to manual switching via selector switch, Mastervolt delivers a completely automatic Masterswitch. The Masterswitch automatically switches between AC power, for example shorepower, generator or inverter. The Mastervolt System Switch has 3 inputs, and 3 or 4 outputs to AC power groups. The System Switch can be connected to the MasterBus network.

Model - Type	Power	W x D x H	Item no.

Mass system switch 16	16 kW	261 x 144 x 340 mm	55008205

Mass GI-series

The Mass GI is features the latest high-frequency switching technology as well as Soft Start for peak loads when connecting to the grid. LED lights on the casing indicate load and overload. The transformer can be remote controlled and has the option to automatically start the generator when there is an AC current overload. The Mass GI is 75% lighter and 60% smaller than the low frequency transformers.

Input voltage AC : 90-255 V

Model - Type	Power	W x D x H	Item no.
Mass / GI 3,6	3,5 kW	261 x 144 x 340 mm	88000355
Mass / GI 8	7,0 kW	261 x 250 x 340 mm	88000705

Mastervolt Isolation transformers

Mastervolt EasyCharge

For people on the move, the EasyCharge portable battery charger offers a rugged solution that can be used on the boat, car, motorcycle, and camper van. With a rugged, ergonomic construction, and waterproof to IP65 standard (the 6 and 10A models are waterproof to the IP68 standard), the portable chargers have an intuitive control panel, and are available in 120V/60Hz and 230V/50Hz models of either 1.1 A or 4.3 A. Users can quickly select between 6V (ideal for toys, classic cars and motorcycles) and 12V operation. The units include 1.8m of DC cable that connects to either a 61cm lead with ring terminals, or a 61cm lead with alligator clips, for easy installation and a variety of applications; both leads are included in the package. The battery chargers have the ability to charge wet, AGM and gel batteries, with a universal input (120-230 V) for total worldwide freedom.

Pos.	Model - Type	Voltage	Description	Battery capacity	Battery voltage	Charging current	Input voltage AC	Input voltage frequency	Item no.

Mastervolt Chagemaster

Chagemaster battery chargers are compact and can be built in almost anywhere. The small models of battery chargers 12/10 and 24/6 are waterproof to the IP65 standard and can even be placed in humid areas. The Chagemaster 12/15-2 is waterproof to the IP21 standard. The Chagemaster 12/15-2 has 2 outputs, the total output is 15A, and can charge multiple separate batteries. These chargers are not MasterBus compatible.

Mastervolt Solar Chagemasters

Mastervolt offers 2 MPPT Solar Chagemasters type SCM25 MPPT and SCM60 MPPT-MB (25 and 60A). The SCM25 MPPT is the smallest MPPT Solar charge controller and just as powerful as its big brother. With 200 to 700 WP of solar panels, switchable output and buzzer, this Solar charging device is ideal for small and medium-sized systems. SCM60 MPPT-MB is Masterbus compatible. Mastervolt also offers 2 non-MPPT Solar Chagemasters of 20 and 40A.

Mastervolt Chargemaster

Make the most of your batteries with the ChargeMaster, plugging in and charging anywhere in the world. Mastervolt's ChargeMaster guarantees fast and complete charging of your batteries no matter where you are. The ChargeMaster can charge multiple battery banks simultaneously thanks to its combined functionality. Moreover, all ChargeMasters can be easily connected to a MasterBus network with only one cable and one connection. You also have the option of central, local or remote monitoring, configuration and control of your system. The ChargeMaster is available in various models to guarantee you the ideal battery charger for any situation and demand.

Charging your batteries with every voltage. The Mastervolt ChargeMaster supplies a maximum capacity wherever you are via auto-ranging. Auto-ranging ensures perfect fully automatic operation anywhere in the world, regardless of the available mains voltage (90-265 V AC, 50 or 60 Hz). The 3-step+ charging technology guarantees fast and complete charging, while the cos phi 1 regulation gets the most out of limited generator capacity.

The ChargeMaster series has three equal charge outputs. Those of the smaller ChargeMaster models are pre-installed with two metres of cable for a plug & play solution, while the heavier models (12/70-3, 12/100-3, 24/40-3, 24/60-3, 24/80-3, 24/100-3) have one full output (for example for your service battery) and two

outputs of 10 A, ideal for your starter batteries.

Mastervolt Mass

High quality battery and reliability. The Mastervolt Mass battery chargers feature a three-stage charging characteristic, temperature compensation, short circuit protection and cooling. Mass battery chargers meet CE standards, have very high efficiency and are low noise. A number of Mass models are standard with high / low voltage alarm. Some types are provided with a second output. The 24/75 and 24/100 battery chargers can be connected in parallel to create one large charger of, for example, 3x 100A = 24V / 300A. This can then be operated with one panel. The 24/75 and 24/100 battery chargers are also standard DNV, Lloyds, Bureau Veritas, RS and Germanischer Lloyds certified. The Mass battery charger are directly MasterBus compatible.

Inverters

Mastervolt AC Master inverters

The AC Master inverter is ideal for small and medium-sized applications, while Mass Sine and the advanced Mass Sine Ultra inverters are mainly intended for larger systems and for professional purposes. These inverters range from 300 up to 1500 watt continuous rating power. The AC Masters are not Masterbus compatible. The control panel is compatible with the model types ranging from 700 watt and up continuous rating power.

Model - Type	Battery voltage	Continuous rating power	Peak power	Item no.

Mastervolt Mass Sine inverters

The Mass Sine inverter is ideal for professional applications. These inverters range from 800 up to 5000 watt continuous rating power. The Mass Sine inverters are Masterbus compatible using an inverter interface.

The Mass Sine Ultra design is based on over 20 years experience with the Mass Sine range, using the latest technology in power electronics and digital control. Its highly efficient V6 high frequency power electronics allow for very high power density, saving both weight and volume, bringing silent operation and extremely low battery current ripple, extending the life of your batteries. The latest and fastest in digital signal processing prevents nuisances like flickering and dips.

Mastervolt DC Master inverters

The required voltage for DC current can vary. Some equipment requires 24V, while onboard equipment usually requires 12V. For custom DC current, Mastervolt offers a series of compact and made to measure DC-DC converters for both 12V and 24V battery systems that offer stable power with the right current for any connected consumer. There is a wide range of DC Master converters available, including insulated (81500...) and non-insulated (81400...) models.

Model - Type	Max. current	Battery voltage	Power P30	Peak power	Item no.

Mastervolt DC-DC inverters Mac & Magic

The Mac and Magic DC-DC converters are designed for the toughest conditions for professional, semi-professional and recreational purposes. The required direct current voltage may differ quite a lot. The bow thruster and anchor winch often require 24V, while the navigation and audio equipment is usually focused on 12V. The DC-DC converter provides the solution. The Mac and Magic series provide continuous power. They transform the voltage to the desired voltage and stabilize the current, so for example, your halogen lighting lasts longer. Instead of the converting function this product also has a battery charger and dimmer function (only one function can be active). The Magic series is completely shielded by the galvanically separated input and output. The DC-DC converters are MasterBus compatible using a Serial Interface (77030450).

Model - Type	Charging current	Max. current	Battery voltage	Power P30	Peak power	Item no.
Magic 12/12-20	16 A	20 A	24 V	270 W	300 W	81200100

Mastervolt Mass Combi HF

A Mastervolt Mass Combi offers best price/quality ratio. The exceptionally reliable Mass Combi series offers a lot of power at a highly competitive price. In addition, the four models are also available in two customer-friendly variations with remote control or MasterBus. The powerful 3-step+ battery charger guarantees maximum battery life and can simultaneously charge two battery banks. The inverter with high peak power starts even the heaviest loads, with the Mass Combi 12/1600 being easily sufficient for your espresso machine. A built-in distribution system switches between grid and inverter power, while two separate AC outputs allow users to connect critical loads to a preferred group. Power Assist: extra power assistance from the batteries in case of limited grid or generator power (prevents blown fuses). The power sharing system ensures that the available shore power is distributed to the users on board and the battery charger. If more inverter power is required, you can operate two Mass Combis in parallel.

Mastervolt Mass Combi Ultra

The Mass Combi Ultra series comprises several models, varying from 3000 W to 3500 W. For higher capacities up to 35 kW the Combi Ultra can be used in parallel or 3-phase configurations. An efficient and integrated solar charge regulator helps make the most of your solar panels. The Mass Combi Ultra is equipped with the latest technologies. The new 'V6' inverter technology ensures a uniquely low stand-by use, while an ultra-fast Digital Signal Processor guarantees seamless switching between all available energy sources. Power Assist prevents power dips and failures, even with a weak electricity connection or small generator. The Mass Combi Ultra has separate inputs for generator and solar power. The 24V and 48V model can combine 12V and 24V battery banks on the secondary DC output. Moreover, all Mass Combi Ultra models are equipped with MasterBus.

Model / type	Description	Charging current	Battery voltage	Battery capacity	H x W x D	Protection class	Item no.

Mastervolt Mass Combi Pro

The Mass Combi Pro series consists of two models, ranging in 3000 and 3500 watt. For higher capacities up to 40 kW the Combi Pro can be used in parallel or 3-phase configurations. The Mass Combi Pro is equipped with the latest technologies. The new 'V6' inverter technology ensures a uniquely low stand-by use, while an ultra-fast Digital Signal Processor guarantees seamless switching between all available energy sources. Power Assist prevents power dips and failures, even with a weak electricity connection or small generator. The Mastervolt Mass Combi Pro series features all Ultra functions, but without the solar input and secondary battery charger. Moreover, all Mass Combi Pro models are equipped with MasterBus.

Mastervolt Alternators

Robust alternator, high power output at low speed, maintenance-free, ignition protected, isolated ground and three-step loading characteristics. Standard delivered with Alpha Pro MB charge regulator for an optimal performance and longer-lasting batteries. Using a Battery Mate or battery isolator in conjunction with an Alpha alternator makes it possible to easily charge two or three separate battery sets simultaneously.

Mastervolt Alpha Pro charge regulators

The charge regulator measures the battery temperature and adjusts the charging process accordingly, resulting in a safe and fast charge. Therefore the battery is always kept in good condition. Easy operation LEDs on the body of the charge regulator indicate the charge phase. The Alpha Pro MB is designed as a 'fit all' solution. Just one unit is needed for both 12 and 24 V applications, with a simple selector switch to set the regulator to the right voltage. The charge regulator can also be used on any other brand of alternator that has a standard Bosch connector, using a Bosch adapter cable (optional). The Alpha Pro MB is compatible with MasterBus, allowing easy monitoring via a MasterView touchscreen. In a MasterBus system the voltage drop over the battery cable and the battery temperature is compensated automatically.

Model - Type	Item no.
MV Bosch Adapter for Alpha Pro II / III	45510500

Mastervolt charge regulators

In an energy system where multiple batteries are to be charged separately, it is necessary to either install a manual switch between the battery charger and the batteries or to install a charging current distributor. This is needed for example on the board battery, starter battery and boiler battery. With a charging current distributor, the charging process works automatically. The Battery Mate (BM-types) is an electronic charging current distributor that keeps the output voltage constant at an optimal level. Thus there is no 0.6V voltage drop as with the standard separation diode (BI types).

Xunzel SolarX Batteries

SolarX offers a range of 12V AGM batteries. The batteries are completely maintenance-free and sealed. The batteries are safe and leak free. These SolarX deep-cycle batteries are ideal for Off-Grid and Off-shore applications and designed for frequent loading and unloading cycles. The batteries have low internal resistance and can be mounted vertically or horizontally.

Mastervolt 6V AGM batteries

In AGM batteries, the electrolyte (mixture of water and sulphuric acid) is largely absorbed in glass fibre. This type of battery is entirely maintenance-free and there is no gas formation with normal use. Not requiring any ventilation, these batteries can be installed anywhere. Their construction gives a very fast discharge at very high currents so AGM batteries are ideal for systems that require high currents (for instance when starting an engine). The battery poles can be unscrewed and this type of battery can be combined with every standard battery terminal.

Model / type	Description	Battery capacity	Nett Weight	L x W x H	Item no.

Mastervolt AGM 12V SlimLine batteries

In AGM batteries, the electrolyte (mixture of water and sulphuric acid) is largely absorbed in glass fibre. This type of battery is entirely maintenance-free and there is no gas formation with normal use. Not requiring any ventilation, these batteries can be installed anywhere. Their construction gives a very fast discharge at very high currents so AGM batteries are ideal for systems that require high currents (for instance when starting an engine). The battery poles can be unscrewed and this type of battery can be combined with every standard battery terminal. SlimLine batteries are very compact. They offer up to 30% space saving and are 15% lighter than regular AGM batteries. Two batteries take the same place as one traditional battery.

Mastervolt 12V Gel batteries

In gel batteries, the electrolyte is absorbed by a gel. This type of battery is entirely maintenance free and has no gas formation with normal use. As no extra ventilation is required gel batteries can be installed anywhere. They are ideal as service battery and for cyclical use, and can be charged very quickly. The gel technology allows fast charging with high power, up to 50% of the battery capacity. The best battery for maritime use.

Mastervolt MVSV 2V Gel batteries

These durable 2 volt battery cells are completely maintenance-free gel batteries and are used for larger installations and intensive use. These cells can be mounted both horizontally and vertically so that the space can be used efficiently. The gel technology allows fast charging with high power, up to 50% of the battery capacity. Due to the improved technology, the product warranty for the 2 Volt cells is 7 years (demand for terms). Including standard cables, other cable lengths available upon request.

Dimensions including height poles.

Mastervolt Lithium ION batteries MLI

The MLI Ultra series is designed to be able to enjoy all the best properties of Lithium Ion technology in the harshest conditions (high charge/discharge currents, wet environment, mechanical shock or vibrations). To do this the MLI Ultra batteries bring two things on top of a selection of the finest Lithium-iron phosphate cells: a sturdy, waterproof housing and the best Battery Management System (BMS). The BMS includes active cell balancing for optimal use of each individual cell, even during fast charge and discharge, integrated battery monitoring to always have the best information on the state of your battery. Last but not least, it has MasterBus communication to the Mastervolt battery charger to ensure the best possible recharging and lifetime of the battery.

Model / type	Description	Battery capacity	Nett Weight	L x W x H	Power	Item no.
Lithium ION-battery MLI	Lithium ION-battery	180 Ah	31,00 kg	341 x 197 x 355 mm	2,5kWh @ 13,25V kWh	66012500

Lithium ION-battery MLI	Latching relay 24V/500A		1,00 kg			79007702

Mastervolt Lithium ION batteries MLS

The new MLS batteries are suited for many different applications where capacity up to 90 Ah is needed. Its compactness and low weight plus the fact that it is mountable in multiple orientations, make it ideal for portable applications such as mobile communications. The MLS is also often used for (UPS) backup power. Applications range from small boats and vehicles to security systems and industrial applications.

Model / type	Description	Battery capacity	Nett Weight	L x W x H	Power	Item no.
MLS 12/80	Lithium ION-battery	6 Ah	0,80 kg	90 x 70 x 109 mm	77Wh @ 12,8V kWh	65010006
MLS 12/130	Lithium ION-battery	10 Ah	1,50 kg	151 x 65 x 103 mm	128Wh @ 12,8V kWh	65010010
MLS 12/260	Lithium ION-battery	20 Ah	3,10 kg	180 x 77 x 161 mm	256Wh @ 12,8V kWh	65010020
MLS12/390	Lithium ION-battery	30 Ah	4,90 kg	182 x 127 x 140 mm	384Wh @ 12,8V kWh	65010030
MLS24/260	Lithium ION-battery	10 Ah	3,10 kg	180 x 77 x 161 mm	256Wh @ 25,6V kWh	65020010

Remote control & Monitoring

Battery monitoring AC & DC

The battery usage meter DC can be used separately from the inverter or battery charger and can be inserted into any power system. With these consumption meters, the battery capacity or voltage of, for example, generator can be measured at any time. The BTM-3 comes standard with shunt.

Twisted cable needed

Model - Type	Description	Voltage	Max. battery capacity	W x D x H	Suitable for	Item no.
BTM-III	Battery monitor	8-50 V	9999 A	120 x 40 x 65 mm		70403163
Shunt 1000 A/100 mV	for BTM-III				BTM-III	70904180
Twisted pairs shielded 3x2x0.25 mm ² , for BTM	Twisted pairs shielded 3x2x0.25 mm ² , for BTM					6801601100

BEP AC system monitor

This AC monitoring system has a 2.8"QVGA color display and illuminated buttons. AC system is used to control AC voltage, current and frequency and has 3 programs to be programmed freely. Displays data in digital, analog and graphical display. Programmable high / low, audio / visual alarm for each input. Includes AC voltage sensor equipped with 3 voltage inputs (AC-VSEN-4) and 2 pcs power sensors (CT-10-3). Operating voltage: 8 - 32 volts DC Dimensions display h x b (mm): 100 x 90 AC voltage sensor l x b x h (mm): 69 x 140 x 50 AC power sensor l x b x h (mm): 38 x 39 x 14

Model - Type	Description	Voltage	L x H	Item no.
ACSM	System Monitor C/W 2 X CT + VSEN4 MC4	8-32 V	90 x 100 mm	80-600-0023-00

BEP DC System monitor

The DC control and monitoring system has a 2.8"QVGA color display and illuminated buttons. The DC system measures the board voltage of up to 2 battery cells (12-24 volts DC). Displays charge and discharge current of up to 2 battery cells as well as the level of various Tanks and battery capacity in Ah. Suitable for both installation and installation. Up to 8 pieces of programmable inputs. Programmable high / low, audio / visual alarm for voltage, current, tank levels and system status. Displays data in digital, analog and graphical display The shunt and a 5 meter connection cable are included with the set. An additional shunt for measuring the second battery bank can be ordered separately. Dimensions display hxb (mm): 100 x 90 Operating voltage: 8 - 32 Volt DC.

Model - Type	Description	Voltage	Max. current	Length	L x H	Suitable for	Item no.
DSCM	System monitor C/W Shunt + cable MC4	8-32 V			90 x 100 mm	600-DCM-5M, 600-DCM-10M	80-600-0021-00

Mastervolt control panels

Remote control and control panels for automatic battery chargers. These panels show the status of the charging process. The C3-RS, Masterlink MICC and APC panel offer more functionality, for example Power Sharing.

Pos.	Model - Type	Description	L x H	Suitable for	Item no.
1	C3-RS	Remote control battery charger	120 x 65 mm	Mass, IVO Smart charger	70403040
2	Masterlink/MICC dig	Monitor for HF combi and charger/inverter	140 x 85 mm	HF Combi, separate charger/inverter	70403105
3	C4-RB	Basic control excl. flow control	65 x 60 mm	Mass, IVO Smart charger	70404100
-	C4-RI converter panel on/off	Control on/off	65 x 60 mm	Mass Sine inverter	70404110
4	Remote ICC	Basic control Combi	140 x 52 mm	HF Combi	70405000
5	Remote APC	Basic control incl. AC consumption control Combi	140 x 52 mm	HF Combi	70405010
6	Remote CC	Control loading / flow control	140 x 52 mm	Mass, IVO Smart charger	70405030

Mastervolt Masterview

Controlling your Mastervolt system has never been easier. The EasyView 5 features a sharp, waterproof display which is clearly readable in daylight. Thanks to the colour touchscreen and multi-language menu, the display is a pleasure to operate. Easily customizable favourite pages show all relevant system information at a glance.

Masterview remote panel with 6 leds for reading the charge status of your battery charger, including error notifications.

If your dashboard is full and does not offer space for a MasterView panel, this module allows you to integrate the MasterView Read-out into your own control panel.

Model - Type	Description	W x D x H	Suitable for	Item no.
Masterview	Module read-out	65 x 25 x 60 mm		77010030
Masterview	Mastervolt EasyView 5 panel	127 x 113 x 7 mm	Digital switching	77010310
Masterview	Charge monitor 6 LED panel	65 x 25 x 60 mm		77010050

Mastervolt DC distribution

The DC Distribution 500 is the smallest distribution model available. It connects up to four DC devices to the DC groups, such as a battery charger, inverter, alternators and solar panels. With the included plug & play cable it can be easily connected to the MasterBus network.

Model - Type	Description	Voltage	W x D x H	Suitable for	Item no.
DC500	Digital distribution center	12 - 24 - 48 V	216 x 65 x 150 mm	Digital switching	77020200

Mastervolt BattMan

Battery monitor, 12/24VDC with large, splash proof display (IP65) and power bar. An affordable battery monitor that does exactly that: providing critical information about the status of your battery bank under all circumstances. Moreover it will warn you when your battery bank is empty. The Battman Lite only shows live information whereas the Battman Pro can also show historical battery information, alarms and remaining time. The Mastervolt Battman also features a second input for measuring the voltage of another battery bank.

Cut out size Ø : 52 mm

Twisted cable needed

Model - Type	Description	Voltage	Max. battery capacity	Item no.
Battman Lite	Battery monitor	9-35 V	9999 A	70405060
Battman Pro	Battery monitor	9-35 V	9999 A	70405070

Mastervolt Mastershunt

MasterShunt is the heart of every MasterBus energy system. This integrated battery monitor shares information about the battery bank with other Mastervolt devices such as battery chargers, Combis, and displays. No surprises: allowing complete automation of your system, MasterShunt improves comfort, prolongs battery life and extends your runtime.

The MasterShunt 500 provides all information needed for monitoring your battery bank and control of your system, such as voltage, current, state of charge and time remaining. All information is made available to the system by a single MasterBus cable.

Max. current continuous 300A, max. current intermittent 400A (10 min), 500A (5 min), 600A (2 min).

Model - Type	Description	Voltage	Max. current	Max. battery capacity	W x D x H	Suitable for	Item no.
Mastershunt 500	Shunt incl. main fuse 500A	12 - 24 - 48 V	300 A	10000 A	65 x 150 x 150 mm	Digital switching	77020110

Mastervolt Wi-Fi module

Mastervolt has produced a Wireless Interface that allows your iPad to interface with an onboard digital switching system for full monitoring and control of the electrical equipment via a clear and intuitive display. The interface acts as a hub for the seamless connection between the two popular Digital Switching protocols of MasterBus and CZone.

Masterbus interfaces

Description	Item no.
Wireless Interface	80-911-0090-00
Wireless Interface Masterbus connector	80-911-0095-00

Mastervolt Masterbus interface

Most Mastervolt products are now MasterBus compatible. But not all components are directly compatible. Often an interface is needed to connect the devices to the MasterBus network. The table below lists all available interfaces.

Pos.	Description	Item no.
1	MasterBus USB interface	77030100
2	MasterBus Tanklevel interface	77030300
3	MasterBus Serial interface	77030450
3	MasterBus Combi interface	77030475
4	Multipurpose contact (NO-C 6A potential free contact)	77031500
5	Multipurpose contact (NO-C-NC 1A potential free contact)	77030500
3	MasterBus Converter interface	77030700
5	MasterBus ModBus interface	77030800
6	Digital input 4 channels	77030900
7	MasterBus GPRS Module	77031000
4	MasterBus Repeater	77031100
8	AC power analyzer for AC-measurements	77031200
9	MasterBus NMEA2000 Interface	77031800
4	MasterBus Power Interrupter	77031550
9	MasterBus Firecan Interface	77032400

Mastervolt cables

Masterbus cables

Suitable for data traffic and powering peripheral equipment, this is the only cable you need for your MasterBus network. MasterBus compatible products come standard with two ports, while other equipment requires an interface. The terminators ensure interference-free operation, prevent reflection of data signals and ensure high communication speeds.

Pos.	Description	Length	Item no.
1	MasterBus terminator (end plug)		77040000
2	MasterBus cable 0,2 m	0,2 m	77040020
2	MasterBus cable 0,5 m	0,5 m	77040050
2	MasterBus cable 1 m	1 m	77040100
2	MasterBus cable 3 m	3 m	77040300
2	MasterBus cable 6 m	6 m	77040600
2	MasterBus cable 10 m	10 m	77041000
2	MasterBus cable 15 m	15 m	77041500
2	MasterBus cable 25 m	25 m	77042500

Battery terminals tin plated

Battery clamps, tin brass with clamp bracket fitted with clamp.

Description	Item no.

Battery box Xunzel

Battery box suitable for type 24 accu series. Made of high-grade plastic, acid-resistant. Supplied with mounting belt, medium size.

Description	L x W x H	Item no.
Universal battery box - belt included	290 x 244 x 219 mm	xbatboxun

Battery box

Battery box suitable for type 24 accu series. Made of high-grade plastic, acid-resistant. Supplied with mounting material.

Description	L x W x H	Item no.
Battery box Medium	279 x 197 x 200 mm	EP-11526
Battery box Large	343 x 194 x 229 mm	EP-11527
Battery box with USB-connection	343 x 194 x 229 mm	EP-11517
Battery box with USB-connection and 50A-10A fuses	343 x 194 x 229 mm	EP-115372

Battery trays

Battery tray fitted with fastening strap. Suitable for type 24 accu series.

Description	Item no.
Battery tray 178 x 279mm	EP-114885
Battery tray 178 x 330mm	EP-114995

Insulated studs and covers I

These insulated distribution studs are ideal for use as a coupling point/distributor point. The covers are available in red and black.

Pos.	Description	Color	Item no.
1	Insulated distribution stud M8		6409880200
2	Insulated distribution studs 3 x stud M8		6409880400
3	Insulation cap for connection clamp M8	Red	A111186
4	Insulation cap for connection clamp M8	Black	A111187

Insulated studs and covers II

These insulated connecting studs are ideal for use as a coupling point/distribution point. The covers are available in red and black.

Pos.	Description	Item no.
1	Insulated Distribution Stud Single 10mm 3/8"	IS-10MM-1
2	Insulated Distribution Stud 10mm 3/8"	IS-10MM-1R
3	Insulated Distribution Stud 10mm 3/8" Dual	IS-10MM-2
4	Insulated Stud Cover - Positive - Red	ISC-10R
4	Insulated Stud Cover - Negative - Black	ISC-10BK
-	Double Insulated 6mm Stud Cover - Black	ISC-6-2

Bus bars and covers

Easy to install connection strips, equipped with 6 pcs stainless steel screws (M4). The connection strips are copper/tinned and fitted with plastic mounting brackets. There are cover caps available in red or black.

Pos.	Description	Voltage	Max. current	Item no.
1	Buss bar - 6 Way - 100A with 2 Input Studs	0-32 V	100 A	BB-6W-2S
2	Buss Bar cover - 6 Way - Positive - Red			BBC-6WR
3	Buss Bar Cover - 6 Way - Negative - Black			BBC-6WBK

Terminal strips

This terminal block is ideal for isolated connections up to 30A and suitable for connecting tails from AC and DC panels.

Voltage : max. 300 V

Description	Max. current	Item no.
Terminal strip, 6 connections	30 A	TB-118-6P
Terminal strip, 10 connections	30 A	TB-118-10P

Heavy Duty terminal strip and bus bar

The plastic housing has removable sides and two independent pre-installed connection strips that can be connected to one connection strip.

Pos.	Description	Item no.
1	Multi-Purpose Bus Bar 6 Way 100A AC/DC	BB-6W-2
2	Distribution Buss 300 Amps with 4x3/8" Studs	703-300A
	Connector for HD connector strip	708-64.5

Scanstrut Junction boxes

This carefully designed Snapstrut welding boxes are optionally made with 5 or 10 screw terminals and can be made with the optional sealkit IP67 for exterior mounting. By default, the cable glands of these welding boxes are already IP66.

Description	Cable diameter	Item no.
Kit IP67 for junction box SB-8 incl. 2 seals		SB-2G
Junction box Standard / 5 screw-down terminals	4-12 mm	SB-8-5
Junction box Deluxe / 10 Fast-fit terminals	4-12 mm	SB-8-10

Tyraps

These UV-resistant cable tyraps are packed per 100 pieces.

Description	Item no.
Black tyraps (100 pieces) length: 10cm	199203
Black tyraps (100 pieces) length: 20cm	199207
Black tyraps (100 pieces) length: 28cm	199211
Black tyraps (100 pieces) length: 35cm	199215

Eyelet terminals

Eyelet crimp ring terminal, copper tinned, according to DIN46234, ideal to connect large diameter cable for batteries and power electronics.

Connectors AMP - Crimp receptacle/Crimp Tab Terminal (nylon)

High quality connectors with a improved nylon insulation , resulting in a higher temperature rating then standard vinyl. Ideal for in high temperature areas like engine room, high power lighting , etc.

- Maximum working voltage 300V
- Temperature rating 105° Celsius
- According requirement UL94V0

Crimp tab terminal, male, 6.3mm, nylon	Blue	1,5-2,5 mm	10 pcs.	AMP740NBLU-BL
Crimp tab terminal, male, 6.3mm, nylon	Blue	1,5-2,5 mm	50 pcs.	AMP740NBLU-DS
Crimp tab terminal, male, 6.3mm, nylon	Yellow	2,5-6 mm	5 pcs.	AMP840NYLW-BL
Crimp tab terminal, male, 6.3mm, nylon	Yellow	2,5-6 mm	25 pcs.	AMP840NYLW-DS

Connectors AMP - Crimp Spade Connectors (vinyl)

High quality crimp spade connectors with a standard vinyl insulation, as used in many industries.

- Maximum working voltage 300V
- Temperature rating 75 ° Celsius
- According requirement UL94V0

Description	Color	Cable diameter	Packaging unit	Item no.
Crimp spade connector, 5mm, vinyl	Blue	1,5-2,5 mm	10 pcs.	AMP665BLU-BL
Crimp spade connector, 5mm, vinyl	Blue	1,5-2,5 mm	50 pcs.	AMP665BLU-DS
Crimp spade connector, 5mm, vinyl	Red	0,5-1,5 mm	10 pcs.	AMP645RED-BL
Crimp spade connector, 5mm, vinyl	Red	0,5-1,5 mm	50 pcs.	AMP645RED-DS
Crimp spade connector, 6mm, vinyl	Blue	1,5-2,5 mm	10 pcs.	AMP666BLU-BL
Crimp spade connector, 6mm, vinyl	Blue	1,5-2,5 mm	50 pcs.	AMP666BLU-DS
Crimp spade connector, 6mm, vinyl	Red	0,5-1,5 mm	10 pcs.	AMP646RED-BL
Crimp spade connector, 6mm, vinyl	Red	0,5-1,5 mm	50 pcs.	AMP646RED-DS
Crimp spade connector, 6mm, vinyl	Yellow	2,5-6 mm	5 pcs.	AMP686YLW-BL
Crimp spade connector, 6mm, vinyl	Yellow	2,5-6 mm	25 pcs.	AMP686YLW-DS
Crimp spade connector, 8mm, vinyl	Yellow	2,5-6 mm	5 pcs.	AMP688YLW-BL
Crimp spade connector, 8mm, vinyl	Yellow	2,5-6 mm	25 pcs.	AMP688YLW-DS
Crimp spade connector, 10mm, vinyl	Yellow	2,5-6 mm	5 pcs.	AMP690YLW-BL
Crimp spade connector, 10mm, vinyl	Yellow	2,5-6 mm	25 pcs.	AMP690YLW-DS

Connectors AMP - Crimp Spade Connectors (nylon)

High quality connectors with a improved nylon insulation, resulting in a higher temperature rating than standard vinyl. Ideal for in high temperature areas like engine room, high power lighting, etc.

- Maximum working voltage 300V
- Temperature rating 105° Celsius
- According requirement UL94V0

Description	Color	Cable diameter	Packaging unit	Item no.
Crimp spade connector, 5mm, nylon	Red	0,5-1,5 mm	10 pcs.	AMP645NRED-BL
Crimp spade connector, 5mm, nylon	Red	0,5-1,5 mm	50 pcs.	AMP645NRED-DS

Crimp butt splice terminal, nylon	Red	0,5-1,5 mm	50 pcs.	AMP545NRED-DS
Crimp butt splice terminal, nylon	Blue	1,5-2,5 mm	10 pcs.	AMP546NBLU-BL
Crimp butt splice terminal, nylon	Blue	1,5-2,5 mm	50 pcs.	AMP546NBLU-DS
Crimp butt splice terminal, nylon	Yellow	2,5-6 mm	5 pcs.	AMP551NYLW-BL
Crimp butt splice terminal, nylon	Yellow	2,5-6 mm	25 pcs.	AMP551NYLW-DS

Cable bushings

Waterproof cable gland brass chrome plated

Cable bushings

Description	Cable diameter	Item no.
Cable gland	6 mm	020006
Cable gland	8 mm	020008
Cable gland	10 mm	020010
Cable gland	12 mm	020012
Cable gland	16 mm	020016
Cable gland	19 mm	020019

Thru deck cable bushing SS316

Curved cable glands high polished stainless steel 316, the 19mm en 27mm are extreme heavy duty casting versions.

Description	Cable diameter	Item no.
Cable gland	19 mm	501013
Cable gland	27 mm	501012
Cable gland	49 mm	501011

Scanstrut Deck seals

IPX7 waterproof cable glands to prevent unwanted water from entering your cabling. Available in plastic or stainless steel 316 outer ring. Very easy to assemble. Also suitable for cables already mounted with a plug.

Description	Model / type	Version	Cable diameter	Diameter connector	Protection class	Item no.
Deck seal transit	Horizontal	Micro	2-6 mm		IPX7	DS6-P
Deck seal gland	Mini	Mini	2-8 mm	16 mm	IPX7	DS16-P
Deck seal gland	Mini	Mini	2-8 mm	16 mm	IPX7	DS16-S
Deck seal gland	Small	Small	4-9 mm	21 mm	IPX7	DS21A-P
Deck seal transit	Small	Small	4-9 mm	21 mm	IPX7	DS21A-S
Deck seal transit	Small	Small	9-14 mm	21 mm	IPX7	DS21B-P
Deck seal transit	Small	Small	9-14 mm	21 mm	IPX7	DS21B-S
Deck seal transit	Medium	Medium	9-14 mm	30 mm	IPX7	DS30-P
Deck seal transit	Medium	Medium	9-14 mm	30 mm	IPX7	DS30-S
Deck seal transit	Large	Large	12-15 mm	40 mm	IPX7	DS40-P
Deck seal transit	Large	Large	12-15 mm	40 mm	IPX7	DS40-S
Deck seal transit	Horizontal	Horizontal	6-10 mm		IPX7	DS-H10
Deck seal transit	Micro	Horizontal	2-6 mm		IPX7	DS-H6
Deck seal transit	Multi	Multi	18 mm		IPX7	DS-MULTI

Scanstrut bulkheads

IP67 waterproof cable passage for different cable thicknesses or a combination of cables. Very easy to install. Molded heavy duty nylon.

Description	Cable diameter	Protection class	Item no.
Cable passage	4 x 16 mm	IP67	TBH-4
Cable passage	10 x 7 mm	IP67	TBH-10

Recessed and surface mount connections

Watertight DC sockets

DC-plug with anti-moisture seal and threaded cord output. Equipped with a LED voltage indicator and replaceable 10 Ampère fuse. Applicable in all standard 12 volt sockets.

Pos.	Description	Item no.
1	Plug	12VPG
2	Socket	12VRCW.OEM
3	Extension cable	12VXT

Heavy Duty watertight DC sockets

HD waterproof DC deckconnector.

Pos.	Description	Item no.
1	Socket plug 2-pole	020202
-	Socket plug 3-pole	020203
-	Socket plug 4-pole	020204
2	Socket plug 2-pole HD	020222
-	Socket plug 3-pole HD	020223
-	Socket plug 4-pole HD	020224

Circuit breakers

Earth switches are used as protection against insulation failure in electrical circuits. They switch off if the differential current exceeds 30mA. Double pole executed, CE-rated, VDE-marked, DIN rail mounting.

Description	Voltage	Current	Sensitivity	Width	Item no.
Earth leakage switch	230 V	25 A	30 mA	35 mm	031001
Earth leakage switch	230 V	40 A	30 mA	35 mm	031003

Circuit breakers & Switches

Residual circuit breakers

An earth leakage switch is used as a protection against insulation failure and as protection against excessive current in electrical circuits. This earth leakage machine turns off the current voltage if the differential current exceeds 30mA or if the total power taken exceeds 16A. Single pole with zero. This machine follows the C characteristic and has CE-certification and VDE-mark. DIN-rail mounting.

Description	Voltage	Current	Sensitivity	Width	Item no.
Earth leakage switch	230 V	16 A	30 mA	35 mm	031005

Installation boxes

Made of plastic

Pos.	Description	No. of circuit breakers	L x W x H	W x H	Item no.
1	Installation cabinet	4 pcs		105 x 170 mm	0314
1	Installation cabinet	6 pcs		135 x 170 mm	0315
1	Installation cabinet	10 pcs		220 x 170 mm	0316
2	Installation cabinet	2 pcs		47 x 133 mm	030002
2	Installation cabinet	4 pcs		82 x 133 mm	030004
2	Installation cabinet	6 pcs		119 x 160 mm	030012
2	Installation cabinet	8 pcs		155 x 160 mm	030016
3	Installation cabinet	2 pcs	46 x 145 x 58,5 mm		032102
4	Installation cabinet	4 pcs	82 x 145 x 58,5 mm		032104
5	Installation cabinet	10 pcs	200 x 145 x 58,5 mm		032110

Circuit breakers

Single pole circuit breakers are used in 12, 24 or 48 volts installations. The machines follow the C characteristic and have CE-certification and VDE-mark. DIN rail mounting.

Description	Current	Width	Item no.
Circuit breakers	6 A	17,5 mm	031006
Circuit breakers	10 A	17,5 mm	031010
Circuit breakers	16 A	17,5 mm	031016
Circuit breakers	20 A	17,5 mm	031020
Circuit breakers	25 A	17,5 mm	031025
Circuit breakers	32 A	17,5 mm	031032
Circuit breakers	50 A	17,5 mm	031050

Circuit breakers with zero

Double pole circuit breakers are used in a 230V AC system. The machines follow the C characteristic and have CE-certification and VDE-mark. DIN rail mounting.

Description	Current	Width	Item no.
Circuit breaker with zero	6 A	35 mm	032006N
Circuit breaker with zero	10 A	35 mm	032010N
Circuit breaker with zero	16 A	35 mm	032016N
Circuit breaker with zero	20 A	35 mm	032020N
Circuit breaker with zero	25 A	35 mm	032025N
Circuit breaker with zero	32 A	35 mm	032032N
Circuit breaker with zero	40 A	35 mm	032040N
Circuit breaker with zero	50 A	35 mm	032050N
Circuit breaker with zero	63 A	35 mm	032063N

Mounting accessories for circuit breakers

For 56 or 28 single pole circuit breakers.

Pos.	Description	No. of circuit breakers	Item no.
1	Connection bracket for single pole device, 56 modules	56 pcs	032201
1	Connection bracket for single pole device with zero, 28 modules	28 pcs	032211
	Dinrail for machines and switches		0323
2	End piece	56 pcs	032200

Bosch ignition switch

Description	Version	Item no.
Ignition switch (on/off/start)	Without glow-plug switch	0231

Ignition switches

Bosch starting switch

Pos.	Description	Version	Item no.
1	Ignition switch without glow function	Without glow-plug switch	47200
2	Ignition switch with glow function	with glow-plug switch	47201

Sockets

This socket is made of high-grade plastic. Double pole +RA, suitable for 16A and 250V. These sockets can also be provided with a hinged cover, which you can order separately

Installation diam. : 42,5 mm
L x W : 60 x 60 mm
Bolt distance : 46 x 46 mm

Color	Version	Installation depth	Item no.
Brown	Texture	31 mm	10020-35BR
Grey	Texture	31 mm	10020-35G
Gold gloss	Plane	31 mm	10020-35GTHGAG
Silver gloss	Plane	31 mm	10020-35GTHGAS
Silver matt	Plane	31 mm	10020-35GTMGAS
Black gloss	Plane	31 mm	10020-35HGSCCH

Black	Texture	31 mm	10020-35SCH
Silver matt	Texture	31 mm	10020-35STMGAS
White	Texture	31 mm	10020-35W

Cigarette sockets

Socket for cigarette lighter. Available in different colours. Double pole

Installation diam. : 40 mm
x W : 60 x 60 mm
Bolt distance : 46 x 46 mm

Pos.	Voltage	Current	Color	Version	Item no.
1	6-24 V	10 A	Brown	Texture	10021-35BR
1	6-24 V	10 A	Grey	Texture	10021-35G
1	6-24 V	10 A	Black	Texture	10021-35SCH
1	6-24 V	10 A	White	Texture	10021-35W
2	6-24 V	20 A	Grey	Texture	10022-35G
2	6-24 V	20 A	White	Texture	10022-35W

Antenna sockets

This socket is made of high-grade plastic. For connecting the (coax)cable of television and satellite.

Installation diam. : 29 mm
L x W : 60 x 60 mm
Bolt distance : 46 x 46 mm

Color	Version	Installation depth	Item no.
Grey	Texture	14 mm	10046TVSATG
Black	Texture	14 mm	10046TVSATSCH
White	Texture	14 mm	10046TVSATW

DVD- / TV-adapter

This socket is made of high-grade plastic. For connecting the (coax)cable of television and DVD-player. The top connections are both for coax, the bottom connection is a cinch.

Installation diam.	: 29 mm
L x W	: 60 x 60 mm
Bolt distance	: 46 x 46 mm

Color	Version	Installation depth	Item no.
Grey	Texture	14 mm	100433DVDTVG
Black	Texture	14 mm	100433DVDTVSCH
White	Texture	14 mm	100433DVDTVW

Dimmers

These dimmers are indispensable on each ship. Within a instant you create mood lightning, or just enough light to read. Suitable for halogen as well as light bulbs. For the 10055 and 10058-dimmers you have to order seperately the cover, switch knob and frame (standard of Softline)

Installation diam.	: 57 mm
L x W	: 53 x 53 mm
Bolt distance	: 46 x 46 mm

Voltage	Installation depth	Item no.
230 V	34 mm	10055/105
230 V	34 mm	10055/350
12 V	34 mm	10058/60

Switches

Built-in switch made of high-grade plastic. The alteration switch is suitable for normal "on/off" as well as for the two-way switch. Beside that there are also single pole switches (the multi-circuit switches) onwhich double covers can be used.

Installation diam.	: 42,5 mm
L x W	: 60 x 60 mm
Bolt distance	: 46 x 46 mm

Pos.	Color	Version	Nr. of switches	Installation depth	Item no.
1	White	1-pole	1	10 mm	10710/1
1	White	1-pole	1	25 mm	10705/1
1	White	2-poles	1	25 mm	10705/2
1	White		1	10 mm	10710/6

2	White	2x 1-pole	2	25 mm	10705/5

Switches with light

Built-in switch made of high-grade plastic. If the switch is "on", the light will shine in the middle. Please keep in mind by ordering of a fitting cover that this one is provided with a lens. The light bulb works on 230V. The switch is also available in single pole, double pole or alteration switch. The alteration switch is suitable for normal "on/off" as well as for the two-way switch.

Installation diam.	: 42,5 mm
L x W	: 60 x 60 mm
Bolt distance	: 46 x 46 mm

Color	Version	Installation depth	Item no.
White	2-poles	25 mm	10196/2
White		25 mm	10196/6

Pulse switches

These built-in momentary switches (push button switches) are made of high-grade plastic. There are single and double switches. Also the single switch is available with a built-in light bulb. This light bulb works on 230V and will give light constantly, therefore this switch is particularly easy to use in dark areas (for example the engine room). For the switch with continuous lightning you have to use a cover with lens. Finally there is also a so called blind switch, which you can push for a longer time (for example to roll shutters up and down). These blind switches are also suitable for the dimmer of Hella, which you find in the chapter "Lightning". Please take into account the number of switches if you order the covers. The single switches are available in two different built-in depths.

Installation diam. : 42,5 mm
 L x W : 60 x 60 mm
 Bolt distance : 46 x 46 mm

2	Mounting block	8JA715 606-101

Charging current relays

Load current relay with make function, also useable as universal make relay.

Description	Item no.
Seperation relay 24V-50A	A112261

Digital isolating relays

Safely charge two battery banks from one charge such as an alternator or battery charger. Charges engine starting batteries before combining auxiliary bank for charging. Protect start batteries from becoming flattened by domestic loads. Isolates electronics from harmful electrical surges from starter motors. Simple to install 3 wire connection leaves alternator wiring intact. No volt drop vs diode isolators. Ignition protected. Surface or panel mountable. Multi voltage, auto selects between 12 and 12 V DC operation. Digital circuits provide very low power consumption and enhanced performance. Remote status LED outlet option.

Description	Voltage	Max. current	L x W x H	Item no.
Digital Voltage Sensing Relay (DVSR)	12/24V	140 A	69 x 69 x 50 mm	710-140A

Mastervolt Switches

Every electric switch onboard has to meet the highest demands. Mastervolt offers a wide choice of stylish, waterproof switches for a range of onboard functions. All fully waterproof switches (IP66) supplied by Mastervolt are tested for frequent use at -40 °C to 85 °C, and designed to last more than 150,000 cycles. They are available in single or double pole versions and in various configurations. Brackets around ON and OFF in product name denote momentary connection only. Light color: green.

Mastervolt Switch frames

Convenience is a blessing: a Mastervolt waterproof switch is inserted into a weather-resistant installation sheath. Mount in the existing dashboard using sealant or glue or in the accompanying ready-made installation frame. Using such an installation frame guarantees a quick installation and smart appearance, for example on the outside helmsman's station. Use an electrical connection block (VCH) for insulating and securing the connections. Parts of frames with separate end segments are also available. If you wish to leave room for future expansion, use a blank auxiliary hole plug for places in which you have not (yet) placed any switches.

Hollex Battery selector switches

This battery selector switch has a continuous power of 230A and a momentum power (intermittent) of 345A.

Voltage	: 10-32 V	Current momentary	: 500 V
Switched current	: 230 A		
Current continuous	: 230 A		
Current intermittend	: 345 A		

Description	Voltage	Item no.
Battery switch	10-32 V	0202

These "on/off" switches are applied when the distance battery and battery switch is slightly larger. This saves assembly time and extra costs of thick, long cables. The battery switch can be placed close to the battery. Equipped with manual "override" function in accordance with CE and LED indication. Also has the same characteristics as the 701 and 701S. Power recording in "off" mode 12mA, in "on" mode 15mA, when switching "on/off" for 3 sec. 120mA (at 12 volts). Type 720-MDO can also be used in + and - leads and may have larger currents.

Voltage	: 9,5-32 V
---------	------------

Description	Item no.
Single engine connection set	715-V

Buzzers

Hollex built-in switch with LED ring. Made in aluminum and available in both lock and spring return. Available in a 12V and 24V with LED in several colours. This LED ring can be connected separately, allowing multiple functions, such as on/off recognition or alarm.

Voltage : 12V

Description	Voltage	Version	Lightcolor	Item no.
Buzzer	12 V	Buzzer	Red	020270
Buzzer	24 V	Buzzer	Red	020271

Easterner Led switchpanel WAVE

The WAVE 12V switch panel is made of hard ABS with reinforced corners. The switch panel is provided with 5 waterproof switches (20A) and 15 fuses. In addition the panel has a 12V cigarette lighter contact. A red led indicates when the switches are on. The panel will be supplied with a sealing.

Voltage	W x H	Item no.
12 V	107 x 96 mm	EP-91341LED

Switch panels

Easterner Led switchpanel WAVE USB

The WAVE 12V switch panel is made of hard ABS with reinforced corners. The switch panel is provided with 3 waterproof switches (20A) and 15 fuses. In addition the panel has a USB charger with 1A and 2A connection. A red led indicates when the switches are on. The panel will be supplied with a sealing.

Voltage	W x H	Item no.
12 V	107 x 96 mm	EP-91359LED

Mastervolt Juniorpanel

Especially for the lighter customers up to 15A there is a quality panel with 6 outgoing groups. Next to the on/off switch there is the fuse. In addition, you will find the function label system that you can compile yourself with the label printing system at: www.mastervolt.com/support/software.

Voltage	Nr. of switches	Color	W x H	Item no.
12/24 V	6	Grey	130 x 120 mm	75001000

BEP Switch panel 901H

Eight-way DC switch panel provided with automatic/switches, red LED indication and green lightning behind the text labels. The surface is of powder coated aluminum. The panel is pre-wired. Dimensions (L x H): 239 x 115

Nr. of switches	Version	Color	W x H	Item no.
8	2x 5A + 2x 10A + 3x 15A + 1x 20A	Black	115 x 239 mm	901H

BEP Switch panel 900-5WPS

Waterproof 5-way switch panel, with tumblers switches "on/off" up to 20 ampère. The switches have watertight tules. Including exchangeable mini fused and a label set.

Voltage	Nr. of switches	Color	H x W x D	Item no.
0-32 V	5	Black	95 x 107 x 65 mm	900-5WPS

Hella Switch panel Compact

Waterproof front panel with four on/off tumbler switches. Each switch is protected with a neopreen housing. The fuse is located behind the panel. The panels comply with IP X5 protection class. The maximum load for these panels is 12 V/20A. Will be supplied including screws and label set.

Pos.	Voltage	Nr. of switches	Color	H x W x D	Item no.
1	12 V	4	Grey	95 x 107 x 55 mm	020611
2	12 V	6	Grey	95 x 107 x 55 mm	020613
3	12 V	6	White	95 x 107 x 55 mm	020614

Hella Switch panel Contour

This fine panel with four switches is made of impact resistant plastic. The base plate is made of powder coated aluminum and between that the LED panel illumination provides the required readability. The labels have green lights, de on-function is indicated by red LED's. In this panel the auto switches are integrated to interrupt the circuit if necessary. The panel is pre-wired, will be supplied including connection parts and is suitable for 1b orh 2 and 24 Volt systems.

Pos.	Voltage	Version	Color	H x W x D	Item no.
1	12/24 V	1x 5A, 2x 10A, 1x 15A	Grey	115 x 127 x 65 mm	020616
2	12/24 V	2x 5A, 2x 10A, 3x 15A, 1x 20A	Grey	115 x 239 x 65 mm	020617
3	12/24 V	2x 5A, 2x 10A, 3x 15A, 1x 20A	Grey	200 x 127 x 65 mm	020618

Jabsco & Rule Bilge Switch panels

Illuminated water resistant switch panels for bilge pump with 3-way switch: "Automatic", "Off" and "On". The mode "Automatic" is shown by an indicator light. The Jabsco switch is available in 12V and 24V. The switch panel comes complete with mounting materials.

Pos.	Voltage	W x H	Item no.
1	12 V	73 x 60 mm	0237
1	24 V	73 x 60 mm	0238
2	12/24 V	100 x 60 mm	29140-0000

Fuses and accessories

Surge protection module

This module ensures that your electronics on board are protected against sudden harmful peak voltages. When the module detects a peak, it switches to protection mode and suppresses the peak voltage.

Description	Voltage	L x W x H	Item no.
Voltage protection module	12 V	69 x 69 x 50 mm	80-707-0004-00
Voltage protection module	24 V	69 x 69 x 50 mm	80-707-0005-00

ANL Blade fuses

These fuses have tinned connection strips and are equipped with a control window.

Description	Voltage	Current	Item no.
Fuse ANL 50A	Max. 48 V	50 A	A330865
Fuse ANL 60A	Max. 48 V	60 A	A330866
Fuse ANL 80A	Max. 48 V	80 A	A330867
Fuse ANL 100A	Max. 48 V	100 A	A330868
Fuse ANL 125A	Max. 48 V	130 A	A330869
Fuse ANL 160A	Max. 48 V	160 A	A330870
Fuse ANL 200A	Max. 48 V	200 A	A330872
Fuse ANL 250A	Max. 48 V	250 A	A330874
Fuse ANL 300A	Max. 48 V	300 A	A330876
Fuse ANL 500A	Max. 48 V	500 A	A330879
Fuse ANL 80A	Max. 48 V	80 A	IP80
Fuse ANL 100A	Max. 48 V	100 A	IP100
Fuse ANL 150A	Max. 48 V	150 A	IP150
Fuse ANL 200A	Max. 48 V	200 A	IP200
Fuse ANL 250A	Max. 48 V	250 A	IP250
Fuse ANL 300A	Max. 48 V	300 A	IP300
Fuse ANL 425A	Max. 48 V	425 A	IP425
Fuse ANL 500A	Max. 48 V	500 A	IP500

ANL Fuse holders

These fuse holders are ideal for protecting today's demanding onboard power electronics technology. For ANL fuses. Equipped with control window.

Pos.	Item no.
2	2581010
2	A330851
3	A330852

BEP ANL Fuse holder

BEP fuse holder for ANL fuse. Suitable for currents of 80-500A. The fuse holder is placed in a plastic housing and has removable sides. Also provided with a control window. CE approved.

Description	Item no.
ANL fuse holder	704-ANL

Maxi Blade fuses

Applicable in, among other things, Maxi flat-rate fuse.

Voltage	Current	Item no.
0-32 V	30 A	BFHD-30A
0-32 V	40 A	BFHD-40A
0-32 V	50 A	BFHD-50A
0-32 V	60 A	BFHD-60A
0-32 V	70 A	BFHD-70A
0-32 V	80 A	BFHD-80A

Maxi Fuse holders

The MAXI flat-rate fuse holder is ideal for securing battery chargers. Fuse values 30-80 Amps to be applied. The connections have a diameter of 6 mm and the maximum artery thickness is 25 mm² in an eye of 6 mm. The fuse is clamped into two tinned copper contacts. Provided with a plastic cover. The in-line fuse holder is designed for low-space installations and a fuse between a cable must be placed.

Pos.	Description	Voltage	Max. fuse value	L x W x H	Item no.
1	Maxi flat-rate fuse holder	Max. 32 V	30/80 A	71 x 53 x 36 mm	702-MFH
2	In-line fuse holder MAXI	Max. 32 V	30/80 A	80 x 55 x 15 mm	HDBFH

ATC Blade fuse

ATC flat-rate fuses are corrosion resistant. At short circuit and overload they quickly turn on to protect your system.

Voltage	Current	Item no.
Max. 32 V	3 A	J03A
Max. 32 V	5 A	J05A
Max. 32 V	7,5 A	J7.5A
Max. 32 V	10 A	J10A
Max. 32 V	15 A	J15A
Max. 32 V	20 A	J20A
Max. 32 V	25 A	J25A
Max. 32 V	30 A	J30A

ATC fuse holders

This fuse box is compact and easy to install. The fuses are quick to replace and easily accessible in the fuse box. Fuse boxes can be "stand alone" or used in conjunction. The cover is closed by a click system and, like the fuse holder, is manufactured from poly carbonate. The wiring is fixed by means of screws in the connectors for a fixed and firm connection. It is possible to place spare fuses.

Max fuse value: 30 Ampère

Max power through fuse box: 100 Ampère

Voltage	L x W x H	Item no.
Max. 32 V	80 x 90 x 47 mm	ATC-6W

BEP Single pole thermal breakers

Single pole thermal breakers sealed for use in engine compartments and bilge area applications. Featuring an unique reset mechanism providing visible indication of tripped position. These thermal breakers have a switchable reset and can be switched manually to isolate the circuit.

Voltage	Current	Item no.
Max. 30 V	50 A	185050F/DSP
Max. 30 V	80 A	185080F/DSP
Max. 30 V	100 A	185100F-01-1
Max. 30 V	150 A	185150F-01-1

Battery cable

Battery cable per 15 mtr	Red	95 mm	BK95FLEXRED

Prebit high-power interior led lighting combines energy-saving leds with a modern design. Mark our words: you will definitely find the lighting that meets your needs!

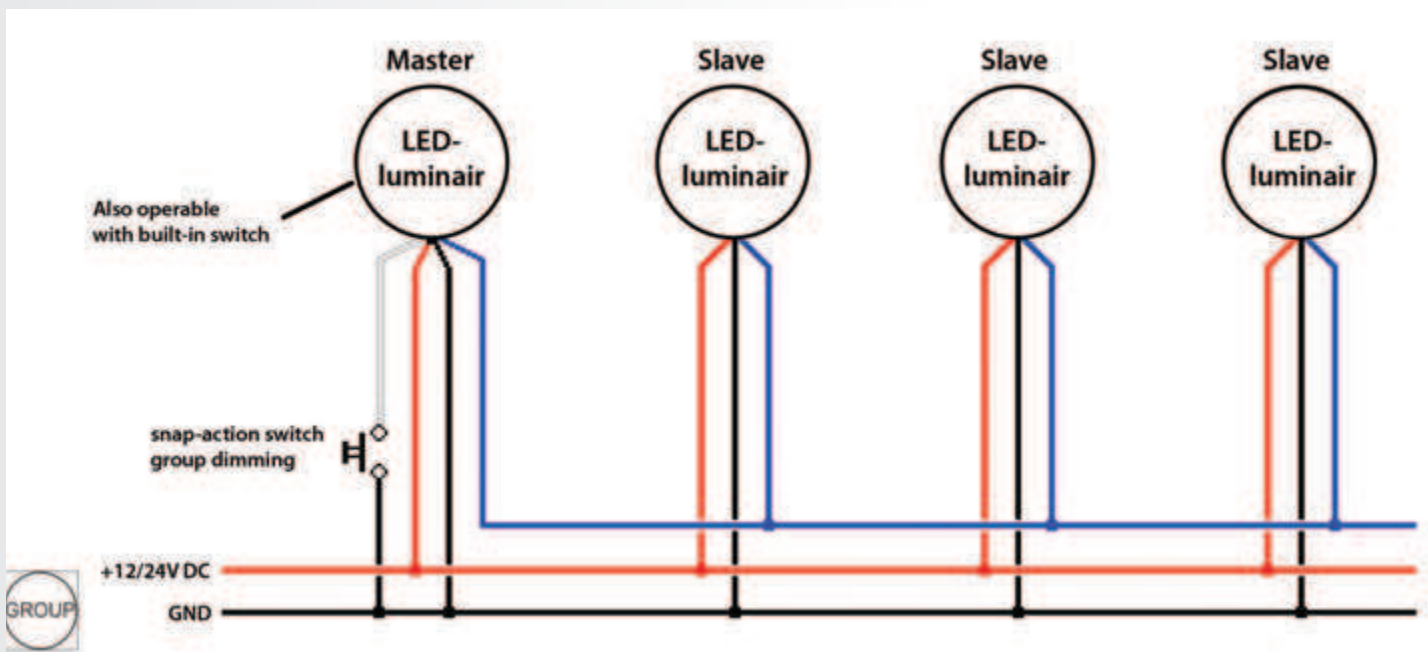

Multivolt High-power led

High-power led means a high output of light, but low electricity consumption and little heat development. The leds have a guaranteed long lifetime of approximately 50,000 burning hours. For this number of burning hours you would need 50 light bulbs or 12 halogens. Prebit led lighting is suitable for a multivolt power source of 12 till 30 V DC. This makes this lighting suitable for almost every vessel.

Lighting Groups and group dimming

If multiple luminaires are in one space, it's often desirable to switch several lights on or off simultaneously or to dim one group at once. With Prebit lighting this is very simple, which is unique. The so-called "Master and Slave" system builds a lighting group quickly and easily. The master luminaire is the leader of the group, through this fixture you can turn a group on or off, or dim the lights of the group. The Slave luminaires follow the Master and are therefore not independently operable. Both master and slave luminaires can also be mounted as "stand alone". For Slave luminaires you always need an external switch then. The master can be used without external switch. If you want to turn on (or off) the Master at two locations, you have to mount an external switch with the Master.

The following wiring diagram shows you how to apply Prebit lighting in a group. Because the schedule is so intelligent and simple, this system saves a lot of installation time. It is also possible to control the group dimming with the Masterbus system. For more information ask our Parts sales team.

Prebit Downlight EB12

This model is continuous dimmable and available in different types for color and finish and materials. For a complete lighting system, you can connect the EB12-2 (Master) to the EB12-1 (Slave) and EB12-3. The EB12-3 master and EB12-3 slave are versions with switchable colors, available in warm white / red and warm white/blue. It is also possible to combine the EB12-3 master together with EB12-3 slaves and EB12-1 slave. With this feature all the lights will be on in warm white, but when you switch color, the EB12-1 slave (only warm white) will be turned off. Through the so-called Master-Slave system you can dim multiple lights with one single button. Furthermore it is possible to control the master versions via an integrated switch or external momentary switch of your choice (this will work also when both are connected).

Voltage : 10-30V
 Power : 3W
 Diam. x Height : 70 x 3.5 mm
 Installation diam. x depth : 60 x 18 mm

Brightness : 285 Lm

Prebit finishing ring

These rings are designed to finish prebit spotlight neat. It prevents any visible traces of previous mounting. You can also vary these rings in design. For example, you can combine the gold spot with the chrome ring.

Model / type	Color luminaire	Item no.
EB12-1 rim	Chrome	50002305
EB12-1 rim	Chrome matt	50002307
EB12-1 rim	Gold	50002309

Prebit Downlight EB15

The EB15 is tiltable and available in various materials and colors. This ceiling connoisseur can be used in a group circuit: through a master in combination with 1 or more slaves, this group will be jointly controlled and dimmed. This ceiling fan is also available in a reversible warm white / red or warm white / blue version. Importantly, if one wants to take care of this for a complete or partial group, the master must in any event be a convertible version.

Voltage : 10-30 V
 Power : 3 W

EB13	SS316 polished	Green	23053111

Prebit Downlight EB32

Because of the high protection class, these lights are very suitable for marine applications. These types are steplessly dimmable. You can connect the EB32-2 (Master) to the EB32-1 (Slave) and type EB42-2 (Master) to the EB42-1 (Slave). Through the so-called Master-Slave system you can dim multiple lights with one single button. The EB32 has three LED lights. The EB42 is a bigger light and has six LEDs.

Voltage : 10-30 V
Power : 3 W
Diam. x Height : 85 x 4.7 mm
Installation diam. x depth : 60 x 16.5 mm

Brightness : 285 Lm

EB42-1 Slave	SS316 polished	Warm white	External	23304105

Prebit Downlight D1

These lamps have a satin acrylic lens, making the space comfortable illuminated. Available in three types. Type D1-1 (Slave) without dimmer. Types D1-2 (Master) and D1-3 with dimmer, to steplessly dim the light. Through the master-slave system, you can use the D1-2 (Master) to dim several D1-1 (slaves). The D1-3 offers switching between red light and warm white light. Red light is ideal during the night.

Voltage : 10-30 V
Power : 3 W

Hella downlight LED Slim Line Round

This LED lighting fixture can be used as ceiling or courtesy lighting. These lamps are equipped with four LEDs and are available with various color plastic rings. The polished ring is made of stainless steel 316. The lighting is waterproof according to IP67 (DIN 40060) and can therefore be placed inside or outside. The Slim Line Round series is CE-approved and pre-wired with 120 mm marine grade cable. These lights are externally dimmable via a LED suitable dimmer.

Voltage : 12 V
Power : 0,5 W
Max. draw : 0,5 W
Installation diam. x depth : 50 x 13 mm

Color luminaire	Lightcolor	Outer diam.	Item no.
Polished stainless steel	White	72 mm	010122

Hella downlight LED Slim Line Rakino

The Hella Slim Line LED mood lighting is available in light white and warm white. The Rakino white gives a powerful white light. For a softer and warmer light, you can choose the Rakino warm white. The light of the Rakino spread series spreads at an angle of 32°. With the waterproof housing and a 18.5 mm fitting depth, you can install the Rakino Spread series almost anywhere in your interior and exterior. To dim the Rakino spots, the Hella dimmer (5XA998572-001) or Hollex Dimperfect (0100.31021) are very suitable. The Slim Line Rakino series is CE-approved, UV resistant and pre-wired with 120 mm marine cable. Also suitable for Mastervolt digital switching.

Hella DuraLED

Heavy duty marine lamps. Outstanding light intensity, class leading efficiency and proven durability. DuraLed lamps provide powerful white light (5000K) and a safe, energy efficient and reliable alternative to incandescent and fluorescent lighting. Each lamp is completely sealed, impact resistant and shock resistant, ensuring an ultra long service life. Each lamp is pre-wired with 2.5m of twin core marine cable. DuraLed lamps are surface mounted and feature a unique installation system where the fastening load is taken up by a heavy duty nylon bush to eliminate possible stress on the lamp housing. These lamps are certified Ignition Protected and reverse polarity protected.

Hella Chart and reading LED Flexispot

These Hella LED Flexispot chart read lamps combine high light output with low power consumption. A big advantage of these lamps is the low heat output. The lamp is extremely shock resistant and has a long life. The map reading lamps are multivolt so they are suitable for voltages between 9 and 31 volts. The LED Flexispot lamps are available in two lengths: 150 mm and 400 mm. The power switch is located conveniently in the head of the lamp. The Flexispot is available with white light and red light. Red light is ideal in so-called "night running" situations. Important instruments or navigation cards remain well-lit with red light, and the outside view remains good. In white light, the eyes must adjust more if looking out in the dark. The Flexispot has a black housing and comes with 120 mm cable.

Voltage : 9-31 V
Power : 2 W
Max. power : 2 W

LED Downlight Mika

The Hollex downlight LED series will provide excellent quality and pricing. These downlights offer a broad range in pricing and models, but all the models are tested for durability, warm light color, high Lumen output and are dimmable. Also when the dimperfect dimmer is used, which has an integrated DC/DC converter, even the 12Vdc downlights can be used in a 24Vdc system. Absolutely noise and flickering free, guaranteed!

The "Mika" line provides outstanding design with the highest quality; 2700K, dimmable and multivolt. Of course these are long life versions with the highest quality COB LED module and oversized heat sink. The Hollex Mika is already proven and recognized by internationally known Dutch yachtbuilders, very often fitted as a OEM product in luxurious (super)yachts. Available in different versions.

LED Downlight Tycho

The Hollex downlight LED series will provide excellent quality and pricing. These downlights offer a broad range in pricing and models, but all the models are tested for durability, warm light color, high Lumen output and are dimmable. Also when the dimperfect dimmer is used, which has an integrated DC/DC converter, even the 12Vdc downlights can be used in a 24Vdc system. Absolutely noise and flickering free, guaranteed! The "Tycho" line provides a LED downlight for a very competitive price, and is often used for smaller boats, cabinets, closets, etc. Also a surface mounted version is available.

Courtesy lights

Hella Courtesy light 8560

Attractive and timeless LED courtesy lighting for a wide variety of interior and exterior lighting applications. Light is radiated downward at an angle of 30° making these lamps ideal for illuminating on board areas such as steps, stairs, toe kicks, storage areas, companion ways, deck fittings, signs and switches. Dualvolt electronics ensure constant light output in 12V or 24V DC systems. Easy Fit series lamps are completely sealed, shock and vibration resistant and represent reliable 'fit and forget' technology. Each lamp is pre-wired with 120mm of marine tinned cable and supplied with stainless steel screws.

Hella NaviLED Trio Tri colour navigation light

This new three-color lamp with anchor light is made of high-quality materials and features state-of-the-art technology. The lamp is equipped with an advanced heavy duty lens and a robust, UV and shock resistant housing. The lamp has been sealed, so no penetration of sea water is possible. The energy-efficient leds for port, starboard and fence lights consume less than 3.5 watts; The anchor light consumes less than 1.5 watts. The multivolt lamp guarantees constant, safe lighting at a voltage between 8 and 28 volts. The stainless steel 316 mounting tube provides reliable, easy-to-use and reliable protection of electrical connections. Pre-wired with 400 mm marine cable.

Hella Anchorlight NavILED 360 compact

Hella marine NavILED 360 lamps feature single LED efficiency, advanced Multivolt™ electronics and precision optics for reliable and highly visible all round lighting. The restyled NavILED 360 Compact All Round / Anchor lamp Hella marine series exists of pole mounted versions with fixed, fold down and plug-in base options. The NavILED 360 Compact series is long term durable in demanding marine environments. A power consumption of less than 1W power offers exceptional power efficiency for a 2 NM all round anchor lamp. Each lamp is completely sealed (IP67) and manufactured using Swiss Made Grilamid with unsurpassed properties. Long term stability against UV degradation coupled with high impact and chemical resistant meaning these lamps will not yellow, become embrittled or corrode. Internationally approved the NavILED 360 series meets the requirements of COLREG, USCG, ABYC-16, RCD and WHEELMARK. Multivolt™ circuitry provides constant illumination and circuit protection from 9-33V DC.

Hella Anchorlight NaviLED 360 compact surface mount

The Naviled 360 anchor lights are energy efficient and reliable. This all round lamp is available with a waterproof and UV and corrosion resistant black or white house that is suitable for build-up. With less than 2 watts of power, a white light beam is produced from at least 2 nautical miles. Using high-quality materials, the lights are maintenance-free and have a long service life. The lamps are multivolt to optimally function between 9 and 33 volts. The anchor lights are pre-wired with marine cable.

Hella Floodlights LED Megabeam Retro module 70

In this Megabeam specially developed for the maritime sector, four led lamps produce a huge light beam comparable to that of a building or work lamp. And that with low power consumption! This compact lamp is ideal as a floodlight or floodlight. Even on boats that are subject to heavy shocks and strong vibrations, the Megabeam is a reliable and maintenance-free lamp. The Hella led Megabeam comes with a stainless steel mounting bracket for standing mounting, and two meter cable. The lamp is fully sealed and therefore protected against (sea) water. The CE-approved Megabeam LED is equipped with Hella multivolt technology. That is, the lamp can be used in both 12V and 24V circuitry, and is protected against peaks and drops between 9 and 30 volts.

Hella Floodlights LED Module 70

Despite its small dimensions, the new Module 70 Gen 4 has three high-performance LEDs that generate 2100 lumens of crisp white light while consuming just 21W of power. (1.75A @ 12V DC). The close-range lens offers a wide and even distribution, ideal for cockpit, foredeck and work area illumination. Completely sealed (IP6K9K) and coated with the new CoroSafe technology this lamp is particularly suitable for the tough marine environment. Offering improved protection from damage with two extra layers and the combination of different coating processes, making the work lamp substantially more resistant to corrosion. Advanced Multivolt 9-33V electronics ensure reliable illumination and lamp protection even under severe voltage fluctuations and low battery conditions. Pre-wired with marine cable and a single bolt 316 stainless steel bracket, this work light can be installed quickly. Like all Hella marine LED lamps the Module 70 is supported with a 5 year warranty for complete peace of mind.

Hella Docking lights Xenon & Halogen

Compact, recessed arc spotlight with an advanced 'DE' lens. The lens provides a wide light angle that illuminates the immediate environment on the front of the bow. The principle of a 'DE' lamp is similar to a projector. An ellipsoid reflector directs the light onto a bulky lens that projects the light on the cleverly designed light distribution. Made with polished stainless steel 316 housing. Protection class IP67. The Xenon lamp consumes less power than the halogen lamp, gives 2.5 times more light and goes five times longer.

Hella Floodlight Seahawk

The Sea Hawk & Flush series is available on board. For example, consider the wheelhouse, the engine room and the front and rear deck. The led lights give an intense bright white light, are energy-saving, lightweight and they are made of high-quality materials. The housing is made of robust plastic. The holder of the Sea Hawk is made of polished stainless steel 316. You can easily rotate this holder. These wide radiators are suitable for the deck, the engine room and the wheelhouse. For those who want to install the lamp, the Flush is available. New is the Sea Hawk in XL version. This has three rows of leds, instead of the standard two rows. The XL is dimmable in two steps.

Hella Floodlight LED Sea Hawk XLB (spot)

The XLB floodlights generate over 2200 lumens of crisp, white light to illuminate the hardest to see places while continuing the durability and efficiency advantages accustomed to the proven Sea Hawk range. Sea Hawk-XLB housings are precision injection moulded from thermally conductive ceramic polymer. This advanced material draws heat from internal electronics for reliable long-term operation and eliminates the need for an aluminum housing removing corrosion risks in the harsh marine environment. Integrated dual outputs High output (2200 Lumens / 25W) and low light (220 lumens / 5W) intensity functions in both Spread and Spot lamps. * Not available in Pencil Beam lamps. Multivolt 9-33V DC Advanced electronics ensure constant and reliable light output and lamp protection even under severe voltage fluctuations and low battery voltages.

Hella Floodlight LED Sea Hawk R (spread)

Sea Hawk-R housings are 'Non-metal', precision injection moulded from thermally conductive ceramic polymer that is highly resistant to degradation, even under harsh UV. Effectively transferring heat away from internal electronics to external surfaces for reliable long-term operation, Hella marine's thermal polymer eliminates the requirement for an aluminum housing in this class of floodlight, removing potential surface deterioration and material corrosion risks associated with coated metal in the harsh marine environment. The Sea Hawk-R offers 550 lumens for only 7W of consumption. The engineered optical system illuminates with a wide, close-range spread over cockpits, foredecks or working areas on commercial and recreational vessels. Hella marine benchmarks such as protected 9-33V internal electronics, sealed, pre-wired cable assemblies, Grilamid lens for strength and UV resistance, easy friction based vertical adjustment, 316 stainless steel brackets and fastenings and the well-recognised 'Fit and Forget' 5 Year LED warranty are further advantages of the Sea Hawk series.

Hella Floodlight AS3 (spot)

A very powerful work lamp in led design with 2700 Lumen, available as a wide radiator and diffuser. The AS3 LED has 45 watts power consumption, at dim position 20W. The color temperature is 5000K, comparable to daylight. An integrated dimfunction can reduce the light output to about 50%, which is operated via an additional cable. The integrated thermal protection ensures a long life of the electrical components, even at extreme temperatures (- 40 ° to + 50 ° C). The lamp is also resistant to varying power supply. The housing has a coating that is resistant to dirt and salt and can be cleaned with a high pressure cleaner. The lamp comes with a stainless steel mounting bracket. Dimensions: W x H x D = 204 x 168 x 109 mm

Hella Hand held searchlight

Long range search lights with the energy saving advantages of Hella marine LED technology. Hella marine hand held search lights are vital tools for night sailing and essential for spotting looming obstacles from a safe distance, or dependable light in an emergency. Rugged construction and a new Corosafe coating system is specifically designed for the harsh marine environments so ideal for Coast Guard, fishing vessels, sailing boats and all types of recreational and commercial vessels. Multivolt™ technology ensures reliable illumination and lamp protection even under severe voltage fluctuations and low battery conditions. Advanced electronics provide reverse polarity, spike and over-voltage protection for long life and reliable operation.

Jabsco Searchlights SL

These Jabsco searchlights come complete with remote controls. Tough, weatherproof and corrosion resistant design. They are available in five types. Sealed beam halogen bulb. The 146 SL, 155 SL, 233 SL and 255 SL can move in two speeds, for easier searching the water surface. Supplied complete with watertight remote control for both horizontal and vertical movement by single joystick control and 2.5 m harness.

For your convenience, a second control panel complete with connections can be supplied as well.

Searchlight type 233 SL is a new model with some new features. This modern light has a Spot/Flood feature, to change the beam configuration steplessly from a spot to a flood. Another unique feature is the Auto Sweep. This means the light will continuously sweep ten degrees each side of the initial target spot. This powerful dual beam searchlight comes with a more advanced control compared to the other SL types.

Jabsco Searchlights RC

Jabsco's chromed or brass remote controlled searchlights are available in four models. All are with a sealed beam halogen bulb, only two models RC 150 are fitted with a Xenon HID (High Intensity Discharge) bulb. With the 12V-version of the RC 130 and RC 180 you can change the beam's width by the control panel. Variable speed remote control for both horizontal and vertical movement for fast search and precise targeting, by single joystick control. The searchlights are supplied with panel and 2.5 m harness (the RC 150 includes 4.5 m harness).

Of course we can supply you with longer cables and extra controls when desired.

Underwater light SMX

Lumishore Underwater lighting for yachts up to 18 meters. The lighting has an output of 800 - 2300 fixture lumens, works above and below water and features ATRB Active thermal roll-back. Suitable for 10-31V with a constant light output. The SM100 is equipped with warning system for low battery voltage and polarity protection. The housing is made of corrosion-resistant polymer AOM.

Model - Type	Voltage	Current	Brightness	Item no.
SMX100	10-31 V	3.0 / 1.5 A	3200 Lm	SMX100B

Dimperfect LED Dimmers

With this completely newly developed dimmer there are almost all the problems with it Dimming of LED solved. In the design, multiple functions are integrated to ensure that Make sure you can apply LED lighting easily. The main features in a row:

- Fully silent, no buzz and screaming possible
- Pulse operated, rotary knob and touch also possible as an option
- DC stabilizer, voltage variations by chargers and the like are no longer affected
- DC-DC converter, you can use our 12V LED lights in a 24V system
- Ompool and temperature protected
- Compact dimensions
- Applicable to almost our complete program led replacement lamps and fixtures
- Memory function, dimposition is remembered without board voltage

Pos.	Description	Voltage	Max. power	Item no.
1	Dimperfect 36W	10-30 V	36 W	0100.31021
-	Dimperfect 96W	10-30 V	96 W	0100.31024
3	Touchmodule for Dimperfect			0100.31022

Hollex PWM LED Dimmers Touch

This dimmer can be easily connected to the led bars by means of the plugged sockets. By simply touching the dimmer you can control it: short touch is on or it, finger stops activating the dimmer. Available in a build-up and built-in version.

Description	Voltage	Item no.
In-line Touch LED dimmer	12/24 V	0100.LEDC01
PIR sensor	10-30 V	0100.31009
Touch LED Dimmer 12/24V tbv Led Strips	12/24 V	0100.LEDC23

Hollex PWM LED Dimmers IR

This PWM dimmer can be used manually as well as with the supplied remote control. With this dimmer you can dimming both led and halogen lamps. The dimmer comes with a built-in cabinet, but it can also be mounted as a mounting.

Description	Voltage	L x W x H	Item no.
Dimmer infra-red	12/24 V	86 x 86 x 45 mm	0100.31005

Hella Halogen Dimmers

The 2 Group Dimmer increases bulb life through sophisticated internal voltage regulation, ensuring the lighting circuit voltage does not rise above 12V or 24V. As halogen bulbs also have a high inrush current on start up, the 2 Group Dimmer features 'soft-start' to further lengthen bulb life.

Description	Voltage	Power	Power per group	Item no.
Dimmer	12/24 V	200 / 400 W	100 / 200 W	5XA998 572-001

Inprojal Halogen Dimmers

These dimmers are indispensable on each ship. Within a instant you create mood lightning, or just enough light to read. Suitable for halogen as well as light bulbs. For the 10055 and 10058-dimmers you have to order separetely the cover, switch knob and frame (standard of Softline)

Description	Voltage	Permitted load	Item no.
Dimmer 12V 60W	12 V	60 W	10058/60
Dimmer 20 tot 105 VA	230 V	20 - 150 VA	10055/105
Dimmer 20 tot 350 VA	230 V	20 - 350 VA	10055/350

Accessories lights

Hollex LED Drivers

If you do not want to dimming your lighting, or if it is fitted with a Integrated dimmer, you can apply these DC-DC converters. By using a DC-DC converter, it is possible to use, for example, 12V fed products in a 24V board system. Furthermore, the converter provides a stable voltage; Sensitive equipment is better protected and your LED lights will last longer. We recommend that you use a DC-DC converter or stabilizer for all LED lights. Available in three power modes, you must adjust these converters to the desired output voltage.

Description	Voltage	Item no.
Voltage stabilizer 6-30V : 2-28V 120W 10 Amp	10-30 V	0100.21105
DC Converter 10-30V / 36W / 3Amp	10-30 V	0100.31028
DC Converter 10-30V / 54W / 4,5Amp	10-30 V	0100.31029

Hollex LED Accessories

Here you will find all the necessary tools to connect your led bars and ceiling nipples through standard power jacks. Except that this ensures faster installation time, it also makes it easy to connect the lighting. With the mentioned distribution box it is possible to set up a complete lighting group, which is centrally dimmed and switched.

Description	Item no.

Polk Stereos

Polk Stereo PA4A

The 200 watt PA4A has been designed and engineered with a solid, marine grade construction ensuring it will withstand the harsh elements encountered in a marine environment such as temperature fluctuations and UV and corrosion damage. This high-tech system features a two-piece modular design with a waterproof commander (IPX6) for the helm and hideaway module (IPX5). The commander features a detachable chrome trim ring, silicone rubber face cover and conformal coated circuit boards which prevent damage from high humidity and salt. It also has the capability to be easily integrated with a boat's digital control panel. Once the two systems are connected, the main control panel is able to perform all of the functions of the PA4A commander.

Visit your iTunes or Google Play store to download the Ultramarine app.

The Acqualink instruments are designed for performance, with ease of use remaining an important attribute. The use of solely premium material, such as mineral glass lenses, guarantees the highest level of reliability and readability, as well as low energy consumption.

All Acqualink instruments are lead free, a token of our commitment to environmental responsibility. In line with this, our production plant is ISO 14001:2009 certified. In addition, the timelessly elegantly stylish yet modern design of Acqualink displays and gauges provides your cockpit with pleasant clarity.

Every component of the Acqualink series fulfills highest standards with regard to functionality, design and quality.

The benefits of using Acqualink:

- Maximum precision and the deployment of pioneering technologies are equally important as ease of use and stylish design.
- All Acqualink components are made out of high class materials, like mineral glass, stainless steel and aluminum.
- All products are ISO / TS 9001 certified.
- Our plug and play solution design concept offers a high level of installation flexibility for panel and flush mounting instruments.
- A cross-platform standard offers maximum freedom in respect of cockpit customization.
- We ensure seamless integration and optimum utilisation of Acqualink devices for extreme conditions at sea.
- Harmonised dashboard look.

VDO Acqualink TFT Displays

Acqualink® multifunction TFT displays are available in 4.3" and 7" sizes. The full 24 bit / 16 million colors optically bonded displays feature transmissive layer technology for unprecedented and unsurpassed readability even in direct sunlight. The TFT display a wide array of data received from the Acqualink® NavBox or NMEA 2000®. Users can customize up to 40 different data pages with single, double, treble or quad grid layouts.

TFT displays can be daisy chained with other Acqualink® gauges, displays or NavControls using the unique VDO Bus or directly connected to the NMEA 2000® backbone (optional adapter cable required) for simple installation on any yacht.

7" TFTs are equipped with capacitive multi touch screens to slide between pages whereas 4.3" displays require the use of a NavControl unit for data input and operation.

- 1x plug with 2x Video Input
- 2x VDO Bus connectors
- Operating temperature range -20 °C / +70 °C

Ammeter White	12/24 V	150A - 60A	Ø 52 mm	A2C1338550001

VDO Acqualink Shunt

A shunt is a resistor that causes a small voltage drop. This voltage drop is mVolt is proportional with the current in ampère that goes through the resistor. This voltage is measured by the Ammeter. The advantage of the shunt is that thick wires are no longer needed at a high current (>10A). To measure the total flow you only need two thin wires from the measuring instrument to the shunt in the earth connection of the main system.

Description	Voltage	Range	Item no.
Shunt 60A	12/24 V	- 60A / 0 / + 60A	A2C59514043
Shunt 150A	12/24 V	- 150A / 0 / + 150A	A2C59514047

VDO Acqualink Engine Trim

The VDO Trimmer for the best tuning of your boat.

- < 100 mA
- Reverse polarity protection
- Anti-fog coated mineral glass lens
- Front & rear side protection rating IPX6, IPX9K
- Operating temperature range -20 °C / +70 °C

Description	Voltage	Range	Diameter	Item no.
Trim Black	12/24V	Up / Down	Ø 52 mm	A2C59501925
Trim White	12/24V	Up / Down	Ø 52 mm	A2C1338710001

VDO Acqualink Bezels

The front bezels are available in two colours: white or black. You can mount the bezels easily on the instruments by means of a clip-on system.

Description	Color	Diameter	Item no.
Acqualink Bezel	White	Ø 52 mm	A2C3979480001

Media-Box

The VDO MediaBox features a waterproof, compact and black box design that can be mounted literally everywhere on the boat. Listen to Radio and weather forecasts with it's built in AM / FM Tuner or connect a MP3 player or smart-phone via USB or Bluetooth to enjoy your favorite music. The MediaBox is NMEA 2000® certified and can be used with any compatible NMEA 2000® head unit or with the VDO Acqualink® or OceanlinkTFT Displays. Additionally VDO offers a free Remote App so the MediaBox can be used as a stand alone radio.

- AM / FM radio tuner with RDS – Backup memory
- Bluetooth audio player
- USB memory device MP3 player or smartphone
- Three band equalizer with volume control
- Power amplifier 4x 28 W (D class)
- NMEA 2000® certified
- IPX5 protection rating
- Operating temperature range -20 °C / +70 °C

Description	Voltage	Item no.
Media-Box	12/24 V	A2C59501980

Nav Sensor

The multifunctional Acqualink® Nav Sensor is the gem of all sensors. The inertial sensor complements the inbuilt satellite receiver module to provide accurate readings of the speed of travel as well as the pitch & roll (up and down) and YAW (sideways) motion of the boat. Compass readings can be displayed electronically thanks to the embedded compass, which also facilitate course corrections in electronic autopilots. The barometer and air temperature sensors are early indicators of forthcoming weather conditions.

- Standard MicroC connector for NMEA 200
- NMEA 2000® certified
- IP65 protection rating
- GPS Module: Position, time, boats vector, signal quality, satellites
- Compass: +/-40° tilt angle, <2° accuracy, alarm (rapid field strength change, tilt angle overrun, undervoltage condition)
- Barometer: Air pressure, air temperature inside the sensor
- Air temperature: -20°C / +65°C
- Inertial sensor: Resolution 1°/s
- YAW-range 100°/s, linearity +/-3°/s
- Acceleration-range 50 m/s², linearity +/-1 m/s²
- Calculated heeling, pitch & roll-range +/-50°
- Operating temperature range -20°C / +70°C

Description	Voltage	Item no.
NAV Sensor 360	12/24 V	A2C59501981

NMEA 2000® Wind Sensor

The wind vane turns in the direction of the wind and steers the wind direction gauge. The wind cups records the relative wind speed which in turn is displayed on the wind speed gauge.

Oceanlink

The Oceanlink series focuses on the needs of the modern sports and leisure boats market. It provides a modular instrumentation concept for electronic navigation and engine monitoring with NMEA 2000®, J1939 and analogue connectivity. The product line offers a wide range of functions as well as great flexibility in installation and design.

The Oceanlink series provides two different master instruments as centerpieces of the system: a 4.3" TFT and a round master instrument. Both instruments are information powerhouses, multifunctional tachometers and NMEA 2000® gateways with direct access to the engine CAN Bus. They display all available data (e. g. engine data, depth, course over ground and speed over ground), and send it to all NMEA 2000® devices and to up to 16 additional satellite instrument. All instruments come in a new and stylish design, with perfect to read modern dials

The benefits of using Oceanlink:

- Easy and effective use.
- Perfectly readable engine monitoring thanks to increased performance presentation.
- The EasyLink data connection and the Plug & Play solution provide a flexible installation of panel and flush mounting instruments.
- Decades of experience guarantee a fully reliable, modern navigation and engine monitoring system with NMEA 2000®.
- A solid housing design completely sealed against dust and highly water resistant (IPX5 front and rear).
- High quality precision instruments

VDO Oceanlink TFT Displays

Oceanlink TFT Display

The new Oceanlink 4.3" multifunction TFT display features a full 24 bit / 16 million colors optically bonded display with transmissive layer technology for perfect readability even in direct sunlight. The TFT displays and distributes a wide array of data received from NMEA 2000® and J1939 CAN Bus systems and analogue sensors directly connected to the display. Users can customize up to 40 different data pages with single, double, treble or quad grid layouts.

The Oceanlink 4.3" TFT sends the received data to up to 20 satellite 52 mm Oceanlink gauges. It also converts and sends J1939 and analogue data to the NMEA 2000® network and can be used as CAN Bus gateway.

- 1x NMEA 2000® connector
- 1x J1939 and 4x analogue input
- 1x Frequency input
- Operating temperature range -20 °C / +70 °C
- Optical bonded mineral glass lens
- Front & rear side protection rating IPX9

VDO Oceanlink Tachometer

Master Tachometer

The new Oceanlink Tachometer automatically presents all the key data up to 256 standard measurement values ranging from oil pressure and fuel consumption to operating hours – on a generously proportioned inverted dot matrix digital display. Besides a CAN interface with NMEA 2000® certified and SAE J1939 data protocol it features two inputs for analogue sensors. The innovative EasyLink data connection make the installation easy and cost effective. Satellite instruments for further dynamic measurement values receive updates from the central instrument every 20 ms.

Oceanlink is available in various designs and a number of bezel colour options. The instruments can also be conveniently integrated into customer-specific panel solutions.

The VDO Tachometer displays all important engine related data and distribute it to up to sixteen 52 mm satellite gauges.

- 1x NMEA 2000® input
- 1x J1939 and analogue input
- Reverse polarity protection
- Protection rating IPX5
- Operating temperature range -20 °C / +70 °C

Description	Range	Diameter	Item no.
Tachometer Black	0 - 3000 rpm	Ø 110 mm	A2C1065660001
Tachometer White	0 - 3000 rpm	Ø 110 mm	A2C1065670001
Tachometer Black	0 - 5000 rpm	Ø 110 mm	A2C1065720001
Tachometer White	0 - 5000 rpm	Ø 110 mm	A2C1065800001

Tachometer White	0 - 7000 rpm	Ø 110 mm	A2C1065820001

VDO Oceanlink Rudder Angle

The VDO rudder angle.

- < 100 mA
- Reverse polarity protection
- Anti-fog coated mineral glass lens
- Front & rear side protection rating IPX6, IPX9K
- Operating temperature range -20 °C / +70 °C

Description	Range	Diameter	Item no.
Rudder Angle Black	90°	Ø 52 mm	A2C1066080001
Rudder Angle White	90°	Ø 52 mm	A2C1066090001

VDO Oceanlink Speed GPS

GPS Speedometer

The new Oceanlink GPS Speedometer features an embedded GPS antenna, an inverted dot matrix LCD and NMEA 2000® connectivity. The LCD displays information like position, date and time and – if connected to a NMEA 2000® network – sea water temperature, depth and speed through water information. The IP65 waterproof design allows the installation on open or enclosed boats. Up to 20 satellite gauges of 52 mm each, can be connected thanks to the integrated EasyLink connectivity.

- 1x connector NMEA 2000®
- Reverse polarity protection
- Front & rear side protection rating IPX5
- Operating temperature range -20 °C / +70 °C

Description	Range	Diameter	Item no.

Oceanlink Bezel 4.3"	Black		A2C1083230001

Viewline

The Viewline instruments are certified by Germanischer Lloyd. The dial is available in black and white. Viewline instruments are fitted with highly visible, high intensity LED warning and indicator lights. The backlit lighting (from behind the dial) provides the instruments with a stylish look.

The reliable instruments have double lenses and are airtight sealed to prevent condensation (front according to IP 67, back according to IP52). Distracting reflections are practically eliminated and resistance to seawater is guaranteed.

Bezels

The VDO Viewline is a modular system. The instruments are standard supplied with a black round bezel or a white round bezel, some instruments also have a triangular chrome bezel as a standard. But you can easily replace the bezel to fit the Viewline instruments perfectly to your wheelhouse. You can choose the look of it as the front bezels are available in three colours: black, white and chrome. Each colour bezel is available in three variations: round, flat and triangular. You can mount the bezels easily on the instruments by means of a unique clip-on system. You can also choose for flushmount mounting of the Viewline instruments, but you will need a flushmount mounting set for that.

Order information

For fast and easy mounting of the instruments a Spinlock screw ring is supplied as a standard. Viewline instruments have a built-in diameter of 52 mm and/or 85 mm.

Engine control

VDO Viewline instruments monitor all engine functions. In the Viewline series a tachometer, engine hours counter, temperature gauges and an oil pressure gauge is developed.

VDO Viewline Tachometer and hours counter

The Viewline tachometers indicate the number of revolutions of the motor. The tachometer is available with or without operating hours counter (digital display). The display shows operating hours, voltage and time. One LED warning light is integrated as a standard. The tachometer with LCD will be programmed by Exalto. Therefore we need the following information: number of stator poles, diameter crankshaft pulley and diameter pulley dynamo. The operating hours counter makes it easy to stick to a proper maintenance schedule. It is only activated when the engine is running, so only genuine engine operating hours are counted. The operating hours counter is not preset or reset. The tachometers are suitable for the dynamo W-connection. For the other input signals you can contact our Sales Department Parts.

All gauges with other measurable ranges are available upon request.

Description	Voltage	Range	Diameter	Item no.
Tachometer, Hour Counter Black	12/24 V	0 - 3000 rpm	Ø 85 mm	A2C59512390
Tachometer, Hour Counter White	12/24 V	0 - 3000 rpm	Ø 85 mm	A2C59512396
Tachometer, Hour Counter Black	12/24 V	0 - 4000 rpm	Ø 85 mm	A2C59512391
Tachometer, Hour Counter White	12/24 V	0 - 4000 rpm	Ø 85 mm	A2C59512397

VDO Viewline hours counter

Description	Voltage	Diameter	Item no.
Hour Counter Black	12/24 V	Ø 52 mm	A2C59512453
Hour Counter White	12/24 V	Ø 52 mm	A2C59512454

VDO Viewline Tachometer

The Viewline tachometers indicate the number of revolutions of the motor. The tachometer is available with or without operating hours counter (digital display). The display shows operating hours, voltage and time. One LED warning light is integrated as a standard. The tachometer with LCD will be programmed by Exalto. Therefore we need the following information: number of stator poles, diameter crankshaft pulley and diameter pulley dynamo. The operating hours counter makes it easy to stick to a proper maintenance schedule. It is only activated when the engine is running, so only genuine engine operating hours are counted. The operating hours counter is not preset or reset. The tachometers are suitable for the dynamo W-connection. For the other input signals you can contact our Sales Department Parts.

All gauges with other measurable ranges are available upon request.

Tachometer White	12/24 V	0 - 4000 rpm	Ø 85 mm	A2C59512434

VDO Viewline Rudder Angle

The Viewline rudder angle instrument for wheel-controlled yachts and pleasure boats displays the current rudder position at all times. This indicator makes it easier to navigate out of harbours or through locks. The gauge is available in 52 and 85 mm installation diameters. Only rudder instruments of the same diameter can be combined.

Description	Voltage	Range	Diameter	Item no.
Rudder angle White	12/24 V	-45° to +45°	Ø 52 mm	A2C59514230
Rudder angle Black	12/24 V	-45° to +45°	Ø 52 mm	A2C59514154
Rudder angle White	12/24 V	-45° to +45°	Ø 85 mm	A2C59512411
Rudder angle Black	12/24 V	-45° to +45°	Ø 85 mm	A2C59512410
Rudder angle sensor for single station	6/24 V	-45° to +45°		A2C11029500
Rudder angle sensor for dual station	6/24 V	-45° to +45°		A2C11029600

VDO Viewline Speed over Ground (SOG)

This multifunctional gauge with segment display is intended for use in the marine market in open boats. Based on the ViewLine housing concept, the cluster provides an ideal IP protection class, a modern appearance and high quality standards. It provides many parameters in NMEA 2000® and there are several customization opportunities to meet specific customer demands

Description	Voltage	Range	Diameter	Item no.
GPS Speedometer Blackt	12 V	0 - 35 Kn.	Ø 110 mm	A2C59501782
GPS Speedometer Black	12 V	0 - 70 Kn.	Ø 110 mm	A2C59501781

VDO Viewline Speed through Water (LOG®)

On the analogue scale, this sumlog shows the vessel's speed. The digital display can show several functions, e.g. total distance or day/trip distance. The integrated warning led can be set to maximum speed. A complete sumlog set consists of: sumlog gauge, sender unit, vane wheel, sealable skin fitting and set of plugs. The complete sumlog set log consists of: sumlog gauge, sender unit, paddle wheel, sealable skin fitting and set of plugs.

Description	Voltage	Range	Diameter	Item no.
Sumlog Black	12/24 V	0 - 12 Kn.	Ø 85 mm	A2C595CPL11
Sumlog White	12/24 V	0 - 12 Kn.	Ø 85 mm	A2C595CPL13
Sumlog Black	12/24 V	0 - 50 Kn.	Ø 85 mm	A2C595CPL12
Sumlog White	12/24 V	0 - 50 Kn.	Ø 85 mm	A2C595CPL14
Sumlog Black	12/24 V	0 - 12 Kn.	Ø 85 mm	A2C59512404
Sumlog White	12/24 V	0 - 12 Kn.	Ø 85 mm	A2C59512407
Sumlog Black	12/24 V	0 - 50 Kn.	Ø 85 mm	A2C59512405
Sumlog White	12/24 V	0 - 50 Kn.	Ø 85 mm	A2C59512408
Sumlog Paddlewheel 8/12/18 Kn				270023005003D
Sumlog Paddlewheel 30/50 Kn				270023005005D
Sumlog through-hull fitting 0 - 30 - 50kn			Ø 39 mm	270023005010X

VDO Viewline Depth

The designer of this new VDO depth sounder clearly took the readability of the instrument at heart. You can read the depth on both the analogue scale and the digital display. The depth sounder works with a NMEA 0183 sensor. The integrated warning led can be used as a “shallow waters alarm”. For a complete depth sounder set, you will need an instrument, a NMEA 0183 triducer set and an adaptor cable.

Description	Voltage	Range	Diameter	Item no.
Depth 0-30m Black	12/24 V	0 - 30 m	Ø 85 mm	A2C59514247
Depth 0-30m White	12/24 V	0 - 30 m	Ø 85 mm	A2C59514250
Triducer NMEA-0183 Sensor Thru-Hull Mount Kit			Ø 39 mm	X11719000058

VDO Viewline Combi Depth

The VDO Combi depth log shows the vessel's speed at the analogue scale. The distance made and the day/trip distance can be read on the digital display. This instrument can take two different sensors: either the vane wheel from the sumlog (for speed and distance), or the triducer (NMEA 0183, for speed, depth and water temperature). integrated warning led can be set to maximum speed. For a complete combi depth log set, you will need a sumlog instrument, a triducer set and an adaptor cable.

Description	Voltage	Range	Diameter	Item no.
Depth LOG 0-12kn Black	12/24 V	0 - 12 Kn.	Ø 85 mm	A2C595CPL01
Depth LOG 0-12kn White	12/24 V	0 - 12 Kn.	Ø 85 mm	A2C595CPL03
Depth LOG 0-50kn Black	12/24 V	0 - 50 Kn.	Ø 85 mm	A2C595CPL02
Depth LOG 0-50kn White	12/24 V	0 - 50 Kn.	Ø 85 mm	A2C595CPL04

VDO Viewline Fuel Level

The Viewline fuel gauge provides information about the fuel level in the tank. The gauge is equipped with a red warning LED as a standard. By connecting a makepoint switch to the instrument, the warning LED can switch on when the fuel level reaches a minimum level. For fuel level measuring are two types of sensors available: the float sensor unit is mainly used in flat tanks with a limited height; seagoing vessels with a tanks height of maximum 1050 mm are advised to use a tubular sensor unit. The type of sensor decides which instrument should be ordered. The fuel gauge for a tubular sensor has to be adjusted to the sensor after installing the instrument. N.B: After the choice for a particular type of gauge is made, a different type of sensor cannot be used! The float sender unit has a resistance range of empty 0 - full 180 Ohm. The tubular sender unit has a resistance range of empty 60 - full 30 Ohm.

* Can also be used in combination with TS1 Ultrasonic transducer.

Description	Voltage	Range	Diameter	Item no.
Fuel level lever arm Black*	12/24 V	0 - 1/1	Ø 52 mm	A2C59514082
Fuel level lever arm White*	12/24 V	0 - 1/1	Ø 52 mm	A2C59514184
Fuel level tubular Black	12/24 V	0 - 1/1	Ø 52 mm	A2C59514079
Fuel level tubular White	12/24 V	0 - 1/1	Ø 52 mm	A2C59514182

Fuel level tubular	6/24 V	846,0 mm	Ø 80 mm	X10224021006

VDO Viewline Fresh Water

This fresh water gauge indicates the level of drinking water in the fresh water tank. The gauge should match the sensor: a capacity sender unit or a float sensor. The special water sender unit of two pins has no moving parts and is therefore very durable and reliable. Length of the sender can be adjusted to the depth of the tank. The alarm level of the fresh water gauge (capacity) is set at an LED alarm level from a tank capacity of 15% and lower. The material of which your fresh water tank is manufactured, decides which sender unit you must choose. A metallic tank needs a galvanic separated sender. You can also choose to measure the level of fresh water by means of a float sensor. With the instruments for a float sensor you will need to order a dropping resistor (check Accessories). N.B: After the choice for a particular type of gauge is made, a different type of sensor cannot be used!

* Can also be used in combination with TS1 Ultrasonic transducer.

Description	Voltage	Range	Diameter	Item no.
Fresh water lever arm Black*	12/24 V	0 - 1/1	Ø 52 mm	A2C59514097
Fresh water lever arm White*	12/24 V	0 - 1/1	Ø 52 mm	A2C59514192

VDO Viewline Voltmeter

The voltmeter displays the status of generator and battery and their loads on a voltage scale. Values exceeding the normal charging voltages can therefore be monitored exactly. Even potential deep discharges can be detected.

Description	Voltage	Range	Diameter	Item no.
Voltmeter Black	12 V	8 - 16V	Ø 52 mm	A2C59512545
Voltmeter White	12 V	8 - 16V	Ø 52 mm	A2C59512546
Voltmeter Black	24 V	18 - 32V	Ø 52 mm	A2C59512458
Voltmeter White	24 V	18 - 32V	Ø 52 mm	A2C59512459

VDO Viewline Waste Water

This water tank gauge indicates the level of black water. The capacity sensor can be adjusted to the depth of the water tank, with a maximum depth of 1500 mm. These galvanic separated sensors have a mounting flange for easy installation. The alarm level of the waste water gauge (capacity) is set at an LED alarm level from a tank capacity of 5% and higher.

Description	Voltage	Range	Diameter	Item no.
Waste water sensor Black	12/24 V	0 - 1/1	Ø 52 mm	A2C59512342
Waste water sensor White	12/24 V	0 - 1/1	Ø 52 mm	A2C59512343
Waste water sensor capacitive	12/24 V	80 - 600 mm	Ø 80 mm	N02240902
Waste water sensor capacitive	12/24 V	600 - 1200 mm	Ø 80 mm	N02240904
Waste water sensor capacitive	12/24 V	600 - 1200 mm	Ø 80 mm	N02240906
Mounting flange sender units				X1022400007

Ultrasoosensor

This transducer is multivolt. It is suitable for measuring levels of fuel, fresh water and waste water. Completely free of any moving parts. Can be set to the tank dimensions via computer, it measures with a precision of 2mm. The sensor can be applied in both metal as in non-metallic tanks. This transducer has a low profile design and a standard SAE5 hole mounting pattern, allowing it to fit perfectly to the mounting pattern SAE5. Using the programming tool, you can set the output to 240-33 Ohm, 10-180 Ohm or 0-5V. The maximum tank depth is 2000mm. Matching instruments from VDO Viewline are: A2C59514082/A2C59514184 for fuel and A2C59514097/A2C59514192 for (waste) water that utilise a float sender unit. With these instruments, the output from the transducer must be set to 10-180 Ohm.

Description	Voltage	Diameter	Item no.
Ultrasoon transducer	12/24 V	Ø 52 mm	BEPTS1
Ultrasoon transducer program kit			BEPTS1PK

VDO Viewline Coolant Temperature

This gauge displays the temperature of the cooling water. A warning LED is integrated as a standard. A makepoint switch or a sender unit with alarm contact can be connected to this gauge, to turn the LED on when the temperature rises to a critical point.

AC = Alarm contact

Other VDO sensors available upon request.

Description	Voltage	Range	Switch point	Outer thread	Diameter	Item no.
Coolant Temperature Black	12/24 V	120°C / 250°F			Ø 52 mm	A2C59514170

VDO Viewline Engine Oil Temperature

This gauge displays the temperature of the oil in the engine or gearbox. This instrument has a double scale; the main scale is in °C. The integrated warning LED ensures that a critical oil temperature can be quickly detected. The warning point depends on the used temperature sensor with warning contact or can be programmed by a makepoint switch (check Accessories) which is connected to the instrument.

AC = Alarm contact

Other VDO sensors available upon request.

Description	Voltage	Range	Switch point	Outer thread	Diameter	Item no.
Engine Oil Pressure Black	12/24 V	150°C / 300°F			Ø 52 mm	A2C59514160
Engine Oil Pressure White	12/24 V	150°C / 300°F			Ø 52 mm	A2C59514231

VDO Viewline Outdoor Temperature Meters

This temperature meter shows the outside temperature. You can also place the sensor in the engine compartment to keep an eye on the temperature.

Description	Voltage	Range	Diameter	Item no.
Outside air temperature sender Black	12/24 V	-25°C - +50°C	Ø 52 mm	A2C59512336
Outside air temperature sender White	12/24 V	-25°C - +50°C	Ø 52 mm	A2C59512338

VDO Viewline Pyrometers

This temperature gauge indicates the exhaust temperature in the near direction of the cylinder head (up to 900°C). The instrument measures the dry exhaust gas temperature. The relationship of this value to the maximum permitted exhaust temperature shows how efficient combustion is at that particular load. A rise in temperature is therefore an important early warning signal. You can extend the measuring cable only with the compensation-cable (N03320268). You can compile a complete pyrometer set by ordering the following products: instrument, sensor, compensation cable and weld fitting.

Do NOT shorten the standard cable lengths.

Description	Voltage	Range	Diameter	Item no.
Pyrometer Black	12/24 V	100°C - 900°C	Ø 52 mm	A2C59512332
Pyrometer White	12/24 V	100°C - 900°C	Ø 52 mm	A2C59512333
Pyrometer thermocouple probe	6/24 V	100°C - 900°C		N03320264
Exhaust pyrometer temperature sensor cable 6m				N03320268
Exhaust pyrometer temperature sensor welding flange				N03320266

VDO Viewline Engine Oil Pressure

This gauge displays the engine or gearbox oil's pressure. This instrument is equipped with a red warning LED as a standard. The warning point depends on the chosen pressure sensor with warning contact or can be controlled by installing a makepoint switch (see accessories). The oil pressure of the hydraulic gear is an important indication of the overall condition of the gearbox.

AC = Alarm contact

VDO Viewline Shunt

A shunt is a resistor that causes a small voltage drop. This voltage drop in mV is proportional with the current in ampère that goes through the resistor. This voltage is measured by the Ammeter. The advantage of the shunt is that thick wires are no longer needed at a high current (>10A). To measure the total flow you only need two thin wires from the measuring instrument to the shunt in the earth connection of the main system.

Description	Voltage	Range	Item no.
Shunt 60A	12/24 V	- 60A / 0 / + 60A	A2C59514043
Shunt 150A	12/24 V	- 150A / 0 / + 150A	A2C59514047

VDO Viewline Ammeter

The ammeter shows you the level of current being drawn and the supply current on a clearly readable dial. The shunt (a measurement resistor) can be inserted into the measurement point in a matter of seconds. The fine connecting cable that runs from the shunt to the gauge is safe and easy to lay without taking up much space. A 6 meter cable is supplied for the shunt. The shunt must be ordered separately.

Description	Voltage	Range	Diameter	Item no.
Ammeter Black	12/24 V	- 60A / 0 / + 60A	Ø 52 mm	A2C59512328
Ammeter White	12/24 V	- 60A / 0 / + 60A	Ø 52 mm	A2C59512330
Ammeter Black	12/24 V	- 150A / 0 / + 150A	Ø 52 mm	A2C59512329
Ammeter White	12/24 V	- 150A / 0 / + 150A	Ø 52 mm	A2C59512331

VDO Viewline Bezels

The front bezels are available in three colours: black, white and chrome. Each colour bezel is available in three variations: round, flat and triangular. You can mount the bezels easily on the instruments by means of a clip-on system. You can also choose for flushmount mounting of the Viewline instruments. Then, you will need the flushmount mounting set.

Description	Color	Diameter	Item no.
Viewline bezel	Black	Ø 52 mm	A2C53186040

VDO Viewline Connection cables & Mounting kits

All Viewline instruments come complete with connection cables. Please check below for replacement. If you already have an Ocean Line instruments set, and you want to replace an instrument by one from the Viewline series, then you can connect this Viewline instrument with the adapter cable easily to your instruments set. With the dropping resistor you can use 12 volts Ø 52 mm instruments on a voltage of 24 volts.

Description	Diameter	Item no.
Flushmount Kit	Ø 52 mm	A2C53215640
Flushmount Kit	Ø 85 mm	A2C53215641
Adapter cable for Ø 52 mm instruments (excl. RPM) for connecting Viewline instrument to Ocean Line set		A2C59510852
Suspension resistor for 12V instruments in 24V grid		A2C59510853
Suspension resistor for 12V instruments in 24V grid		NL-VL8pinvw24V

Makepointswitch & Alarm

The Viewline instruments are equipped with a LED warning light. This light warns you for critical situations. If a sensor unit without alarm contact is connected to an instrument, you can install the makepoint switch to upgrade the sensor unit. The makepoint switch is easy to install: simply plug the switch into the instrument and connect the sensor to the switch. An acoustic alarm can make you aware of a dangerous situation. VDO offers two types alarms: a waterproof 12/24V recessed alarm and a surface mounted type that is not waterproof.

Alarm buzzer ressed Ø 52 mm	Black	N03230702
Alarm buzzer surface mounted	Black	X1023600003
Alarm buzzer surface mounted	Black	X1023600002
Makepoint	Black	A2C59510886

Glendinning electronic engine control

Glendinning's electronic engine control can control one or more engines, and it supports up to six separate helm control stations. The intelligent controls and actuators are the most important elements of this system.

The Glendinning electronic engine control can be installed for a mechanical as well as electronic controlled gearbox and throttle. For each system a complete installation set is compiled, controls and cables for one helm station are included. The renewed Smart Actuator II is now also suitable for mechanical controlled gearbox and throttle, for inboard as well as for outboards and sterndrives.

Glendinning

Glendinning offers a solution for:

- a mechanical system.
- an electronic system.
- or a combination of both.

Easy installation

The electronic engine control is easy to install, thanks to:

- a small number of components. Therefore the system is not only easy to install, but this reduces the chance of interference as well.
- "plug-and-play" wiring
- the use of one type of communication cable, with identical connectors on either end. So no mistakes can be made when connecting the cables.

Easy in use

An important issue in developing the system was to make the engine control easy to use. This resulted in:

- Easy configuration of the system.
- When you change control station, you don't have to change to neutral first.
- You can choose to start in neutral warm position, where you are able to accelerate with the coupling in its neutral position.
- The possibility of automatic synchronisation of your engines ("open loop" or optional "closed loop").
- A clear manual with trouble-shooting chapter.
- The possibility of increasing or decreasing the rpm by means of buttons (throttle bump).

Smart Actuator II – for mechanical controlled gearbox and throttle

The electro-mechanical actuator converts the electronic commands that are generated by the control head into specific positions at the engine's gear and throttle. Communication goes through the proven CAN-bus-system.

The Smart Actuator II is smaller and lighter in weight than the first generation actuators. This actuator features the newest software and is suitable for inboard as well as for outboards and sterndrives. To protect your actuator even more from dust, filth and water, an elegant cover is supplied as a standard. You can turn the actuator on and off by means of a switch, which can be built into your dashboard

EEC Control Processor – for electronic controlled gearbox and throttle

With an electronic controlled throttle the installation of an EEC control processor is necessary for the electronic translation between control head and throttle. Brand and type of your engine are important to know for an optimum configuration of the electronic engine control. The EECs will be supplied fully configured; you only have to install the components and cables.

Controls

The intelligent single lever controls are available in single and twin versions. With one lever you can control both gear and throttle. The buttons on the control head provide you with extra functions. The solid housing guarantees stability and durability in even the most extreme marine environments. The controls included in the sets are chrome plated as a standard. On request the control heads can be supplied in metallic black or golden look finish. The controls comply with IP66.

Mechanical throttle and gear - inboard

No matter what type of propulsion system is equipped with, Glendinning is offering fit for purpose engine control systems. The Smart Actuator 2 electronic control system provide complete control of mechanically throttled and shifted engines. Check the table to find the right inboard set for single or twin engine applications. The sets are available in 12V and 24V. All sets include one master control for top mounting, smart actuator(s) and cables for installation. A communication cable in the right length (for the control) needs to be ordered separately.

Additional control stations (slave) are optional and require one extra communication cable for each additional control.

Mechanical throttle - outboard / sterndrive

For outboard or sterndrive systems with mechanically throttled and shifted engines. Glendinning offers engine control systems with integrated trim function. Check the table to find the right inboard set for single or twin engine applications. The sets are available in 12V and 24V. All sets include one master control for top mounting, smart actuator(s) and cables for installation. A communication cable in the right length (for the control) needs to be ordered separately.

Additional control stations (slave) are optional and require one extra communication cable for each additional control. The slave control systems also feature the integrated trim function.

Electronic throttle- and gear

Glendinning EEC electronic engine control for electronically throttled and shifted engines. The EEC control processor translates electronic orders from control to gearbox and throttle. The sets come complete with cables and chrome plated master control for top mounting. The EEC control systems will be pre-configured for the required type of engine. After installation of the components and the cables the system is ready for use.

If you want to install additional control stations, please order an (slave) control and one communication cable for each additional control.

Remote control - wired

The handheld remote control allows you to operate your electronic engine control system from virtually anywhere on board. The remote control features all standard functions of the stationary control(s). The remote control comes with a relay box. With this relay box accessories, for example a bow thruster or electronic rudder, can be controlled. There are two types of remote controls:

- Plug-in version: anywhere plug-in connectors are installed you're able to create an extra control station with the remote control. Please order an extra communication cable.
- Hardwired version: connect the handheld remote control to your "fixed" control station.

Pretech handheld remote control - "hardwired"	Glendinning electronic engine control system	11470635

ProPilot joystick control

The ProPilot allows simple and intuitive boat handling. Manoeuvring and docking by using the single joystick control. By simply moving or rotating the joystick, the engine and thrusters will effortlessly activate to move the boat in the required direction. The ProPilot system is suitable for installation on all inboard power boats and sailboats with thrusters. The ProPilot system can be used with any type of engine or transmission – single or twin engine and is compatible with any Glendinning "Complete Control" system. The control includes integrated thruster control buttons. Installation is extremely easy.

Teleflex Side mount control CH1700

The CH1700 dual action controls have an ergonomic design and advanced features. The control features neutral interlock, throttle (neutral) warm-up, and start-in-gear protection, drag adjustment. Power trim/tilt and emergency cut off switches come as an option. CH1700 controls are suitable for use both universal (3300 type) or OEM type control cables without adaptation. The CH1700 controls can be used in dual station applications.

Description	Version	Suitable for	Color	Item no.
Teleflex sidecontrol CH1700	Side mount	MAXFLEX 3300, 33c, EXTREME, supreme	Black / Chrome	221700

Teleflex Side mount control CH2800/CH2850

The CH2800 features unique twistgrip momentary switch for control of bow thruster or windlass and neutral "warm up" button for throttle only operation. Designed for steering pedestal or cockpit well mounting. Polished stainless steel lever with composite knob. Dual action design. Suits 3300, 33c type cables. The control can be mounted with or without cover plate. Suitable for use in dual station applications.

Description	Version	Suitable for	Color	Item no.
Teleflex sidecontrol CH2800 with switch	Side mount	MAXFLEX 3300, 33c, EXTREME, supreme	Chrome	222800
Teleflex sidecontrol CH2850	Side mount	MAXFLEX 3300, 33c, EXTREME, supreme	Chrome	222850

Teleflex Side mount control SL3

The SL3 side mount controls are dual action (throttle/shift) controls. The controls features start "in gear" protection, neutral interlock (side mount only), neutral engine warm up, adjustable drag. Suits 3300, 33c, OMC and Mercury cables. Easy to install due to various cable entry angles. Closed gear mechanism. Dual station application require the use of a DS unit.

Description	Version	Suitable for	Color	Item no.
Teleflex control SL3	Side mount	MAXFLEX 3300, 33c, EXTREME, supreme	Black	2272

Manual engine controls Single & Twin

Teleflex Side mount control STB

The ST and STB controls have a simple, classic design and durable chrome finish. The single-function lever is for one cable only. Versions are available for 3300/33C and 4300/43 type cables with or without external, adjustable throttle brake. The STB control includes a throttle brake.

Description	Version	Suitable for	Color	Item no.
Teleflex control STB	Side mount	MAXFLEX 4300, 43c	Chrome	2237
Teleflex control STB	Side mount	MAXFLEX 3300, 33c, EXTREME, supreme	Chrome	2246

Teleflex Top mount control CH7500

The CH7500 controls are advanced and have an ergonomic design. The controls feature throttle (neutral) warm-up and start-in-gear protection features, drag adjustment and optional neutral interlock and power trim/tilt function. The CH7500 controls suit both universal type (3300, 33c) or OEM type control cables without the need for adaptation. Can be use in dual station application with a DS-unit.

Description	Version	Suitable for	Color	Item no.
Teleflex control	Top mount	MAXFLEX 3300, 33c, EXTREME, supreme	Black /Chrome	227500

Teleflex Top mount control MT3

The MT3 controls are dual action topmount controls with a classic design. The sturdy controls have a chrome finish and are available in single or twin engine versions. The controls feature a built-in friction drag which reduces slippage and throttle creep. Comes with hardware for mentioned cables. For dual stations applications the use of a DS-unit is required.

Description	Version	Suitable for	Color	Item no.
Teleflex topcontrol MT3 Single	Top mount	MAXFLEX 3300, 33c, EXTREME, supreme	Chrome	2261
Teleflex topcontrol MT3 Single	Top mount	MAXFLEX 4300, 43c	Chrome	2262
Teleflex topcontrol MT3 Twin	Top mount	MAXFLEX 3300, 33c, EXTREME, supreme	Chrome	2263

Teleflex Top mount control SL3

The SL3 top mount controls are dual action (throttle/shift) (also available for side mount). The black satin finished controls are available for single or twin engine applications with or without trim and/or tilt switches. The controls features start "in gear" protection, neutral interlock (side mount only), neutral engine warm up, adjustable drag. Suits 3300, 33c, OMC and Mercury cables. Easy to install due to various cable entry angles. Closed gear mechanism. Dual station application require the use of a DS unit.

Description	Version	Suitable for	Color	Item no.

Kobelt Top- and Side mount controls

Kobelt controls are primarily used for managing propulsion on marine vessels. The controls are durable, high quality push-pull systems. The housing is made of bronze and makes the controls long lasting and dependable even in the harshest of environments. Kobelt controls are easy to install and maintain. Connection kits need to be ordered seperately. Controls are available in many versions, in case of special requirements contact our Parts sales dept.

Kobelt Dual Controls

The Kobelt 2091 / 2093 control system is a two station mechanical control system. One control is the master control and the other the slave (remote) control. Both controls work in tandem, moving at the same time to sync controls across multiple stations.

The 2091 / 2093 are made of solid bronze and stainless steel. Typical use is for a single engine configuration, with clutch and throttle functionality built into the single lever. The 2091 has a pull-out handle for overriding throttle. The 2091 maximum clutch stroke is 2 3/4" (70mm) and maximum throttle stroke is 2 1/4" (57mm), and requires a cable connection kit.

Description	Version	Suitable for	Color	Item no.
Kobelt dual control 2091/2093 brass	Top mount	Twin engines	Gold / Brass	530040
Kobelt dual control 2091/2093 chrome	Top mount	Twin engines	Chrome	530041
Kobelt dual control 2091/2093 black	Top mount	Twin engines	Black	530042

Kobel connection kits

Kobel connection kits offer ease of connectivity when configuring push-pull systems. When ordering Kobelt controls connection kits need to be ordered separately (one connection kit for each cable).

Description	Suitable for	Item no.
Connection kit	MAXFLEX 3300, 33c, EXTREME, supreme	530050
Connection kit	MAXFLEX 4300, 43c	530051

Exalto DS-unit

Easy to control your engine or gearbox from different helms. Made of brass and stainless steel.

Description	Suitable for	Item no.
Hollex DS-unit	MAXFLEX 3300, 33c, EXTREME, supreme	2208

Hollex Dual station unit

Dual station unit which, in case of dual station command, can be used for throttle only. Comes complete with stainless steel double cable clamp. Made of brass and stainless steel.

Description	Suitable for	Item no.
Hollex DS unit (throttle only) with cable clamp	MAXFLEX 3300, 33c, EXTREME, supreme	2245

Morse DS-units

Dual station unit for single or twin engine systems. Two dual station units per motor must be used in case of dual station command. One for the throttle lever and one for the gearbox lever. The dual station unit can be mounted on or remotely from the engine. Pos 1 is for throttle use only; pos 2 for gearbox use only. The gearbox unit is equipped with a latch control. The function of this control is to isolate the unattended control by using a station selector and a cable. The station selector and cable have to be ordered separately.

Pos.	Description	Suitable for	Item no.
1	Teleflex DS unit	MAXFLEX 3300, 33c, EXTREME, supreme	2243
1	Teleflex DS unit	MAXFLEX 4300, 43c	2244
2	Teleflex DS unit, with latch	MAXFLEX 3300, 33c, EXTREME, supreme	2219
2	Teleflex DS unit, with latch	MAXFLEX 4300, 43c	2220

Morse T-control

The T-control is used to control the latch control of the gearbox dual station unit. The station selector has connections for one or two MAXFLEX 3300 or 33c cables (can be used to lock one or two gearboxes).

Pos. 1: DS-unit for throttle

Pos. 2: DS-unit with latch control for gear

The T-control controls the latch control of the DS-unit on pos. 2.

Description	Suitable for	Item no.
Teleflex T-control	MAXFLEX 3300, 33c, EXTREME, supreme	2249

Pretech Stop system

Max bend radius : 8 / 203 "/mm

Dockmate wireless docking system

Dockmate is the wireless support for easy and safe docking. Dockmate offers easy control of your engine, yacht horn and as an option your bowthruuster, sternthruuster and anchorwinch.

Dockmate is a wireless extension of your engine controls. Everywhere on board you are in control. The Dockmate offers easy control with the tips of your fingers. State-of-art electronics ensures seamlessly integrati-on with the newest marine engines. Dockmate offers a modular system. Choose your modules and compile your own Dockmate system. Depending on your engine Dockmate offers three kinds of integration:

1. Analog
2. Digital CanBus technology
3. Directly on gearbox

The Dockmate system offers as a standard engine and Yacht horn control. For Dockmate pricing please inform at our sales department.

Dockmate Twist wireless docking system

Dockmate Twist makes manoeuvring even more responsive with the TWIST joystick control. The joystick controls both the gearbox and throttle of each engine plus the bow- and stern thrusters. With the Dockmate TWIST you can also operate 1 or 2 anchor winches and the horn. Another new feature is that the Dockmate TWIST comes with the brand new wireless charger.

The Dockmate Twist is a wireless extension of your engine controls. Everywhere on board you are in control. State-of-art electronics ensures seamlessly integration with the newest marine engines. Dockmate offers a modular system. Choose your modules and compile your own Dockmate system. Depending on your engine Dockmate offers three kinds of integration:

1. Analog
2. Digital CanBus technology
3. Directly on gearbox

For Dockmate pricing please inform at our sales department.

Wireless kill switch - Mob+ basepack

MOB+™ sets a new standard for wireless man overboard devices and safety onboard. MOB+ is developed to provide 100% stability and save you in just one second should you fall over board. WiMEA® Protocol is a revolutionizing wireless technology developed specifically for its purpose; to give you as a boat driver freedom and safety.

With 100% requirements for robustness and durability, only the most advanced wireless technology does the job. FELL Marine has therefore developed WiMEA® Protocol – Wireless Marine Electronics Algorithm.

MOB+™ basepack contains:

- MOB+™ xHub
- External antenna
- MOB+™ xFob
- Connector cable
- Battery
- Connectors

Description	Color	Voltage	Item no.
MOB+™ Basepack Kit Grey	Grey	10-32 V	72.380.116

Wireless Kill switch - xBand

With the MOB+ xBAND you get a highly marine durable silicon wristband. This enables you to use the xFOB at your wrist, always on – never intrusive. Available in several colors and designs that match your style.

Description	Color	Item no.
xBAND	Red	72.380.301
xBAND	Black	72.380.302
xBAND	Blue	72.380.303
xBAND	Yellow	72.380.304
xBAND	Pink	72.380.305

Wireless Kill switch - xTag

Let everyone who uses the boat have their personal kill switch. MOB+ xHUB has a memory for up to 20 xFOBs, this makes it possible for everyone in the family to use their xFOB when driving. No more hassle with finding that one cord for your boat. Select your favorite way of using the MOB+ Wireless Cut-Off Switch, using the xBAND or the xTAG option.

Description	Color	Item no.
xTAG red with black clip	Red	72.380.307

Wireless Kill switch - xFOB

Let every member of the family have their own xFOB for convenience and personalize the way they carry it.

Description	Color	Item no.
xFOB™ Transmitter	Red	72.380.117

Multi motor diode - Mob+

Diode style harness kit designed to be used with the MOB+ xHUB for multiple outboard installations. Typically, this accessory is only needed for Yamaha powered multiple engine boats but can be used in other situations. Kit is suitable for up to triple engine configured boats.

Description	Color	Item no.
MOB+ Multi Engine Harness	Black	72.380.401

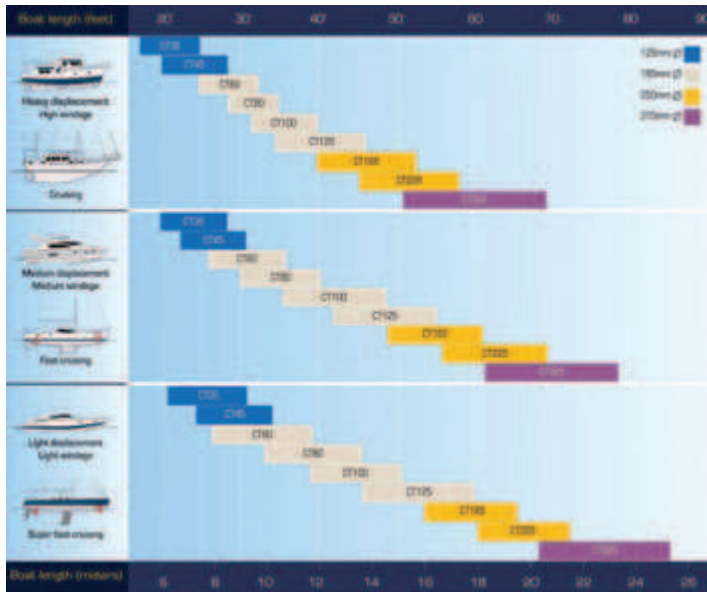

Electric thrusters ThrustEMS

ThrustEMS bowthrusters have a low noise and vibration level. The hydrodynamically shaped leg is made of seawater resistant bronze. The durable transmission uses hardened spiral gears to ensure a long lifetime. As a standard the bowthruster comes with a 6-blade skewback propeller and protective anode.

In both directions the bowthruster has an equal thrust. There are smart controls available as an option. With these controls several personal preferences can be set.

Founded in 1987, Max Power has developed a wide variety of products, destined for yachts of all types and sizes. Bow thrusters and stern thrusters have become a necessity even for the most skilled boatsman. Marinas have become overcrowded and docking manoeuvres cannot be applied easily and for that reason, the chances of damaging your boat have increased substantially. In order to gain total manoeuvring control of your boat, Max Power offers a wide variety of bow thrusters

Positioning thrusters is often as important as choosing the right thrust output when seeking maximum manoeuvring performance for your boat. Thruster turbines need to be placed one full propeller diameter under the water line to achieve optimum thrust. The thruster must also be positioned as far forward in the bow or as far back in the stern as possible.

How to choose the correct Thruster

For every boat owner it is important to choose the correct thrust rating (or relative power) whether it will be a tunnel thruster or a retractable thruster. For a boat of any given length, the area it offers to a direct side wind can vary from one design to another. The underwater shape and total weight can also differ greatly.

To help simplify the complicated calculations associated with the many variables in a boat design, we have designed the following chart to make your decision easier:

Electric Thrusters

Max Power offers a complete range of 12V/24V electric tunnel thrusters to suit motor boats and deep footed sailing yachts from 17' to 85' feet. The tunnel thrusters are designed for performance & durability. The patented composite drive legs have corrosion free composite drive legs eliminate the need for anodes and offer high manufacturing tolerances. The drive legs are pre-filled with oil and then sealed for life for zero maintenance. Case hardened spiro-conical gears guarantee a silent, smooth operation, and a long lifespan. Line shields protect oil seals from fishing lines and fouling. Max Power's high efficiency, purpose built DC motors ensure outstanding performance and long runtime ratings. An electronic control offers unique and unrivaled safety features. Solid copper contact bars guarantee safe, high power connections. Purpose built high specification DC contactors are both safe and durable. Max Power tunnel thrusters can be mounted in the bow or stern (for which an adapter is required).

Hydraulic thrusters

Max Power Hydraulic Tunnelthrusters are very maintenance-free and have a long life span. These bow thruster are very popular with ships that already have a hydraulic system. Hydraulic bow thruster can be installed in a humid environment, while there are no electrical components. Hydraulic installations can control the force proportionally, resulting in a variable thrust. Hydraulic bow thrusters have a long operating time. All hydraulic bow thrusters are fitted with two propellers.

Retractable Thrusters

Max Power's Compact Retract system provides a reliable and retractable bow thruster system for fast, modern sailing yachts from 11.5 to 15 meters. This system provides the solution to problems with installation depth and tunnel length in ships with a very slim hull shape. The compact system is available in 12 and 24 volts. The Compact Retract is equipped with two propellers and has a maintenance-free leg. In order to build the Compact Retract, you need a mounting flange. Available in polyester and aluminum. The Compact Retract comes with the control panel and intermediate cable. The assembly flange for the Compact Retract must be ordered separately. If your ship has a polyester hull, you can laminate the polyester mounting flange. An aluminum mounting flange is available for aluminum ships.

Voltage	Power	Power	Thrust	Item no.
12 V	6,4 pk	4,79 kW	70 kgf	RTE085012
24 V	7,1 pk	5,28 kW	85 kgf	RTE085024

Mounting flanges compact retractable thrusters

Max Power's Compact Retract system provides a reliable and retractable bow thruster system for fast, modern sailing yachts from 11.5 to 15 meters. This system provides the solution to problems with installation depth and tunnel length in ships with a very slim hull shape. The compact system is available in 12 and 24 volts. The Compact Retract is equipped with two propellers and has a maintenance-free tailpiece. In order to build the Compact Retract, you need a mounting flange. Available in polyester and aluminum. The Compact Retract comes with the control panel and intermediate cable. The assembly flange for the Compact Retract must be ordered separately. If your ship has a polyester skin, you can laminate the polyester mounting flange. An aluminum mounting flange is available for aluminum ships.

Description	Item no.
Max Power mounting flange aluminum for Compact Retract	RT085019
Max Power mounting flange polyester for Compact Retract	RT085020

Controls for thrusters - wired

Max Power's thruster control systems are childproof and incorporate unique safety features.

The control system software monitors for incoherent signals, stray voltage, and abnormally long thrust signals in order to help protect against malfunctions caused by water ingress and short circuits. Visual and audio alarms provide a 10 second warning before the overheat shutdown function is activated. If left idle for thirty minutes, the system itself switches off automatically.

Designed with technical details such as independent control power supply (protects relays against damage due to low voltage), and standard remote electric battery isolator control, Max Power's system is clearly ahead of the competition. These effective mechanisms ensure that your Max Power thruster is both safe and reliable thus guaranteeing peace of mind onboard.

Controls for thrusters - wireless

Max Power's radio remote control is designed to work with our entire range of tunnel and retractable thrusters. The remote control can also be used to operate additional onboard equipment such as windlasses, passarelles, cranes, etc.

- Supports up to 8 independently controlled channels
- Each receiver can switch 4 channels (12/24 V - 5 A)
- Each transmitter can handle 2 receivers (8 channels)
- Digital recognition avoids accidental activation of other systems
- Available in 868 MHz (Europe/Australia) and 915 MHz (USA/Canada)
- Transmitter power supply: 12/24V dc
- Zero power consumption when in standby mode (transmitter)
- Easy to install and set up, simple to use

Tunnel - GRP

Manufactured from fully isophthalic resin and pre-gel coated, Max Power's high quality tunnels have the added advantage of a first coat of matt before being filament wound. Cutting and drilling can therefore be carried out without the risk of damaging the gel coat on the inside surface of the tunnel. With an adapter the composite tunnel can also be used for a sternthruster, in which case an adapter is needed.

Cupa bow and stern thrusters

Manoeuvring safely

With a Cupa bow thruster, every helmsman can manoeuvre his vessel precisely. Busy harbours, full locks and mooring with strong wind are no longer a problem. The reliable bow thruster gives the helmsman full control over his vessel.

Features Cupa bow thrusters:

- no loss of space in the vessel, because the motor is installed in the cross-pipe
- no chain driven propulsion, and therefore noise-free and efficient
- motor is cooled completely by the surrounding water
- reliable construction
- thermal secured
- easy to install
- easy serviceable because the complete unit can be taken out

A Cupa bow thruster for every vessel:

CP40

With a thrust of 40 kgf (400 Newton) this is especially designed for vessels up to a length of 10 metres. The voltage is 12V. This model can be used in almost all types of vessel.

Thrust: 273 x 6.3 mm.

CP50

With a thrust of 50 kgf (500 Newton) the CP50 is very suitable for vessels up to 14 metres in length.

Thrust: 273 x 6.3 mm.

CP90

Even for vessels with a length up to 18 metres a reliable Cupa bow thruster has been developed. The CP90 has a thrust of 90 kgf (900 Newton)!

Thrust: 324 x 6.4 mm.

The CP50 and CP90 can also be used perfectly as stern thrusters.

Installation

A Cupa bow thruster is easy to install. It is fitted in a cross-pipe made of steel, which is welded in the vessel. The bronze Kaplan propeller is directly fitted on the motor in the cross-pipe.

You can connect multiple control panels, so the bow thruster can be controlled from different helms.

	A (mm)	B (mm)	C (mm)	D (mm)
CP40/50:	110	285	395	ca. 285
CP90:	120	310	430	ca. 360

Cupa Bow thrusters

The sets comes with a motor, a bronze Kaplan propeller, an electric control (not shown) and a clear manual. The motors are thermal secured. The Kaplan propellers of the CP40 an CP50 have a diameter of 10", the CP90 propeller measures 12". If you wish to use the CP50 in a 12V electrical system, be sure to order a serial parallel switch with your bow thruster (see Accessories).

N.B.: Please don't forget to order a joystick and cable with your Cupa. See Joysticks and cables.

On request available in 48V.

Model / type	Voltage	Power	Thrust	Item no.
CP40	12 V	2,3 kW	40 kgf	1040
CP50	24 V	3,7 kW	50 kgf	1050
CP90	24 V	7 kW	90 kgf	1090

To control your Cupa bow thruster, we offer a range of joysticks. These panels are all prewired for quick and easy plug and play installation.

To connect your bow thruster to the panel, you will need an extension cable. Extension cables are available in 8, 12 or 15 metres.

Pos.	Description	Suitable for	Item no.

Proportional controls for thrusters

Proportional control for thruster

Proportional control to steplessly adjust the thrust of a bow- or sternthruster from 0 to 100 percent. The control system ensures a soft start of your bow thruster ensuring a longer lifetime of bowthruster motor and batteries. Two versions, both 24V, are available: 450A (max. 5kW) and 650A (max. 11kW). On request also available for 48V. The stepless proportional joystick (41700) and the desired joystick cable length (41701) both need to be ordered separately.

Joystick and cable need to be ordered separately.

Description	Voltage	Suitable for	Item no.
Bowthruster proportional control 24V-5Kw	24 V	24V bowthrusters up to 5Kw	10502
Bowthruster proportional control 24V-11Kw	24 V	24V bowthrusters up to 11Kw	10503
Joystick proportional			41700
Cable 12x1 for proportional joystick p/mtr			41701

Softstarter for thrusters

With the Soft-Start control, any bow thruster (new and existing) will perform more quietly. The control ensures that the bow thruster motor starts gradually, causing water to be moved immediately. The ship starts moving before the bow thruster-propeller starts to hit air (cavitation). This also reduces the power consumption of the battery, which improves lifetime of both battery and switching contacts. There are two versions for 24V: 450A (max. 5kW) and 650A. (max. 11kW). Also available on request 48V.

Description	Voltage	Suitable for	Item no.
Soft-start bowthruster control 24V-5Kw	24 V	24V bowthrusters up to 5Kw	10902
Soft-start bowthruster control 24V-11Kw	24 V	24V bowthrusters up to 11Kw	10903
